Hello,

I used a tool that you promoted on your website to create a proposed congressional districts map. I used districtr.org to create the map. My map tries to use the same numbering system as the current congressional districts, and starts with district 1 at the northwest corner of the state. Thank you for considering my idea, and thank you for allowing the public to participate in this process by drawing their own district maps.

Here is the link to my district map.
