Subject: Redistricting
To: <VotersFirstAct@crc.ca.gov>

Mothers In Action is a stakeholder in South Los Angeles. I want to request that the integrity of the existing state districts in this area remains intact for the underserved families that we assist. Helping improve the quality for people of color and the African American community is my priority. It is of the utmost importance, that the redistricting process does not impede on our ability to have representation that looks like us and will continue to fight for equal access for opportunities in the area of health, education, housing, employment and economic development and empowerment.

The areas I am most concerned about are the following:

Assembly district 54, 59, 41, 48, 62 and 64

State Senate District 30, 35

The African American community has very little representation in the State of CA on the State level and we can not afford to lose a single seat to demand and create a pathway to equal access to resources for our underserved community.

Respectfully,

Tracy Mitchell
