Please keep the Antelope Valley (AV) intact. Despite entailing two separate counties, it is undoubtedly one community. I have worked at Antelope Valley Hospital for fifteen (15) years. Our hospital serves patients throughout the AV, from both county portions.

This is just one example of one industry, but time and again this holds true with: jobs, churches, schools, healthcare, aerospace, small businesses, industry, and volunteer organizations. Our community is identifiable, not by county lines that bisect the heart of downtown, but by environment and topography that clearly delineate the area known as Antelope Valley.

If we are divided, residents will lack a representative committed to the unique interests and priorities that make us not residents of separate counties but a single community, Antelope Valley.

Thank You,

Phyliss Reily

Palmdale Resident
