STATE OF CALIFORNIA

CITIZENS REDISTRICTING COMMISSION (CRC)

In the matter of:

CRC VISUALIZATION MEETING

Southern California

TUESDAY, NOVEMBER 2, 2021

1:02 p.m.

Reported by:

Peter Petty
APPEARANCES

COMMISSIONERS
Antonio Le Mons, Chair
Trena Turner, Vice-Chair
Isra Ahmad, Commissioner
Linda Akutagawa, Commissioner
Jane Andersen, Commissioner
Alicia Fernandez, Commissioner
Neal Fornaciari, Commissioner
J. Ray Kennedy, Commissioner
Sara Sadhwani, Commissioner
Patricia S. Sinay, Commissioner
Derric Taylor, Commissioner
Pedro Toledo, Commissioner
Angela Vazquez, Commissioner
Russell Yee, Commissioner

STAFF
Alvaro E. Hernandez, Executive Director
Ravindar Singh, Administrative Assistant
Anthony Pane, Chief Counsel
Marcy Kaplan, Director of Outreach
Ashleigh Howick - Field Lead, Northern California

TECHNICAL CONTRACTORS
Kristian Manoff, AV Technical Director/Comment Moderator

LINE DRAWING TEAM
Karin MacDonald, Q2 Data & Research, LLC
Jaime Clark, Q2 Data & Research, LLC
Tamina Ramos Alon, Q2 Data & Research, LLC
Sivan Tratt, HaystaqDNA

VRA COUNSEL Strumwasser & Woocher

CHAIR LE MONS: Good afternoon and welcome to the California Citizens Redistricting Commission's week of November 2nd set of meetings to outline our visualizations. I'd like to welcome everyone to November.

And I'd first like to thank my Co-chair, Trena Turner, for doing an outstanding job in my absence and prepping me to be able to shine today. Thank you, Commissioner Turner.

I also want to thank the staff for all the work that's done in putting these meetings together.

So I do -- I want to turn the floor -- let me give you a quick little overview of what to expect today and then we'll do roll call. And we'll have a couple announcements.

So we're going to be addressing assembly visualizations today. That'll include the Central Valley, Northern California, Bay Area, Central Coast, Los Angeles, and Southern California. We are going to take public comment later in the evening, after we've gone through all of the assembly visualization.

So I know we had a pattern of doing public comment toward the end of our bulk of meetings. We're going to
try doing it each day to give the public an opportunity, particularly for those who may not be able to wait until the end or their schedule doesn't permit.

So we hope that making that adjustment is going to help the public's participation in a way that helps them see that we hear them and we're working very hard to try to respond to those requests as best we can in this very complex and intricate process.

So we thank you. Keep the comments coming. And we really do want to hear from you. And anything we can do to help make the experience good for everyone is part of one of our commitments and goals, as well.

So with that, I do want to turn it over to Andrew for a moment. No, let me do roll call and then I'll turn it over to Andrew. So who's going to do roll call for me today?

ADMINISTRATIVE ASSISTANT SINGH: I will, Chair.

This is Rav.

CHAIR LE MONS: Hi Ravi. Yes, please. Take it away.

ADMINISTRATIVE ASSISTANT SINGH: Thank you.

Commissioner Sinay.

COMMISSIONER SINAY: Here.

ADMINISTRATIVE ASSISTANT SINGH: Commissioner Sadhwani.
COMMISSIONER SADHWANI: Here.

ADMINISTRATIVE ASSISTANT SINGH: Commissioner Taylor.

COMMISSIONER TAYLOR: Present.

ADMINISTRATIVE ASSISTANT SINGH: Commissioner Toledo.

COMMISSIONER TOLEDO: Here.

ADMINISTRATIVE ASSISTANT SINGH: Commissioner Turner.

VICE CHAIR TURNER: Here.

ADMINISTRATIVE ASSISTANT SINGH: Commissioner Vazquez.

COMMISSIONER VAZQUEZ: Here.

ADMINISTRATIVE ASSISTANT SINGH: Commissioner Yee.

COMMISSIONER YEE: Here.

ADMINISTRATIVE ASSISTANT SINGH: Commissioner Ahmad.

COMMISSIONER AHMAD: Here.

ADMINISTRATIVE ASSISTANT SINGH: Commissioner Akutagawa.

COMMISSIONER AKUTAGAWA: Here.

ADMINISTRATIVE ASSISTANT SINGH: Commissioner Andersen.

COMMISSIONER ANDERSEN: Here.

ADMINISTRATIVE ASSISTANT SINGH: Commissioner Fernandez.
COMMISSIONER FERNANDEZ: Presente.

ADMINISTRATIVE ASSISTANT SINGH: Commissioner Fornaciari.

COMMISSIONER FORNACIARI: Here.

ADMINISTRATIVE ASSISTANT SINGH: Commissioner Kennedy.

COMMISSIONER KENNEDY: Here.

ADMINISTRATIVE ASSISTANT SINGH: And Commissioner Le Mons.

CHAIR LE MONS: Here.

ADMINISTRATIVE ASSISTANT SINGH: You have a quorum, chair.

CHAIR LE MONS: Thank you. Good thing I had one, because I had started the meeting before the roll call. So now, we'll get back on track here.

Andrew, let me turn over the floor to you for announcements.

MR. DRESCHLER: Thank you, very much, Chair. Good afternoon Commissioners. And I just wanted to do one quick housekeeping item on our side. John will no longer be mapping with us, but I'm very happy to introduce Sivan Tratt, who has been working with us since April of when we started this project. She's been largely behind the scenes but working closely with Tamina, and Jaime, and Kennedy, and Karin, of course, on a lot of different
parts of this project. She's also worked internally with staff, Toni and Paul, on some of the mapping stuffing and digital -- digitization of the COIs.

So yeah, I just wanted to -- very excited to have her. She has a background in GIS and mapping. And I will just turn it over for her to do a quick hello before you get going.

MS. TRATT: Hello, Commissioners. Hello, Public of California. I'm really excited to be here. As Andrew said, my name is Sivan. I use she, her pronouns. I have been working behind the scenes with John very closely from the very beginning, doing a lot of work, like Andrew mentioned, with COIs and digitization. So really excited to bring those insights and experience to the forefront with all of you. And I'm just really excited to be here. And thank you for having me.

CHAIR LE MONS: Well, welcome, Sivan. We are happy to have you. Thanks for joining the team.

I just want to remind the public that, during the meeting, you can also submit comments. So just use our comment form that's on our website. And we are tracking those throughout the day. So feel free to, at any time you'd like to submit a comment that -- through the form, you can do so.

So with that, we're going to go into a brief closed
session. We should be back -- let me look here. I'd say
Kristian, first, has the link for the closed session been
sent out?

COMMENT MODERATOR: It sure has, Chair.

CHAIR LE MONS: Awesome. Okay. So everyone should
have that link.

So I'm anticipating we should be gone for about 30
minutes. If that changes, we will make sure that our
team updates the change on the website, so you'll know
when we're coming back. So expect us back around 1:30 --
let's say 1:30. Okay?

Any objections, do we need any more time than that,team? No? Okay. Perfect. So we'll see you back here
around -- oh wait a minute, I'm sorry, it's 1:08 now, so
1:30 would not give us -- let's say 1:45. We'll see you
back here at 1:45. Thank you.

(Whereupon, a recess was held)

CHAIR LE MONS: Welcome back, everyone. Good
afternoon, California. Thank you for your patience. We
were in closed session under pending litigation
exception. I wanted to let you know that no action was
taken.

So now, we're going to move into the bulk of our
agenda for today, which is our visualizations. And so we
have a lot of terrain to cover. So let's get right to
I'd like to turn the floor over to Karin -- Karin MacDonald and our line drawing team.

MS. MAC DONALD: Thank you, so much, Chair Le Mons. And thank you, very much, Commissioners for having us. Before we get started, I just wanted to give you a brief overview of what's been happening with respect to the hand-offs in the various regions.

So what you're going to see today is going to, kind of, resemble a gigantic clock that's working its way around California, starting in Ventura. Tamina took approximately, 40,000 people from Jaime, specifically Moorpark. This then helped addressed several issues identified along the coast, such as the split in Southern -- Southern Santa Barbara that you wanted us to address.

Heading north, Tamina, per commission direction, took West Sacramento from Kennedy, who then took Elk Grove in kind. And this was not an even exchange. And it has left four North Bay districts slightly short of population. And also the mappers are going to walk you through all this. I just wanted to give you a big overview of how this clock is rotating its way through California.

The Bay Area districts are currently overpopulated a
little bit, so these deviations could be reduced by, for example, adding a small portion of Contra Costa to a Solano district if that is commission -- the Commission's wish moving forward. And that would then, allow for compliance with other Commissioner direction, such as avoiding drawing Yolo North, for example.

Coming back south, as you recall, Tamina took 40,000 people for the Northern California pool from Jaime. And that, in turn, allowed Jaime -- allowed Kennedy to give back, approximately, 50,000 people to Southern California. So again, rotating things around.

Specifically, per Commission preference, this allowed the Tulare Kern district to stop at the county line and not cross over into San Bernadino.

Coming back around to Los Angeles -- to Los Angeles and to the Orange County border, per commission direction, we traded Cerritos and Artesia for La Habra. And any of the remaining differences in the hand-offs were balances that were -- that were using population deviations.

All the other ripples were internal to the individual line-drawer pools, which they are going to detail during their presentations. And with that, that is my basic overview of how the clock is moving right now. And I would like to move things over to Kennedy to
start us off with the VRA areas in the Central Valley.
And I know that Mr. Becker is on with you also, so perhaps we can start with Kennedy and with page number on your handout --

CHAIR LE MONS: Karin?
MS. MAC DONALD: Yes, please?
CHAIR LE MONS: One moment. One moment, please.
MS. MAC DONALD: Yeah.
CHAIR LE MONS: I just want to check in with Commissioner Sinay.
Did you have a question before we move into this, Commission Sinay?
COMMISSIONER SINAY: Thank you, Commissioner Le Mons. I just -- I just wanted to -- before we started all of this, just kind of thinking through a few things. You know -- you know, we've talked a little bit -- and I just wanted to put it out there, you know, our obligation to, kind of, really support VRA and look at -- you know, now that we have more information and we're getting close to live line-drawing -- just to really look at those -- the areas that we know are VRA, and not be shy if there might be better ways to reflect the VRA areas and really look at them as our anchors.
And as you said, I think it makes -- I -- I agree that it makes sense to start in the Central Valley and
really get that well. When you look at the numbers and
the deviations, it's obvious that we need to kind of push
things out from the center outwards and up, and such.
And we've made -- you know, ideally we'd go from Central
Valley to L.A. to Imperial, Riverside, but I know we
can't do it that way.

But the last thing I wanted to say is that we've
created a few restrictions for ourselves throughout this
and I think it's time that we really question if they
make sense or you know, in our -- if they make sense in
our quest for fair and rep -- equal and fair
representation. Some of them seemed to make sense at the
time, but it may not now.

And so I -- a few of them were -- like the 210
corridor -- including all the ports, not crossing the
Golden Gate Bridge, keeping Sierras together, keeping
tribal land together, keeping coastal communities, and
specific regions not crossing county lines -- I think we
need to be more flexible so that we can get to a closer
deviation rate.

And so it's time to make some of those harder
decisions. And I just -- I just wanted to put that out
there. I mean, I wanted to ask, you know, Karin and the
team, and you all, my colleagues, if you all agree that
it's time to just, you know, take a deep breath and
sometimes make those harder decisions now?

CHAIR LE MONS: Thank you for that, Commissioner Sinay.

So continue, please, Karin.

MS. MAC DONALD: Yes. Thank you, so much. And thank you for that, Commissioner Sinay, also. I -- so I would like to move it over to Kennedy. I would like to say that I -- we were informed that you would like us to inform you about who gave what piece of direction. We were just told that that is something you would like to do. So as far as the line-drawers can remember who specifically gave a particular piece of direction, they will be able to try and let you know that.

And perhaps if you remember if you gave that piece of direction, please just feel free to collaborate with us. We're not prepared for that comprehensively today, but you know, we basically just write down the direction but not necessarily where it came from. And then we implement it, so we'll try to do that moving forward.

And please bear with us today.

CHAIR LE MONS: Karin?

MS. MAC DONALD: Yes.

CHAIR LE MONS: I'd like to make -- just cl -- make a clarity.

MS. MAC DONALD: Uh-huh.
CHAIR LE MONS: If the line drawers could just speak to as much of the why behind whatever instruction they followed, they don't necessarily need to tie it to a particular commissioner. It -- so they don't have to remember who gave them the direction. It's just a matter of, you know, this was the direction that was given, and this is what -- how we were able to accomplish it.

MS. MAC DONALD: Okay.

CHAIR LE MONS: That would be sufficient enough.

MS. MAC DONALD: Okay, that sounds good.

CHAIR LE MONS: Thank you.

MS. MAC DONALD: Thank you very much for clarifying that.

CHAIR LE MONS: You're welcome.

MS. MAC DONALD: And we will do our absolute best.

CHAIR LE MONS: Thank you.

MS. MAC DONALD: So with that, I will move it over to Kennedy. Thank you.

MS. WILSON: Hello to the Commission. We will be starting today with the redrawn VRA districts, which, as an overview overall, I was told to try to keep the districts more compact in size and start moving them out more east to west instead of north and south.

And so we will begin on page 49, with West Bakersfield -- and I'm going to zoom in here to show you
that. So if you recall before, this was moving more
underneath as a curl, you would describe it. And so we
have changed the configuration to reach downwards into
Bakersfield. So we still Wasco, McFarland, Delano, part
of that. And when we zoom into the city of Bakersfield
and surrounding cities, we can see there's Arvin, Lamont,
Benton Park, Cottonwood, East Bakersfield, La Cresta, to
name a few cities that I was told to keep together within
this visualization.

And I will move over to this -- I did not introduce
it. So this here, the first line, will be the deviation.
The second line is Latino CVAP. The third line is Black
CVAP. The fourth line is Asian CVAP. The fifth line is
Indigenous CVAP. And the sixth line is White CVAP.

And I would like to say there is no, again, shift in
Shafter. And Shafter actually comes out to this corner
here. I will zoom in. And it is just hugging the line
of that piece of Shafter, that is not contiguous with the
city, and there is no split there. However, you can see
there is a split through Bakersfield. But then the
cities inside that I mentioned before as Bentonwood,
Cottonwood -- Benton Park, Cottonwood, La Cresta, Lamont,
Arvin, those are not split.

And I believe if Mr. Becker has something to say
about this district, he can. Otherwise, I can move on.
MS. MAC DONALD: Also Kennedy, hold on for a second.
Chair Le Mons, is this sufficient information or
would you like to know a little bit more about this
particular district?

CHAIR LE MONS: Commissioners will ask as needed.
I -- it -- she -- Kennedy is doing a great job.
Thank you, Kennedy.

MS. WILSON: Thank you. You're welcome.

MS. MAC DONALD: Thank you.

CHAIR LE MONS: And Commissioners, feel free to
raise -- you know, raise your hand. You know to do that.
If you have some questions, just let me know.
But yeah, we're doing fine. Thank you so much for
checking in Karin.

All right.

MS. WILSON: And --

CHAIR LE MONS: Commissioner Sinay, did you have
some -- okay.

Go ahead, Kennedy.

MS. WILSON: Okay. So if nothing from Mr. Becker,
then I will move north.

And before the configuration we had was having Kings
with Fresno and Tulare on its own, with a little bit of
Kings in there, but this new configuration goes a more
east to west direction. Like, as keeping Kings whole and
then here, I'm going to zoom in so you can see the border of Tulare, that's a part of there. So Porterville is in there and is not split. Tulare is whole, not split. However, Visalia does have a split in this northern corner, here.

And as you can see, another concern we have is keeping Visalia and Three Rivers together. And while there is a split in this northern corner, you can see that these two do reside in the same district to the east.

And then we reach up into Fresno County, and Reedley still has a split. Parlier is a part of this district, as well. Orange Cove was a part of it before, it is no longer. And then it reaches on the outskirts of Selma and Kingsburg, not splitting either of those, as well.

And I will go ahead and read off the se -- again, this is the deviation. Oh sorry, as I move my screen the label moves, as well. So we have the deviation. Latino CVAP, Black CVAP, Asian CVAP, Indigenous CVAP, and White CVAP.

And just as a general overview, again, Kings County is kept whole. It does reach into Fresno at this southern border, splitting Reedley. It does split Visalia a tiny bit to the north, again. And then the other cities within Tulare are kept whole.
My apologies, this is on page 48.
And again, I will leave this time for Mr. Becker to
say something if he needs to, and if not, I will continue
to move to the next one.
And so --

MR. DRESCHLER: I'll just say in general, I -- when
you're moving on, I'll just let you know if I need to
chime in. I just -- in the districts that are in areas
that have been designated as -- as areas where Voting
Rights Act compliance is a strongly relevant
consideration, I just advise the commissioners, take a
particular note of the predominant minorities CVAP and
also the deviation at this stage, because we're getting
at the stage where the deviation is a -- is an indicator
about where certain populations can be either subtracted
or added to maintain well within the legal range of
deviation in these districts. So I think that's a really
important pointer right now.

MS. WILSON: Thank you for that.

And now, we are going to move on to West Fresno,
which is on page 47. Luckily, these are all next to each
other.

So for West Fresno, I'm going to zoom out so you can
see the entirety of it. And then, I will zoom in to get
a closer look into the city of Fresno and the other
cities below. But it does come up to the northern border that it shares with Merced, and it takes Dos Palos.

And then we follow along the line here. The county line is -- stays along the Kings County line and does not go into our split there. And then I'm going to move into Fresno -- of the City Fresno. And we were also told to minimize splits in Fresno. So now we are down to two splits of the city of Fresno.

We are able to keep Sunnyside, Southwest Fresno, West Park, sou -- the north of the -- Northwest of the 99, which I'll turn on the streets so you can see where that is, as well. And so this orange line goes down here. That's the 99. And this community here is kept intact. And then we have Old Fig Garden, as well, with all of those.

And again, pointing out the deviation, Latino CVAP, Black CVAP, Asian CVAP, Indigenous CVAP, and White CVAP.

And now we will move north to a fourth district, which was not drawn before. And so this will be a new configuration as far as VRA is concerned.

So here, we are able to keep the County of Merced -- Merced almost except for that, Dos Palos area there, which no city splits are there, they're just going to Fresno. And I'm going to zoom into Madera. And you can see the city of Madera has no splits. Madera Acres is in
here, as well as Fairmead and Chowchilla.

And then we move into Stanislaus, and we do have a split of Modesto here at the bottom. I will zoom in so you can see. It is a non-contiguous city, and it has cities within it, as well. And so to grab in those cities, it does require splitting the city of Merced. However -- Modesto, my apologies.

And in doing that, we do split the bottom half. However, we have Modesto and Turlock for the most part kept together and no splits in Turlock.

And again, deviation, Latino CVAP, Black CVAP, Asian CVAP, Indigenous CVAP, and White CVAP.

And that is the conclusion of the new VRA districts I have drawn in the Central Valley.

CHAIR LE MONS: Does any commissioners have any comments before we move to the -- Commissioner Turner?

VICE CHAIR TURNER: Mine will be very brief.

Thank you, Kennedy.

End of comment.

MS. WILSON: Oh.

CHAIR LE MONS: Thank you, Commission Turner.

Commissioner Sinay?

COMMISSIONER SINAY: Thank you. I just wanted to make sure, on the West Fresno, where's that Fig -- Old Fig Garden? I saw it for a second, but it didn't -- I
didn't see it on the actual print out.

VICE CHAIR TURNER: It's in with -- oh, go ahead.

COMMISSIONER SINAY: It's that little one -- it's that little piece. Okay. Thank you.

MS. WILSON: Yes.

COMMISSIONER SINAY: I was just trying to -- it's hard to --

MS. WILSON: And I can zoom in a little further to ---

COMMISSIONER SINAY: No, no, that's fine. I was just -- it kept coming up in our -- in our testimony, so I was -- just wanted to be able to see it. But that -- we also had COI testimony that there is a strong APIA, AMEMSA Community in West Fresno, and I just want to make sure that we have looked at that -- those communities of interest and make sure that when we're splitting up Fresno that we are looking at the Punjabi, Sikh, that are west of 99 and the Arabic-speaking communities, the communities of interest we've gotten on those.

MS. WILSON: And I can take a look at that closer.

COMMISSIONER SINAY: Okay.

MS. WILSON: And I will also pull up this -- is the freeway boundary line, as well. And nothing on the west side of it is split. This --

COMMISSIONER SINAY: Okay.
MS. WILSON: -- line of the boundary actually is a little bit before that side, but I will also continue to look at that closer. And show you this is where the 99 is, as well.

COMMISSIONER SINAY: Okay. Perfect. Thank you. And then also on that map -- I couldn't see it on our visualization and I didn't do a Google map this time -- but is Fresno, city -- Sunnyside, Selma and Sanger, all kind of together?

MS. WILSON: So Sunnyside, Selma, and Sanger make a triangle here. They are all within the same visualization that I've drawn.

COMMISSIONER SINAY: Okay. Great. Thank you. I can -- I can -- I have a few on another one. I don't know, Chair, if you'd like me just to step back so others can step forward or if you want me to go through all of them.

CHAIR LE MONS: Yes. Could you do that?

COMMISSIONER SINAY: Of course.

CHAIR LE MONS: And I'll come back.

Commissioner Kennedy?

COMMISSIONER KENNEDY: Thank you, Chair. Just a -- just a reminder -- and this is not so much on anything very specific. But just to keep in mind the city area -- city spheres of influence when we're -- when we're
I just checked the Fresno City Sphere of Influence, and it may be necessary to adjust that northern boundary out of the -- out of the purple into the green, just so that we keep all of Fresno's designated sphere of influence with the city rather than leaving a small part of it outside. Thank you.

CHAIR LE MONS: Commissioner Andersen?

COMMISSIONER ANDERSEN: Thank you, Commissioner Kennedy. That was one of my questions.

And the second one was, in Fresno, is our cut line -- we've been hearing, you know, the separation line is Shaw Avenue. And I was trying to find Shaw Avenue in all the different visualizations, here, but I couldn't quite find it. Have -- is that the line that we were using?

MS. WILSON: This -- in previous visualizations, yes. But in terms of trying to reach a number of C-allowable CVAP and so forth, I did move it down slightly in this visualization. And so East Shaw actually runs at the top of where Old Fig Garden is across. And I had looked at keeping it there, but as far as deviations went and for CVAP, I did move it lower.

And of course, maybe that can be moved if moving other things around, as well to (indiscernible).
COMMISSIONER: Yeah, I would like us to see that because we did get -- I cannot recall -- if someone -- one of the commissioners recalls, what community is in that area -- but I would hate to, kind of cut them in half. That's why I would like to see that. And then we can see if -- you know, that would obviously increase our population a little bit. We might be able to pull it from someplace else, with one of the negative populations in the area.

So -- thank you.

CHAIR LE MONS: Commissioner Akutagawa?

COMMISSIONER AKUTAGAWA: Yeah, thank you, Commissioner Andersen. I was going to ask that same question because it's hard to see from some of the visualizations where --

VICE CHAIR TURNER: Right.

COMMISSIONER AKUTAGAWA: -- what's included, and we did hear quite a bit of testimony from many of the people who called from Fresno stating that Shaw Avenue was a cutoff. And on that note, I wanted to also ask Kennedy, about the Hmong community, as well too. They are the largest -- Fresno has the largest Hmong community in the U.S., and I know that testimony that we got said that they were concentrated in what is West Fresno, but they are also -- have further spread out. And wanted to see
if you had any COI testimony that you can note in terms of the Hmong community throughout Fresno, but also understanding where they might be in East Fresno, as well, too. And whether they fall within that, you know, south of Shaw Avenue, kind of, area?

MS. WILSON: So I don't remember exact boundaries, but I do remember that there were some communities of interest that reside, kind of, in this northern area, kind of, across this. I would need to pull up further to look closer at it, but I can take that into consideration as I reconfigure this for the next time.

COMMISSIONER AKUTAGAWA: Okay. Thank you. Because I think -- my understanding of that community is that they share a of characteristics in terms of agricultural-focused, more farming, and I think, you know, just making sure that, you know, common interests are aligned in terms of the districts that may also fall in, as well, too. So thank you for checking.

CHAIR LE MONS: Commissioner Turner?

VICE CHAIR TURNER: Yeah. Thank you, Kennedy. And thank you for zooming in. I think when I was looking at that yellow, I did believe Old Fig Garden was included, so -- up to Shaw -- so I just wanted to support adding that back into this particular visualization.

CHAIR LE MONS: Commissioner Sadhwani?
COMMISSIONER SADHWANI: Yep. I just wanted to add in here, yes, I think we've definitely heard testimony around Shaw. My only concern about that is overpacking the -- this district. So that would be my only caveat to that, is I think, yes, let's see what's possible. But I do want to raise that as a place caution.

CHAIR LE MONS: Thank you.

Okay. I see no additional hands.

We're prepared to move forward, Karin.

COMMISSIONER SINAY: Wait --

MS. MAC DONALD: Yeah. I think this is -- we're now going to go in the north-south on that side.

CHAIR LE MONS: I'm sorry.

MS. MAC DONALD: Kennedy --

CHAIR LE MONS: I'm sorry, Karin, to interrupt you. In all fairness, I did tell Commissioner Sinay I would come back to her.

Commissioner Sinay?

COMMISSIONER SINAY: Sorry about that. I just -- we had just stayed in one area, and I was -- I wanted to talk a little bit about -- it felt like some of the areas had really high numbers of Latinos -- you know, CVAP. And others still -- for instance, I was kind of surprised in Stanislaus, which falls under the area that needs to be VRA protection. It's split up a few times and it
didn't feel like -- I think only -- how many times is
Stanislaus -- the County of Stanislaus split up?

MS. WILSON: It is split twice. This red line --
sorry if that's confusing -- these are past assembly
district lines, we have up towards the north Riverbank
and Del Rio going north. And then this portion here of
that end of Modesto, kind of, to Diablo Grande, Newman,
here with Merced.

COMMISSIONER SINAY: Okay. And so on the second
one -- the one with Merced -- it's at -- it has, kind of,
a -- it is -- it has fallen under -- I guess, my question
was, I was -- I was looking at, is there a way to better
represent Stanislaus -- the communities of Stanislaus,
and one of my -- sorry, I've got all these notes. One of
them was looking at it with part -- let me see if I can
find exactly what my note was. All it -- oh, shouldn't
Stanislaus and East -- can Stanislaus and East
Stackton -- Stockton be put together, kind of, for a VRA
district?

MS. WILSON: I can take a look at that for you.

COMMISSIONER SINAY: And I know that we don't want
to split up Stockton too many times. But I just -- it
felt like some districts are over 55 percent CVAP and
then others are really low. And so I was just trying to
figure out how to represent the communities in Stanislaus
better, or differently.

CHAIR LE MONS: Thank you, Commissioner Sinay. Is that your final comment? Thanks.

Karin, please continue.

MS. MAC DONALD: Yeah. I think Kennedy is going to move to page 50, if I am not mistaken.

Is that correct, Kennedy?

MS. WILSON: Yes, and I'm going to turn off the CVAP and just leave the deviation, if that's okay. So it doesn't block as much of what you're looking at.

CHAIR LE MONS: And let me confirm that's okay with Commissioners.

Commissioners, is that okay? Would you prefer to see it with the CVAP or is it okay to just see the deviations?

VICE CHAIR TURNER: I'd like the deviations. We have the CVAP on our paper copies, right?

COMMISSIONER FERNANDEZ: Yeah, I like the deviations also.

CHAIR LE MONS: Okay. So let's go with, as planned, Karin. Thank you.

MS. MAC DONALD: Thank you, so much.

And Kennedy, your box -- the menu box is showing on the map.

MS. WILSON: My apologies. It's how big my screen
is and sometimes it does not cooperate. But -- there we go. Now, I won't need to pull it up anymore.

CHAIR LE MONS: Commissioner Sinay, did you have another comment? Okay. Your hand is still raised.

Thanks.

MS. WILSON: So now we will move on with the non-VRA consideration districts.

And I'm going to move down south and start on page 50 with Tulare and Kern. And now the box is not showing up. And if I could just have one moment to bring those labels back up?

CHAIR LE MONS: Yeah, take your time.

MS. WILSON: And I'm almost done. I'm not sure what happened, but I'm getting you back on track here.

CHAIR LE MONS: No worries.

MS. WILSON: Okay. There we go. That looks better. So starting with Tulare Kern. Everything that we have in Kern up here, again, not a split in Shafter. What's left of Bakersfield, there's Rosedale, Oildale. Down to the sides, we have Ford City, Taft, the Pine Mountain Club, Lebec community. And again, this is on page 50 if that was not clear.

And we do have, from the VRA district, the split. So I just want to note where it's being split in Bakersfield. We do have -- Bakersfield Country Club is
not included in the VRA. So it is here in this Tulare Kern. And then Bear Valley Springs, Stallion Springs, and Keene, those are going into the Antelope Valley due to population. I'm trying to get this at a good deviation.

And then, we have, Lake Isabella, Bodfish, that area together. And then, Inyokern and Ridgecrest being kept within Kern County and not with San Bernadino. And then moving up to Tulare. We have, again as I mentioned, this split in Visalia. But keeping the rest of Visalia, Exeter, Lemon Cove, and Three Rivers together.

And so now that we've finished Tulare Kern, we are going to move on to the Sierras, which, again, an overview of this area was keeping Mono and Inyo to the north. And by doing so, instead of keeping it with Fresno, Kern, or Tulare for population, I was told to give it population from the -- my thing is going slow -- Sierra, Nevada, Placer, El Dorado, Amador, Calaveras, Tuolumne, Mariposa, Madera region. And Madera is cut off at the foothills.

Like I've showed before, it does not include Madera. Madera is on the other side. It comes and touches the outside of that. And Tuolumne, Calaveras, and Mariposa are all kept together in this visualization, as well.

And now, we will be moving on to page 46, which is
East Fresno. And I'm going to zoom in a bit closer for us to see that here. And so -- again, I have showed we cut down the splits that were in Fresno. There's on -- in the city of Fresno, there's only two. And this keeps Northeast Fresno and Clovis together. Minkler, Auberry, Big Creek, in keeping the east part of Fresno, all in one district and not going into other counties. It's just within Fresno for this visualization.

And now, we will be moving on to page 44. And we're going to be moving north to Stanislaus. And so again, with making this VRA district, it had to reach north into Stanislaus from Merced to get the population and to get the CVAP necessary. So that is why there is that split. However, like I said, I kept Turlock and Modesto together as much as possible. And as well as, reaching up into San Joaquin, Manteca area, and Lathrop because this needed that population from changing these VRA districts, as well. And then Oakdale to Knights Ferry, all staying within Stanislaus.

And then we are going to move on to page --

CHAIR LE MONS: Before you move to -- before you move on, Kennedy -- Commissioner Turner?

VICE CHAIR TURNER: Yeah. Thank you, Chair.

Kennedy, I'd like to have you look at -- in this particular Stanislaus visualization -- including
Riverbank and Escalon, and removing -- and leaving Manteca and Lathrop, and San Joaquin. Ripon's okay. Ripon, Salida, Riverbank, and maybe Escalon, if needed, to replace that population.

MS. WILSON: And I will take a look at that. I'm sorry.

CHAIR LE MONS: Thank you, Commissioner Turner. Kennedy, you can continue.

MS. WILSON: Yes. And so now, we will move on to Stockton, which is -- the city of Stockton is kept whole and then paired with Mountain House and Tracy. French Camp is in there. Mirada, which comes on the side of Stockton actually, is with this Eastern part instead of with the Stockton -- the city of Stockton.

And now, we will move north, again, to page 42. This has South Sac and Stanislaus together. And again, Riverbank down here in Stanislaus is going north. Escalon, Farmington, Peters, Lockeford, Woodbridge, I'm keeping all of these eastern farming communities of San Joaquin together, and Lodi, as well, up to Elk Grove, Florin, Vineyard and Wilton. And I know there was a request to keep Elk Grove with Sacramento, however, as far as population goes, that was not possible.

And to, kind of, make that possible, I think there would need to be further splits within communities going
more north, so that we can -- as you can see it's
underpopulated in the north, so we would need to push it
north beyond, kind of, county boundaries to make sure
that the stuff could move north so that Elk Grove could
be with Sacramento. However, I do keep Elk Grove with
Florin in this visualization. And then Rosemont and
Mather and La Riviera are in this, as well.

CHAIR LE MONS: Commissioner Sinay?

COMMISSIONER SINAY: Thanks. I just have a quick
question on process. I think I -- earlier I had asked
the question -- in the past, we kind of went through it
in general, and then we, kind of, stopped and asked
questions about it. And now, I thought -- I thought we
had already gone through it. So I just want to know,
when is the right time to start asking questions on a
certain region? When will be stopping -- how -- yeah,
how is it being envisioned so that we don't keep
interrupting you all?

CHAIR LE MONS: So I was checking the cadence,
actually. So I've been, kind of, if I see some
(indiscernible) or depending on how quickly you react,
I've been managing it that way. If everybody's okay with
that, I'll continue to manage it that way. But if you
want to make a recommendation that you want to hold
questions until a certain point, I can entertain that,
as well.

COMMISSIONER SINAY: I actually like that we ask questions when we're there because sometimes it's hard to go back and remem -- you know, find all your notes and stuff. I do have a comment back on Inyo. So we can do that at the end, since we've already passed Inyo. And I'll just get back in line for at the very end. But I do -- I do like this -- this cadence, as you are calling it.

CHAIR LE MONS: Okay.

And of course, if you -- Commissioners, if you want to collect your questions, you can do that as well. I want to make sure you get an opportunity to make whatever comments that need to get made.

Okay. Commissioner Fernandez?

COMMISSIONER FERNANDEZ: Thank you, Chair.

Well, since we're going as we go, or commenting as we go, yes, regarding this visualization that you have, Kennedy, I'm sure that you already expected this comment from me, but we need to keep Elk Grove, Vineyard, Florin, and Rosemont associated with Sacramento. There's communities of interest, both religion, transportation, as well as culture that needs to stay together. And I do have comments as we move further north so that should hopefully help with some of the population issues.
And then I also -- what was my other comment -- then my other comment was also back at Inyo at 52. So maybe if we go there, Commissioner Sinay can join me with her comment, as well. So that was page 52 that I'm referring to.

MS. WILSON: Okay. And move back to the -- move back to this one?

COMMISSIONER FERNANDEZ: Yes, thank you, so much.

COMMISSIONER FERNANDEZ: Yeah. Thank you. And I -- as I've stated in the past, we need to see what we can do the further north counties, probably from Amador up, are very different than the Inyos. So I think as we started this meeting -- and we're going to have to start making difficult decisions. My recommendation -- one, would be to keep the -- those other counties separated from Mono, Inyo, Tuolumne, Mariposa. And maybe consider going into some of the Fresno, Tulare to grab some of that -- the population. Thanks.

CHAIR LE MONS: Commissioner Sinay?

COMMISSIONER SINAY: Thank you. Inyo is one of the areas that has been covered under the potential VRA areas. And so I would like to see us make an effort to -- you know, I do think it needs to be separated from the other Sierras. And we need to -- you know, before we
go to the far north, I really -- like Commissioner Sadhwani said before, and we really need to look at the Central Valley really well and not rush up to the north. And make sure that we're starting to look at the zero deviations because I think a lot of the -- in the past, I would rather -- as I said earlier, I would have rather gone from Central to San Bernadino to Riverside to Imperial to San Diego because we keep going from north to south and we keep pushing -- you know, making decisions that are being pushed down. And now it's time we make decisions and push things up because the deviations are not working.

And -- it -- we need to make some tough decisions. So I would like Inyo to see how we can connect it with Tulare and other -- other communities so that it does have an opportunity that the community -- you know, since it is a VRA.

And then I would like us to start thinking about what are some of our other thoughts on how to get the deviations to zero in the Central Valley before we move north.

CHAIR LE MONS: Commissioner Andersen?

COMMISSIONER ANDERSEN: Yeah, thank you. I was, kind of, holding things a little bit back because I wasn't expecting us to, kind of, answer as we go. And so
I do have some ideas, in terms of moving population.

I do just want to say, remember that's -- the Inyo Mono, you know, that area -- I've said this a million times -- but that is the community of interest. They have been -- I believe the only reason Inyo is a VRA is because of what county it was associated with, not that Inyo, itself, is at all a VRA district.

COMMISSIONER SINAY: Could we get that confirmation from our VRA counsel?

MR. DRESCHLER: I believe that's accurate. Let me look at the -- let me look at the maps. Inyo doesn't, by itself -- it happened to have been included in a district that had some VRA considerations -- but the county, itself, is not an area that raises any kind of significant VRA concerns.

MS. WILSON: If I may, I turned on the previous assembly districts. And as -- if you can see, what's included with it are the parts of Tulare that I have included with Keene.

MR. DRESCHLER: And that's why Inyo might have appeared in some VRA analysis because of its inclusion in this district, Assembly District 26, I believe it looks like. But it does not -- Inyo County does not have the population concentrations to rise to VRA consideration otherwise.
COMMISSIONER ANDERSEN: Yeah. Thank you. And what I'd -- what I'd like to do, rather than -- there -- some of these areas, like -- actually, if we could go back to the -- in terms of rearranging some of the numbers, I think this is a very valid issue. And if we look at Stanislaus again, it has -- it already has a plus four, as does the Stockton where -- where the -- I'm sorry, and then the -- actually, the upper Stan -- the Sac Stanislaus, the 4.9 -- if we could move up there just a little bit. Thank you.

I agree with Commissioner Fernandez about how we have to rearrange that one to include it with Sacramento. And I understand population is an issue, but how about if we take out -- and it's not a lot of the population -- but Solano is a negative five. And that whole Terminus area, close to -- close to -- before you hit Lodi through Walnut Grove, that is all the Delta area that we were talking about.

And I would propose pulling that section out of the Stanislaus -- Sacramento, Stanislaus, even a little bit more, like, if Galt -- I don't -- I would have to ask Commissioner Fernandez her understanding of that area -- but putting that into that, sort of, Delta and Solano areas -- the Solano area, which might, then, help including Sacramento into the -- in terms of shifting our
population.

I just thought I'd bring that suggestion up. And so Commissioner Fernandez might be able to essentially work with that.

CHAIR LE MONS: Thank you, Commissioner Andersen.

Let me make a clarity point. So the cadence that I was doing earlier was, a lot of it was clarity questions, wanting to see things a little bigger, clarifying the whys of how the visualization came to be. It wasn't so much emphasized on direction.

So I'd like to distinguish the two. I'd like you to continue to ask those questions as you -- as they come up, because that is a nice flow of conversation. And hopefully, it will help all commissioners take those clarifying questions into consideration as they formulate their direction.

And I ask that when we get to the point of giving direction, that the direction is specific. It's time to not be really general and have all these sort of variations on, well, we could do this or do that, but give a very specific direction. So I'm going to ask each commissioner to be thinking about, as the discussion or questions, or clarifying questions are being asked, how does that inform the direction that they want to give, and then give that direction when we get to that point.
So I'd just like to make that little bitty distinction if you guys don't mind.

Okay. So with that, there's no hands.

Kennedy, let's continue.

MS. WILSON: Sounds good, Chair.

Next -- I believe we just did South Sac, Stanislaus from where we left off. So now, we will be moving to page 39, into Sacramento.

I'm going to zoom in so we can see that Sacramento is whole, except for this part, here. So it's not whole, but I'm going to turn on this Google Terrain to show you that, here in North Sacramento, we have -- I'm moving closer -- Del Paso Heights, which was a point of concern for keeping that community together and is right here, as I'm waving the hand around right under Dwight Eisenhower freeway, and is kept whole. And is not split.

And we do have a split here, along this area, which is -- I'm sorry, let me turn on the other streets layer -- around down -- and this isn't a freeway, it's, kind of, a waterway that goes down here. And that's where we have that split going along. And then the rest of Sacramento is all together -- I'm going to turn off the streets layer.

And West Sacramento was taken out to be put with Yolo. And then Fruitridge Pocket, Lemon Hill Parkway,
and Southeastern Sacramento are kept together in this visualization.

Now, moving on to page 38. We have North Sacramento County, which is here the blue -- let me center it here. We have Rancho Cordova, Arden-Arcade, Carmichael kept together. Of course, the Del Paso Heights I just mentioned, Rio Linda, North Highlands, Foothill Farms, Antelope, Fair Oaks, and Gold River kept together in this visualization.

Now, continuing to move north, next, we have -- up above this one in yellow -- West Placer. So I'm going to move it down. So here we have Folsom, Orangevale, Citrus Heights, and Elverta moving up with Roseville, Rocklin and bringing back in Lincoln so that it's not separated from Rocklin and Roseville for this visualization. And Granite Bay and Loomis are separated. Due to direction, I had to keep Sutter and Yuba together and move Butte north, which I will go to next. But here, this is the West Placer visualization.

Now, continuing to the visualization I was just talking about, we're going to move to page 13. And it is above us in green. I'm going to zoom out so we can see the entirety of it.

Last time, I had a visualization that had Butte, Sutter, and Colusa together, and I was told to move Butte
to the north and Colusa to the north. However, with numbers and not splitting up any counties, that just isn't possible. Butte does have a pretty large -- a pretty large population. And so without including Tehama, as well, you really can't get that Colusa up there.

And then you still have to populate Sutter and Yuba together. And I was told to take in Grass Valley from Nevada. But that just doesn't do it, as well. You can see I'm still at negative four.

And so I had to dip into Placer, where I took Granite Bay, and Loomis, and Sheridan, Auburn and North Auburn, and Placer, the Grass Valley area of Nevada, Sutter and Yuba whole and kept together, and then Colusa, Glenn, and Tehama in green.

And then lastly, we have the NorCal visualization, which is on page 12, right after -- right before the other one. And we have Siskiyou, Modoc, Shasta, Lassen, Plumas, and Butte all kept together. And of course, still part of the Karuk Tribe in Humboldt. So we have cut out this northeastern corner that contains the Karuk Tribe and keeps them whole with Siskiyou.

And that is the end of my presentation.

CHAIR LE MONS: Thank you, so much, Kennedy. So at this time -- well, based on Kennedy's presentation, I'd
like commissioners to provide any direction that they
want to provide.

Commissioner Fernandez?

COMMISSIONER FERNANDEZ: Thank you, Chair.

Okay. Let's see. Kennedy, I already made comments
about El Dorado. And so if you could move down to 37,
38, and 39. That's the Sacramento areas. And
unfortunately, because most -- quite a few of these areas
are unincorporated, so I don't have the population
totals. So I'm going to have to do, like, guesstimates
in terms of moving things around. Oh, that's perfect.

So I already talked about Elk Grove, Vineyard, and
Rosemont to keep that. I'd like to keep Wilton in there,
as well, but if not, that's okay. That is more of a --
rural and they do have more commonalities with the
agriculture, farming communities that they're in. I
would -- I'm just responding to Commissioner Andersen
regarding Galt, and I forget what was down below. I
would leave that in that district. That would be my
recommendation.

I have recommendations for Solano when we get to
that. Yeah, I would leave that where it's at.

And in terms of trying to -- and keep Elk Grove in
there with Vineyard and Sacramento, because like I
mentioned earlier, we're breaking up some communities and
this is not a VRA area. So we can look at other issues as transportation, or cultural, or education with some of the commonality.

So I -- I'm trying to think of how we're going to break up this little -- how we're going to try to make room for Elk Grove, Vineyard, and Rosemont, and I don't have all of the -- the populations, as I mentioned earlier. So I'm going to have to leave it to you -- sorry, Kennedy -- in terms of how we can move things in and out.

I think it's important to keep Sacramento together as much as possible and all those communities. Oak Park, I know one of their -- I'm glad they're together but they also -- they also have commonality with the Vineyard and Oak Grove, as well as Florin, specifically.

So do you need anything else from me, Kennedy?

MS. WILSON: No, that is helpful. And I just would like to say that in terms of moving things around, I do think it would start to split up things up here. And I know that you don't understand what the populations are, but --

COMMISSIONER FERNANDEZ: Right.

MS. WILSON: -- and I, you know, off the top of my head, I'm clicking cities back and forth, I'm like, wow, these are highly populated but then they all, you know,
from previous direction, want to stay together. But we
need to also just keep pushing population north, which
could mean some of these going farther up than you have
previously mentioned.

And if that is okay because you'd rather this here,
it would mean pushing things up that haven't been told to
be pushed up before. If that makes sense.

COMMISSIONER FERNANDEZ: Right, because you could
potentially push up, like, Lincoln with Auburn, and
Granite Bay. They do have some commonalities. And
with -- yeah, I think that would probably be preferable
at this point. But of course, I'll have to see what it
looks like. Sorry about that, Kennedy. Thank you.

CHAIR LE MONS: Thank you, Commissioner Fernandez.

Commissioner Kennedy?

COMMISSIONER KENNEDY: Thank you, Chair. I just
wanted to ask if it would be possible to -- or unless
there's a reason for splitting Visalia, if we could find
a way to make Visalia whole by compensating for that in
the area around Tulare City, Lindsay, and Porterville?
Finding a way to get the population you need for that --
for the Kings Tulare district, by expanding a little bit
around Tulare City, Lindsay, and Porterville so that
Visalia could be whole. Unless there's a reason --
particular reason that Visalia is split. Thank you.
CHAIR LE MONS: Thank you.

Commissioner Sinay?

COMMISSIONER SINAY: The Chair had asked us to give specific instructions, so I wanted to go back to Stanislaus and the -- Stanislaus and San Joaquin. And the -- if you look at the -- how this area was drafted by MALDEF'S report, they are Assembly District 23 on page 177, that gives a good idea of how -- how to create a representative -- a VRA representative district in this area. Obviously, that'll move some of the other things around, but I think it's important that we get this -- get this right.

CHAIR LE MONS: Thank you, Commissioner.

Are there any closing direction or questions for Kennedy before we move to another section of the visualization?

Commissioner Akutagawa?

COMMISSIONER Akutagawa: Yeah, I just want to perhaps, ask Kennedy, just to make sure I'm understanding this correctly. I believe Stanislaus is cut up three times?

MS. WILSON: Twice. Sorry. Again, once here to the yellow. And then once with the orange. And it moves into San Joaquin, but it's only split twice, the county.

COMMISSIONER AKUTAGAWA: Okay. So Riverbank is part
of Stanislaus, but that's the only other place that it's
cut?

MS. WILSON: Riverbank and Del Rio are moving north
but it -- that's the only -- they're cut in these two,
this kind of, wider orange-looking area and the yellow
area here.

COMMISSIONER AKUTAGAWA: Okay. So there -- so
basically, I mean, it's still three times, then? It's
not just -- because of where Modesto and Ceres is. And
then, that's one cut, right?

MS. WILSON: But -- yeah, that's one cut. And then
this is the other.

COMMISSIONER AKUTAGAWA: Yeah, so --

COMMISSIONER SINAY: I think three districts, that's
the -- yeah.

COMMISSIONER AKUTAGAWA: Three districts then.

Basically, there's three districts.

MS. WILSON: Oh okay. I thought you meant the city.
Okay. I was -- I mean the county -- I was confused by
what you were saying.

COMMISSIONER AKUTAGAWA: I'm sorry, I should have
been more clear. So yeah, so it is -- the county,
itself, is cut up three times. There's three --

MS. WILSON: Yeah.

COMMISSIONER: Okay. All right. Thank you. I just
wanted to make sure -- I guess -- I mean, just look --
given some of the other conversations that we've had in
terms of, perhaps, some of the movement that is going to
be needed to be done, is there a way to avoid splitting
the county more than once? Like you've done -- I think
you've done a fantastic job in terms of, you know, the --
kind of the lower part of the Central Valley where you've
managed -- instead of multiple -- you know, crossing
county lines three time -- two times, you know, you've
just managed to make it just one. Is there a way to do
something similar with Stanislaus? I know that we've
gotten COI testimony from them about feeling like they
just become like the -- the place where they just get
pulled for population and other things like that, and
perhaps, to minimize for Stanislaus if we can that
that --

CHAIR LE MONS: Commissioner Akutagawa, can I ask
you to give direction?

COMMISSIONER AKUTAGAWA: Yes, and that's my
question.

CHAIR LE MONS: If you're saying don't split it
twice or whatever, just please give that direction and
then they will attempt to do what's being asked, and let
us know otherwise.

COMMISSIONER AKUTAGAWA: Okay.
Kennedy, is -- what -- was what I was saying --

unless you just want me to make it a statement.

CHAIR LE MONS: Please make it a statement.

MS. WILSON: Oh -- yeah, sorry.

CHAIR LE MONS: I'm asking that you please make it a statement. The direction should be direction and not questions.

COMMISSIONER AKUTAGAWA: All right.

Kennedy, please split a county once. In this case, specifically, Stanislaus, please just split it once.

CHAIR LE MONS: Thank you, Commissioner.

Commissioner Fornaciari?

COMMISSIONER FORNACIARI: Sorry, I just -- just --

have kind of a general question for the line drawers at this point. I mean, it looks to me -- based on what we've got going here, we're going to be pushing a significant amount of population north up the Valley. I mean, we've got 20 -- almost 25,000 people to push north from Merced into Stanislaus, an additional 20,000 people to push north, an additional 15,000 people to push north from Stockton. So I mean, if we're -- I mean, depending on how comfortable we are with deviation -- that's something we haven't talked about.

I mean, if we're comfortable with the five percent deviation for a good reason, then maybe the mappers don't
have to push so hard. But I think, you know we're giving
direction here that's moving population around fairly
significantly here. And I think, you know, as a
commission, we need to come to some agreement on what
deviation we're comfortable with and give some guidelines
on that.

Because, I mean, if we push towards zero, that's a
heck of a lot of people going north, assuming we're not
going to go east or west. And that's going to completely
change these maps. So you know, we're getting to a point
where we've got to settle on what these maps look like in
an architectural term -- you know, standpoint -- and to
make little tweaks.

So you know, I'd really like to see us get to a
point where we have some direction on deviation.

CHAIR LE MONS: Thank you, Commissioner Fornaciari.

Commissioner Sadhwani?

COMMISSIONER SADHWANI: Yeah, a couple things. I
think I agree with you, Commissioner Fornaciari, on
deviations. I think that's an important piece we need to
uplift.

I think we do have -- my understanding, and maybe if
counsel wants to weigh in on this or even the line-
drawing team -- I think we need to have a little more
flexibility on the assembly districts than we would on
the congressional districts, so getting -- recalling that
would be probably helpful. And I do agree with that
piece.

I want to take a closer look at Sacramento just to
better understand the direction that Commissioner
Fernandez is giving here because -- I -- I'm sorry, I'm
trying to keep up with the various pages and sometimes we
flip around, and I can't keep up. What is the -- what is
the population deviation in that pink district that's
just above that includes Sacramento?

   MS. WILSON: 2. --

COMMISSIONER SADHWANI: That's already -- oh sorry, go ahead.

   MS. WILSON: Sorry, I was just repeating it to you. I was just saying it's 2.10.

COMMISSIONER SADHWANI: Yeah. So we're already over
population there. And so -- I think -- and I'm just
trying to, again, wrap my head around it.

So Commissioner Fernandez, your perspective was
including Elk Grove, Florin, Vineyard into that district?

   COMMISSIONER FERNANDEZ: Yes, correct. Those are all Sacramento.

COMMISSIONER SADHWANI: And did you have thoughts
about what to remove?

   COMMISSIONER FERNANDEZ: Yes and no. I directed --
because I don't know the numbers, that's the unfortunate part --

COMMISSIONER SADHWANI: Right.

COMMISSIONER FERNANDEZ: -- because many of these are not cities. So I don't have that information. So it was pushing it a little bit north and then, possibly, east, as well, into that VADECA and also into the West Placer. Like the Antelope right now that is with Sacramento and -- I mean, with the -- I can't -- I don't know what the name of that one is.

COMMISSIONER SADHWANI: Got it.

COMMISSIONER FERNANDEZ: Right next to Elverta because those are actually right next to each other.

COMMISSIONER SADHWANI: Okay. And can -- I'm so sorry because I'm not super fam -- I'm not very familiar with these neighborhoods. Where is Oak Park?

MS. WILSON: Sorry. I'm zooming in to --

COMMISSIONER SADHWANI: No, I appreciate that.

Thank you.

MS. WILSON: And the font is kind of tiny. It's right underneath this --

COMMISSIONER SADHWANI: Oh. I got it.

MS. WILSON: -- above Fruit Ridge pocket. It's in this area right here.

COMMISSIONER SADHWANI: Okay.
MS. WILSON: I'm circling around. Underneath the
50, right next to Curtis Park, right of the 99 here.

COMMISSIONER SADHWANI: Got it. Yeah, because I
think one of the big challenges I'm just trying to wrap
my head around here, is that we have a lot of COI
testimony from this region. If we were to put all of it
together, we're way over population, right?

So I hear you, Commissioner Fernandez, on the
Florin, Elk Grove, Lemon Hill. Definitely, we've had
that testimony. We've also had pieces on Lemon Hill and
Del Paso Heights. We've had -- keep Elk Grove with
Greenhaven because there's a shared levy system with the
Sacramento River.

And then we also have stuff from Equality
California, I believe, for the LGBTQ community looking
at -- I'm trying to pull up my notes on that one -- West
Sacramento with the city of Sacramento, including the
neighborhoods of Johnson, Business Park, Mansion Flats,
New Arab Park, Boulevard Park, Downtown Sacramento. I
don't know how we do all of that. Like, I don't know how
we keep all of those pieces together because this
configuration is already over. So I -- I would agree
with you, Commissioner Fernandez, in thinking about what
are our options here?

I'm wondering if -- if this pink piece, this
Sacramento district, is ultimately two districts or if there's a different way, Kennedy, that you can think about reconfiguring them to include -- so that we're being responsive to a lot of different COI testimony. I don't know where we're at with -- with where that would put us in terms of population, but I wanted to uplift all of those various, and to some extent, conflicting COIs.

CHAIR LE MONS: Thank you for that, Commissioner Sadhwani.

Commissioner Sinay?

COMMISSIONER SINAY: Okay. For a second, there, I blanked out on what I was -- where I was, sorry. Not where -- anyway, I wanted to look at Silver Lake -- so further south. There's -- so East Fresno is at negative 17.8 and -- or 17,000 people, I did it differently than you all. It was easier for me to put the numbers.

And then, Tulare is over by 10,00 plus. So I was wondering if you kep -- if you look at the VRA maps that we were given, there's, kind of, a little -- I'll use Commissioner Sadhwani's term, dallop -- dollop -- but it's a different one, the Tulare dollop. And I was trying to figure out if that was Silver Lake. And I couldn't quite -- or sorry, Silver City. So I just wanted to see if we -- if looking at the East Fresno and the Tulare, that border up there, if we can make the
changes needed so that the deviations get a little closer
to zero.

CHAIR LE MONS: Commissioner Turner?

VICE CHAIR TURNER: Thank you, Chair. I lifted my
hand to say this earlier and put it down. But then
Commissioner Toledo brought it up. I really do want us
to talk about deviations because I think the deviations
are fine at four and five. And we've not had this
conversation. I think we're moving a lot and starting to
put COIs into areas that they don't belong and don't have
commonality and may not have to. I know population
equity or equality is like our top, you know, number one,
and we want to do that. But if there is an accepted
deviation, maybe we're trying to move things that just
now will be hodgepodge and won't even fit together.

When we were having conversations about the Central
Valley -- excuse me, that one little area we're talking
about -- and once we move to a different area, we move to
a different conversation. So I don't know about this
jumping.

But the conversation we were having, specifically,
around the San Joaquin and the Stockton area, and what
have you, I do know that the Manteca and some of those
areas that's been cut out, is very close to -- thank you,
Kennedy -- and MALDEF, I think cuts out Mountain House
and Tracy, which I'm not a fan of at all. I like the
visualizations the way that Kennedy currently has it.

And Manteca and Lathrop is very close and similar to
Stockton area, much more so than some of the, you know,
other in -- anyway, I just think it should, perhaps, be
included there.

I did like the idea of Terminus being, perhaps,
moved into one of the other areas if, indeed, that was
the same. And I wanted to name that Elk Grove is very
similar to Galt. You know, they -- Galt is up and
coming, lots of new home development building, et cetera,
which is just like the Elk Grove area, as far as
likeness.

So I think deviations would help in this
conversation. I think, for an assembly, we're starting
to move things that we don't need to move. When we had
the conversation to answer the question about Oak Park,
Oak Park is being cut off from some of the other areas
that I think we've heard similar COI around, Florin and
what have you.

And so again, Fruit Ridge Pocket, Lemon Hill, Oak --
you know, all of those particular areas -- and then have
them up and included with some of the other -- I think,
if you expand in that -- what's that, the north -- the
south part of that up top? What is that, north? I don't
know my direction.

MS. WILSON: Sorry.

VICE CHAIR TURNER: The top.

MS. WILSON: You tell me where and I'll go. I got confused when you --

VICE CHAIR TURNER: Right where your hand is.

COMMISSIONER Fernandez: I think she's referring to Natomas, probably. Yeah.

MS. WILSON: This is up -- oh sorry.

VICE CHAIR TURNER: Natomas?

MS. WILSON: Yes, correct.

VICE CHAIR TURNER: Yeah. And so I think Sadhwani -- Commissioner Sadhwani was talking about, perhaps, even looking at splitting the district and see if we can pull in some other like parts. But Natomas is, again, pretty different from Lemon Hill, Fruit Ridge, Parkway, Oak Park, and some of those districts down there, as well.

So sorry, Chair, I didn't have a direction other than to see we need to start talking about deviations because now I think we're just throwing things together that aren't even similar in what they do.

CHAIR LE MONS: Thank you for that, Commissioner.

No, this is fantastic, actually. I think that organically, we're getting to the place where I wanted
your directions to be specific because it's going to
trigger each other to say, well, wait a minute, why are
we doing that. And we've not done a lot of that. We've
just given the directions for new visualization. So I
think that this is a really good point. So there's about
four -- about three hands raised, we'll get those
comments. Be we're going to be coming up on a break at
4:15. So it might behoove us to have a discussion about
those deviations, particularly if we feel like that's
going to facilitate us moving through the rest of the
visualizations in a way and help commissioners frame
their direction in a way that's going to be more
satisfactory.

So let's take the three, four hands that are now
raised and any recommendations. I'd like to hear
recommendations from commissioners on addressing the
deviation issue.

Commission Toledo?

COMMISSIONER TOLEDO: To touch bases on what
Commissioner Turner said, I agree that the deviations --
that the deviations -- the range of deviations may not
be -- especially for the other assembly -- may be okay,
as long as they're keeping communities of interest
together. But I guess at some point, we're going to have
some communities that are not completely, you know --
districts are going to have some areas that are not
similar to the rest of the district. So we just have to
be -- in order to make all the maps work.

And then I had some specific directions, but that
was just my contribution towards this general
correspondence.

CHAIR LE MONS: Continue with your specific
direction.

COMMISSIONER TOLEDO: So specifically, you're going
to have to do a deviation. On the Merced map, 1-1-0 --
the 45, the CVAP, I actually would like to see this CVAP
a little bit lower. If it -- and it's an if, because it
is a VRA district -- if we can get it -- if we can
increase the Latino CVAP a little bit more. 50.13 seems
a little low to me.

And so if there's a way to increase the CVAP by
reducing the deviation, we do have 23 -- we're over 23 --
by 23,000. So if there's a way to do that in a way that
preserves the community interests that are there, I'd
like to see that. Thank you.

CHAIR LE MONS: Thank you.

Commissioner Andersen?

COMMISSIONER ANDERSEN: Yeah, thank you. I --
again, on the assembly and the Senate, I have no trouble
 whatsoever with deviations plus or minus five. I'd like
it like four seven, four eight possibly, you know, to just give it a little comfort zone for when we really slice and dice things. It's just that congressional districts have to be plus or minus a couple of people. But other than that, yes, because there are other considerations. There's VRA, there's -- it -- just as Commissioner Toledo was saying, and communities of interest. And this is -- gives us our play. The only thing I do think we have to keep -- be careful of if it's -- if they're all plus four percent, then we got a troub -- then we have an issue. So that's -- I just want us to keep in mind that if that's high, this is low, that'll work.

And then I actually wanted to play -- specific directions going -- playing on what Commissioner Turner was saying about -- actually, you can leave it Merced. I agree with Commissioner Toledo on this one. But I'm wondering -- I believe -- is that -- that Ceres right there in the Stanislaus.

If Ceres comes out, does that -- and then we grab a little more population, possibly a little more to increase the Latina CVAP. I don't know if that's a possibility. But that comes out, then going just a little bit further north in the Stanislaus, that would take population out of that.
And going to Manteca, I completely agree with Commissioner Turner, and I'd like to take Manteca out of the San Joaquin. So if we took that out of San Joaquin, but Ceres went into the -- let's see -- I'm sorry. If we take Manteca out of that VAD Stanislaus and then add Ceres from the Merced district into the Stanislaus district, would that maybe a trade which might help population-wise. And it might be able to clear up all three things. That's a -- that's what I wanted to -- if Kennedy might be able to play around with that. Thank you.

CHAIR LE MONS: Thank you, Commissioner.

COMMISSIONER KENNEDY: Thank you, Chair. Just in response to Commissioner Fernandez, Elk Grove, Florin, and Vineyard -- and that's not counting anything else that she would like to add to the Sacramento district. Elk Grove, Florin, and Vineyard amount to more than 272,000 people. That's 55 percent of target population for an assembly district. So you know, I forget who else said it, but I -- I just don't see that as realistic.

And just for colleagues, you know, the populations of California cities, yes, are in the Playbook document. If you need something for something that's not in a city, the Census QuickFacts lookup provides statistics for all
states and counties, and for cities and towns with population 5,000 or more.

So that's -- I was able to look up Vineyard and Florin and get population counts for Vineyard and Florin, which are CDPs, not incorporated cities. So the Census QuickFacts look up facility is going to be very helpful, and the fact that they have data for any Census designated place with a population of 5,000 and more; 5,000 is roughly one percent of the target population for the assembly districts. So it's a handy information source for people who need it on the fly. Thank you.

CHAIR LE MONS: Thank you, Commissioner.

Commissioner Fornaciari?

COMMISSIONER FORNACIARI: Yes. So with regard to deviation, let's see, I'm fine up to -- you know, the "safe harbor," we've been told, is plus or minus five percent, and I'm fine with that, in general. But I think we need to also look at it in totality. Because if we have five adjacent districts that are 5 percent over, that's 25 percent of a district that we're shorting the people of those -- of that area.

And so you know, I think -- you know, I think, initially, these big swings are fine, but I think we really need to understand the impact of it and acknowledge and recognize what the impact of it may be.
That's all.

CHAIR LE MONS: Do you have a recommendation, Commissioner Fornaciari?

COMMISSIONER FORNACIARI: No. Well, I just think that, you know, once we get a little closer to being comfortable with our maps, I think we need to just take a look and see where we're at. You know, I mean, we've got -- we've got this whole line of districts from Stanislaus up through Sacramento that are all over. And so you know, I think I begin to be uncomfortable if we -- we had a bunch of districts all together that were all over, because we're -- we'll be underrepresenting those folks.

So I don't have a specific recommendation other than, just let's make sure that we take a look at it as we go.

CHAIR LE MONS: Okay.

Commissioner Fernandez?

COMMISSIONER FERNANDEZ: Thank you. I -- yes, I was looking at those deviations too. We must be on the same subcommittee or something, finance.

And the way I was approaching it when I was reviewing the information last night, is I was, kind of, looking at it by area. Like L.A. As long as it balanced out, they have the -- you know, they have the
representation. So that was, kind of, cutting up the state to ensure that there wasn't, as Commissioner Fornaciari said, you know, six neighboring districts and they're all over, or they're all under -- maybe they're overrepresented, right. So that's -- I was, kind of, looking at it by area. You know, once you go to one area to the next, make sure that there is fairly representative as possible with districts. Thanks.

CHAIR LE MONS: Thank you.

Any additional comments on this before we move forward? It sounds like people are ready to -- I mean, I'm still feeling like there's a general guidepost as it relates to deviation and something more specific can be forthcoming. That's my read on the feedback I've heard so far.

My recommendation will be to -- in -- and -- in your giving your direction -- I keep emphasizing direction -- but to really think about the implications of the direction that you're giving. And have all that consideration set come into your direction prior to giving it, because at this point, things are at a place where you have to -- it's not just one or the other, as some of the earlier visualizations focused on particular things.

Now it is balancing a little bit more. So I just
encourage commissioners to do that as they think about
the direction they're going to give as we're starting to
narrow this down.

Commissioner Andersen?

COMMISSIONER ANDERSEN: Yeah, thank you, Chair. I
did have one other comment that, in terms of the
Sacramento area, and -- was -- I liked that Commissioner
Sadhwani brought up the fact of Natomas, which is up the
north part of that Sacramento area. That could go,
actually, into a district with what is east of it. The
North Highland, the Rio Linda, that section. So
especially grab the area from Florin, Vineyard, Elk
Grove, looking at the downtown area of Sacramento. And
then is one district. And then the Natomas area north
and going east into that blue, is another district in
terms of, you know -- within this area, rearranging where
those district lines are a little bit, which might
actually help alleviate the communities of interest
issue. And also might help alleviate some of the
shifting population issue.

So I was -- I just wanted to uplift that -- agree
with Commissioner Sadhwani on that one. And thank you.

CHAIR LE MONS: Thank you.

Any other comments?

So we have about seven minutes before the break. So
we could either take our break early or we can move on.

MS. WILSON: May I ask a clarifying question?

CHAIR LE MONS: Absolutely, Kennedy.

MS. WILSON: So as far as the north goes, how --

I'm -- you didn't say much about it, so I'm not sure if you like the way it was because with this shifting things north, I do think that -- you know I was told to keep Lincoln out, but maybe it's -- Lincoln has to go back in or -- I just don't know if you like this and I wanted to know as far as -- I don't want to come back with the same thing if you don't like it, or if I can keep it roughly the same, then that is something I would like to know?

CHAIR LE MONS: Thank you, Kennedy.

Commissioner Sinay.

COMMISSIONER SINAY: This kind of -- it connects a little bit to what you were just asking Kennedy, as well as the conversation on deviation. Plus or minus five percent sounds great when we're talking about big cities, but I was looking -- you know -- most of the Far North is at negative. So it's -- you know -- and when you're looking at the -- what plus or minus five percent is, in some of those -- you know -- in some cases, it's almost the size of a county -- you know, up here, but also, you know, it is the size of cities. And so I'm not sure how I feel about plus or minus five percent. I think it's --
it's -- I would rather see it be smaller than that for
the deviation. And maybe we get to a smaller size. But
I want us to really stop and think what does that mean up
in this area because, you know, right now, it feels like
it's easier just to say plus or minus five and go on to
something else versus really thinking through this area
and looking at and it and saying okay -- I mean, it's
this whole area except for the -- the North California is
all at negative.

CHAIR LE MONS: Okay. Thank you. Commissioner
Fernandez?

COMMISSIONER FERNANDEZ: Yes. Kennedy, if you were
referring to the NorCal Oaks -- the NorCal and Central,
I like how it's looking. How's that? Is that good
enough feedback? And I will -- I will say, as you move
into the more remote areas, if you try to get closer to
zero, you're going to really group some communities that
are physically far apart from each other because, as
Commissioner Kennedy said, the census information will
give you, I guess, incorporated areas of 5,000 or more.
I mean, that's -- I don't know if anything from the north
would pop up honestly. I know my town's not going to pop
up for sure. So I can see in the far, Far North, you
know, talking Tehama, Humboldt, Plumas, north, you may
have a higher negative deviation because it's really
difficult to try to grab some communities that really do have some sort of similarities. Granted, at some point, we have to make those decisions, but I'm just trying to explain why you'd have some of the negative numbers.

CHAIR LE MONS: Thank you, Commissioner.

Karin?

MS. MAC DONALD: Yeah. And thank you, Chair Le Mons. I -- I just wanted to highlight the fact that as, you know, you narrow your deviations, you're going to have more splits, obviously. And also that next -- next week once we go into live line drawing, if you want to work with us live on some of these tradeoffs and actually move some population around, maybe just even ripple some population from, you know, one area to the other, to equalize the population, that is certainly something that we can try to do. As I said to you last week, there has not been a whole lot of time to work on these maps. And you know, some of these deviations reflect that, but the deviations also reflect your direction. And at this point, we really haven't had that opportunity to really go into the nitty gritty and the very small little direction pools that result from the general architectural changes. And again, that's what next week is for. Thank you

CHAIR LE MONS: Thank you.
Commissioner Andersen?

Comissioner Andersen: Yeah, thank you, Karin, for that because I was going to say that this -- these maps really do, in many areas, reflect what we try to see, which gives us the idea of, like, okay, now we can play with that. And I -- just for Kennedy, on this, I do appreciate your architecture on this area which you are trying to do. I think you will get a little bit more help as we get into what we want to do with Lake Sonoma, Yolo -- that area -- in terms of there might be a little few changes, which might give you a little better direction. So there's more to come. Thank you.

Chair Le Mons: Thank you, Commissioner.

Comissioner Sinay: Thanks. I feel like I'm the only one who's not quite getting this deviation question. For me, if we say, okay, it's all right in the rural areas to have negative deviation and the urban areas to have positive, then we're saying that the urban areas are under-represented, and the rural areas are over-represented. I mean, at some point, if you have a negative somewhere, you're going to have a positive somewhere else. And therefore, I'm not okay saying, well, you know, and these areas, they're rural. It's okay to have that and we'll -- we'll make up for it in
the urban areas. That's part of the problem with
representation right now throughout. And -- and so I,
unless I'm totally not understanding deviation, which is
possible, I really think that we need to not say it's
okay in one area and not in another. But that we have to
be a little bit more consistent. Because earlier, we had
said, well, I was looking at LA, and if LA -- it -- you
know -- it all equals out, then I feel okay. But now,
I'm looking up at the Far North and yes it's all rural,
and it's not getting to zero. And I'm not okay with it.
And so I just -- I don't want us using different values.
I mean, I know we need to be flexible, but I don't think
we can use different values, especially when you think
about who the populations are in urban areas, and that a
lot of our VRA communities are in urban areas. I would
really like us to -- you know -- we need equal
representation and fair representation. That's why we
were put on this Commission.

CHAIR LE MONS: Thank you, Commissioner Sinay. And
you guys can ponder the comments. Commissioner Fernandez
and Karin, we'll come to you right after the break. It's
4:15. We will go on a 15-minute break, and we will be
back at 4:30.

(Whereupon, a recess was held from 4:15 until
4:30 p.m.)
CHAIR LE MONS: All right. Welcome back, everyone. I hope you had a nice break. I'd like to pick up with our feedback and questions from Commissioners. We left off with Commissioner Fernandez.

Commissioner Fernandez, the floor is yours.

COMMISSIONER FERNANDEZ: Thank you, Chair. I just wanted to respond to Commissioner Sinay. In no way did I say that it was okay for the North Area to be lower. I was explaining why it probably was. Because rest assured, I will be looking at California by areas to make sure that it does balance out, because that is the only fair way to do it.

CHAIR LE MONS: Thank you.

And Karin, you had your hand raised before the break.

MS. MAC DONALD: Yeah, thank you so much, Chair Le Mons. I also wanted to weigh in on that. There is no policy to, you know, overpopulate one area or underpopulate another area. This is basically just the way it's worked out as we're following your direction based on, you know, what you want to split or avoid splitting, what you want to move where. So this is kind of where those tough decisions that Commissioner Sinay was talking about earlier may be coming in. Just basically, about how to move that population. And you know, if you wanted
to move population into a particular area and ripple that up, then that's going to require making some decisions that you haven't made before. And again, we're happy to do that with you next week, or if you'd like to give direction now, of course you can do that also.

Thank you.

CHAIR LE MONS: Thank you.

So with that, if we don't have any additional questions for this particular area, I'd like to move to the next area.

Karin?

MS. MAC DONALD: Yes, thank you so much. So we will be switching screens and we will be moving on to Tamina, please. And I believe Tamina's going to -- if you'd like to pull up your pages -- Tamina's going to start with page number 55.

Tamina, is that correct?

MS. ALON: Correct. Good afternoon, Commissioners. We will be starting with page 55, which is Bonsall.

CHAIR LE MONS: Okay. Feel free.

MS. ALON: Thank you. So Bonsall is the one VRA consideration visualization that I have for my area. This is the San Benito and Monterrey County area. I'll turn on the county lines here. And you'll see the CVAP that is posted here -- the first one is 51.10 percent
Latino CVAP, 1.80 percent Black CVAP, 7.64 percent Asian CVAP, 0.75 percent Indigenous CVAP, and 37.74 percent White CVAP. I will put up the existing District lines so you can see the current District, which comes over here and then south to the line of Monterrey County. And I will invite Mr. Becker to please comment.

UNIDENTIFIED SPEAKER: And Tamina, would you be able to pull up the deviation also, please? Thank you.

Commissioners, you just saw the mapping program works because you could see them — the menu box working. This is usually what's happening in the background. So this is how the deviations make it on a map.

Thank you, Tamina —

MR. BECKER: (Indiscernible) —

UNIDENTIFIED SPEAKER: -- (indiscernible).

MR. BECKER: Yeah, thank you, Tamina. I don't have much -- much comment here. I would just point out there -- this is at a negative 3.15 percent deviation which gives you a little bit of ability to pull in additional -- actually, a significant ability to pull in additional population if you want to, to change the configuration of this District. Obviously, this is an attempt to build a Latino opportunity district consistent with VRA considerations.

CHAIR LE MONS: Commissioner Fornaciari, did you
have a comment?

COMMISSIONER FORNACIARI: Yeah. Let's see. Last time this came up, I asked about including the rest of Salinas Valley down to King City. And you said you had looked at it, but it brought the Latino CVAP down. Can you let us know what that would wind up being if you -- if you did do that? I mean, it looks like we have some room to add some folks. So if you Could do that and let us know what the CVAP numbers would look like if you added that. I would appreciate it.

MS. ALON: Would you like down to King City, or did you want to go all the way -- how far south should I go?

COMMISSIONER FORNACIARI: Well, I was thinking King City.

MS. ALON: King City? Okay. And is there a LCVAP percentage you would not -- that you would like me not to dip below?

COMMISSIONER FORNACIARI: I just would like to understand what it would be and what the tradeoffs are.

MS. ALON: Okay.

COMMISSIONER FORNACIARI: Thank you.

MS. ALON: No problem.

MS. MAC DONALD: Would you like to move on, Commissioner? So should we zoom out?

CHAIR LE MONS: Hold on one second please, Karin.
Commissioner Toledo?

COMMISSIONER TOLEDO: Yeah, just to piggyback on Commissioner Fornaciari. If we could reduce -- if there's a way to reduce the deviation closer to -- to zero, and then -- or -- yeah, closer to zero, so that we can get some of the farming communities in there and raise the Latino CVAP. I wouldn't want to go below 51 percent. I would want to increase it.

MS. ALON: This is --

CHAIR LE MONS: Thank you.

MS. ALON: -- highest LCVAP that you're going to get in this area, if you go down that area. You can go into other areas, so outside of San Benito and Monterrey County, if you wanted to explore other areas, we can explore that. But unfortunately, any -- this is the highest LCVAP that I could get in this area. Even adding, subtracting population within the deviation allocations.

COMMISSIONER TOLEDO: That would help.

MS. ALON: But I'm still happy to make the visualization.

COMMISSIONER TOLEDO: And that's helpful. Thank you.

CHAIR LE MONS: Commissioner Sinay?

COMMISSIONER SINAY: Thank you, Chair. I guess I
was looking at the Merced, West Fresno, and Bonsall. And it -- because we had talked about Merced also being -- you know -- we would like to see Merced pull up -- be pulled up a little bit as just -- as well as Bonsall. And on the -- and you know, West Fresno and Tulare are higher. I don't know if there's a way to kind of get the CVAP a little -- you know -- just see -- explore ways to get the CVAP a little higher on those. You know, looking at the farming communities, I know that they're different farming communities. I know that there are some geographic boundaries. But if we can't -- if it doesn't work to go south, then maybe looking at the ones that are kind of over the deviation.

MS. ALON: Happy to do that.

CHAIR LE MONS: Commissioner Akutagawa?

COMMISSIONER AKUTAGAWA: Yeah, I'd like to see. If you were to remove Morgan Hill, add Morgan Hill to Gatos bank, one, would the removal of that -- you know -- increase the Latino CVAP? Also, is it an option, because I noticed that the Merced visualization has a 4.78 percent, I guess, over deviation. And so is it an option to pull in some of that? And so I'd like to see if by increasing or taking in a part of Merced into that San Ben -- or Bonsall deviation, if that would also, one, bring in some additional population and also would it
increase the Latino CVAP? Thank you.

CHAIR LE MONS: Commissioner Andersen?

COMMISSIONER ANDERSEN: Yeah, thank you. Tamina, could we actually -- that's a great spot right there. Could we -- could you turn on the terrain layer, here? Because I think that might give us an idea of what's really possible or not. Thank you. And are there -- without getting into too much, can you get a little bit more of the roads, or was that -- you know -- I'm looking for, like, the next level down from -- just right now, we have just the I-5s, you know -- yeah. Could -- are there any roads that go from San Benito over into the valley? And can we go a little closer?

COMMISSIONER FORNACIARI: 152 does --

COMMISSIONER ANDERSEN: Yeah --

COMMISSIONER FORNACIARI: But it's a little north.

COMMISSIONER ANDERSEN: Yeah, can you go up a little north, please, to see -- to see that? Oh, thank you. Thank you.

CHAIR LE MONS: Tamina, I'm sorry -- Tamina, are you waiting on me?

MS. ALON: Yes, Chair.

CHAIR LE MONS: Oh, just continue. Yes, I'm sorry. You may continue.

MS. ALON: I don't want to rush anybody. Okay.
Well, that is our one potential VRA consideration District in this area. And so if you will give me a second, I will change the labels, which you have seen me do before. I apologize for that messy process. And you can -- you can now --

COMMISSIONER ANDERSEN: Tamina --

MS. ALON: -- (indiscernible) --

COMMISSIONER ANDERSEN: Could I ask one quick thing on this? I apologize I didn't ask before. Is all Watsonville included in this VRA?

MS. ALON: Yes. All of Watsonville is included. There are no city splits in this visualization.

COMMISSIONER ANDERSEN: Okay. And do we have -- you know -- as we were saying, the outs -- like -- what is Commissioner Kennedy's term for the areas around a smaller city? Would that -- would that -- if you could look into that unincorporated area up there, if any of that's part of the greater Watsonville area to add into this Bonsall, please. Thank you.

MS. ALON: I'm sorry. So you would like this unincorporated area to be included --

COMMISSIONER ANDERSEN: Could --

MS. ALON: -- or that --

COMMISSIONER ANDERSEN: -- could you look --

MS. ALON: -- or looking --
COMMISSIONER ANDERSEN: -- at that as -- as far as when you're looking at the -- for a VRA with the -- the criteria that Commissioner Toledo gave you, if that might help. Thank you.

MS. ALON: Okay. Would it be helpful for me to recap the things I've been asked to explore at this point?

CHAIR LE MONS: Yes, please, Tamia. I'm sorry, Tamina.

MS. ALON: There's actually someone in my office called Tamia, and it is very confusing. So I have been asked to explore for Bonsall, first the ability of adding along the freeway down to King City, so taking more of the Monte Coast area here in order to reduce this deviation to see what else CVAP looks like over there, and if there's a way to increase the LCVAP in that area. I have also been to take a look at this area of Merced and taking -- the possibility of taking out Morgan Hill and trading for some areas in Merced or some other possibly high LCVAP areas that are in Kennedy's area. And then, I have been asked to take a look at the surrounding areas of Watsonville -- of greater Watsonville, which, zooming in over here, these white areas right here, to see if those are able to increase the LCVAP.
COMMISSIONER ANDERSEN: Could I just add, also that
Las Lomas area is not just Watsonville, but that
little -- that area right through there. If there's --
if that would help for that same criteria. Thank you.

MS. ALON: The Watsonville unincorporated areas and
coastal areas. No problem.

CHAIR LE MONS: Commissioner Akutagawa?

COMMISSIONER AKUTAGAWA: I just want to add
clarification for Tamina. My request to look at parts of
Merced to add to the Bonsall, that also is on top of what
Commissioner Fornaciari asked about trying to bring in
more of that farming communities down below -- up to King
City, he said.

MS. ALON: I'm doing those too. Thank you very
much.

CHAIR LE MONS: Commissioner Sadhwani?

COMMISSIONER SADHWANI: Yeah, I was just wondering
if we had received a number of communities of interest
testimonies from this area. I don't know if those are
loaded into this map. But it would be helpful for me to
see them. Places that are being referred to as Pajaro
Valley, Lompoc Valley, and Santa Clara Valley. I don't
actually know exactly where those regions are. But
I guess I'm just trying to understand if they are or are
not included in this visualization. My guess is they're
more local terms for a broader region?

MS. ALON: There are actually two areas of Pajaro.

COMMISSIONER SADHWANI: Uh-huh.

MS. ALON: There is Pajaro City, which is in this green visualization. It's actually right south of Watsonville. And then there's Pajaro Dunes, which is another city that's on the coastline. So we actually have COI that refer to both. And so they are whole in both of these areas. The COI that I have loaded are all whole in this area. And if you would like me to look into creating a visualization that has all of them on it, then I'd be happy to do that.

COMMISSIONER SADHWANI: Yeah, if you could. I mean, it doesn't have to be right now, but it would be helpful for me just to see exactly where those areas are and if we're incorporating that at testimony. Thank you.

COMMISSIONER FORNACIARI: So Chair, I'm sorry to barge in here, but the Pajaro Valley is right there by Pajaro, California. The Lompoc Valley is down near Lompoc, California in -- what is it -- San --

MS. ALON: Santa Barbara.

COMMISSIONER FORNACIARI: -- Santa Barbara County. And the Santa Clara Valley -- the Santa Clara River Valley is the -- the river valley with Piro and Piru and -- you know -- that goes with -- in Santa Ventura
County.

MS. ALON: Got it. So those wouldn't be all be kept together but that's what the -- in any case, that's what the -- I'm looking at it as -- as something that's suggesting keeping them together. But that -- that's a really long area.

COMMISSIONER FORNACIARI: Right. They -- yeah --

MS. ALON: I --

COMMISSIONER FORNACIARI: -- they just -- those were the three areas that (indiscernible) was focused on --

MS. ALON: Correct.

COMMISSIONER FORNACIARI: -- or the coast, yeah.

MS. ALON: Okay. Thanks so much, Neal.

CHAIR LE MONS: Commissioner Sinay?

COMMISSIONER SINAY: Looking at, again, this input that we just received on this one from the public, the first question -- and I know we haven't done Santa Cruz yet, but is Santa Cruz split in three districts?

MS. ALON: Yes. I'll tell you where that split is. We have the areas of Santa Cruz, which you directed to be with the agricultural areas. So Interlaken, Watsonville, Amesti, Freedom, and -- come on, label -- Aptos Hills-Larken Valley over here.

COMMISSIONER SINAY: Okay.

MS. ALON: And then, there were the coastal
communities, which you requested to keep with the coast from Pleasure Point down through Rio del Mar, La Selva Beach, and Pajaro Dunes --

COMMISSIONER SINAY: Okay. All right.

MS. ALON: And then, there are the inland areas that you requested -- for example, Santa Cruz to stay with Los Gatos, so the Highway 17 corridor over here.

COMMISSIONER SINAY: Okay. So that's a lot of different districts for a small little place. But this -- this public -- talking about Watsonville, you know, they said that Watsonville and Salinas, Capitola, Rio del Mar and La Selva actually will have a lot in -- in common be -- along with Santa Cruz because they're building some transportation corridors in that area altogether. So just -- just throwing in a little -- another way that people are looking at this area. Thank you.

CHAIR LE MONS: Thank you, Commissioner.

Commissioner Turner?

VICE CHAIR TURNER: Thank you. I think the only added point I wanted to add in, Tamina -- I like the visualization and to understand the split. I do know that Santa Cruz, Monterrey, down to Pajaro Dunes and what have you -- they want it to be in one area. And very similar in the -- you know -- who comes down as far as
all of the -- the visiting and the B&Bs and the coast and
all of those piece -- parts, they all seem to me to be
the same community. And the splits -- it is only sixty
some thousand people there, but it absolutely makes sense
in how it's split out. And it's supported by different
COI testimony that we've received.

CHAIR LE MONS: Okay. You can continue, Tamina.

MS. ALON: Thank you, Commissioners. That was very
helpful. We will return to our skinnier labels which
just have the deviation on them. And just to let you
know, we're going to walk through these in regions
because the different direction that I received last week
shifted a lot of things between different visualizations.
So we're going to do a little bit of an overview and then
talk about them altogether and then go through them
individually. Just a note before we start, that the
deviations in these particular visualizations reflect the
sizes of the cities that are in there. I tried not to
split cities and counties as much as possible per
direction. And so if there was a city that could be put
into the visualization, but then would overwhelm the
deviation and I'd need to split it, then instead, it
might have been kept out. So I'd be happy -- if you
would like to change a deviation -- to look into the
splitting of a particular city that you would like to
name. Happy to do that. But just wanted to let you know that that was a little bit behind with the methodology I was working on.

So the first region that we're going to look up here is our North Coast area. And you -- we will start -- well, before I go to the page numbers, let me say that the ripple effects that you're going to see that had effects on the movement that we just talk -- or that we just are going to look at today, can't -- come in a couple different pieces. So first, they are this Coast and Northern area, which kind of ripples through itself, that we'll talk about. And what you talked about -- had me look at last time -- was taking a look at moving Lake in -- out of this North Coast District, trying to make some wine area agricultural districts. Taking a look at creating an area for the delta. And possibly a second wine-ish area or second area of agricultural importance. And so all of those rippled through these areas. And so we will talk about each of those.

And then, the second area is really the East Bay. And so the East Bay is from -- from the delta along here, the waterway, to the Bay Area going down. And so all of the districts' visualizations that are in this area had a ripple effect on each other. The primary pieces around here being the -- the Oakland piece -- keeping that
whole. Looking at the Delta District. And then, looking at Tri-Valley. And those have all ripple effects on each other down through really (indiscernible) Rock and coming around the corner.

The third piece is starting in San Francisco and coming down at -- through this area, the peninsula. Whenever one of these are moved, another one will ripple and move as well. So some of them, for example, you'll see that the name might be a little off, and it might not exactly encompass what's in it. And that's because that's the name of what it was in the previous visualizations. So you can follow along and say, well, how did this District change over time? And you can take a look at it and say, well, this -- you know -- this used to have this in it and now it's the name, so I know that it had something different.

And then, the last area that we're going to look at -- because we've already looked at our Bonsall area, is our South Coast. So taking a look at how the population and ripple has affected Ventura, Santa Barbara, San Luis Obispo, and Monterrey Counties.

So with that, I will go back up to the top. We are going to start in the North Coast. And this is page 11. The North Coast that barely fits on the screen here. So we start with the North Coast, page 11. And the
difference between this and the previous North Coast
iteration -- we still have Del Norte, we still have
Humboldt, Mendocino, Trinity. We still have the little
Humboldt square taken out to the current tribal areas
together. We still our areas of Sonoma. But what was
changed in this iteration is, the Commission requested
that Lake be removed from this coastal area and moved
toward an inland area. And so Lake was taken out of this
visualization, and it was swapped down with the coastal
areas of Marin County.

This then has effect on the next one, which is the
(indiscernible), and this is page 16. So page 16 --
I'm sorry, I'm zooming out just so you can see what we
used to have. We used to have Vallejo and Benicia in
here. And I was instructed to take Vallejo and Benicia
out of this visualization. And so that was traded for
actually taking Lake back in and taking in the West
Sacramento area -- whoops. Zoom in over here -- right
over here. Of Yolo County. So this is the first of the
agricultural re -- agricultural slash wine slash growing
regions where you requested Lake to be with Napa. That
also incorporates some areas of Yolo that are highly
agricultural as well as areas east of the freeway, which
have been noted as the wine areas of Sonoma.

That then brings us to page 17. This is Solano.
What was requested here was that part of Yolo, at least, be with Solano. And so those two are together in this visualization. This is our Delta area visualization, so we have the areas of the Sacramento Delta, Isleton, Rio Vista in this area, as well as the lower part of Yolo. And then, Solano County is actually whole in this visualization now that it has Vallejo and Benicia back. So this is -- Solano is whole in this area. Another thing that is different in this area is that there was no Elk Grove. Elk Grove has been taken out and returned to Kennedy's areas. And that completes this Solano visualization.

Which also affects this last one in our region, which is Sono-Marin, and this is page 31. So I was instructed a couple of different things for Sono-Marin. One was take a look at the inland versus the coast when it comes to Sonoma County. Really moving the inland parts closer in with the wine and agricultural reason -- regions, and keeping the coastal areas together. And so I was able to do that. I was also asked to look at reducing the number of splits in Santa Rosa. You'll recall there were a few splits in Santa Rosa in the last visualization. This one keeps Santa Rosa whole, including all of Santa Rosa's tiny little satellite unincorp -- noncontiguous areas that are unattached over
here. That's what all of these little pieces are here. So those are all little pieces of Santa Rosa. So Santa Rosa is actually whole in this visualization. And with Santa Rosa's large population, that's why we have a smaller in geography district. But this comes down through the more urban areas -- more city areas of Marin County all the way down to Sausalito. This also allows the Sonoma-Marin areas that COI testimony has put together to be together in this visualization.

We're now going to move to the East Bay visualizations. The East Bay visualizations started from a priority list that I requested last time that we spoke about. The first was to take a look at how much we could keep open together. Unfortunately, Oakland is larger than an assembly district, and so there had to be a split in Oakland here. But taking a look at where Oakland was, taking a look at this Delta area, and then, taking a look at the 680 Corridor which leads down to the Tri-Valley. And so that's what informed the construction of these districts.

So we will start with East Bay, which is page 32. So East Bay begins right south of Hercules, so this is Pinole, California. This census block is water and is attached to here for some reason. And we are coming down through El Sobrante -- Tara Hills. The east and west
Richmond, north Richmond, San Pablo, El Cerrito, and
Knightsen -- sorry -- Kensington, all the way to the
county line. This encompasses the greater Richmond COI.
You also asked me to keep this -- this Highway 80
corridor together and to bring it down through Albany
Berkeley into Alameda County. And so we did that. We
created a -- a western district here which includes
Alameda, Berkeley, Emeryville, Piedmont, and communities
of Oakland, mindful not to split several communities of
interest that we have right up in this area of Oakland.
This is the Oakland -- oh, sorry. I keep forgetting
page numbers again. This is Oakland page 21. Actually,
let's do -- I'm sorry. Let's do 22 first. That's on my
list first. 22 is RODUBLIN. And the reason I want to do
this first is just to show you where this was
particularly cut off. We have a 1.59 percent deviation.
Unfortunately, we could not add in any of these cities
without going over the five percent. So that's why you
have this break here in West Contra Costa County. So
Hercules, Rodeo, Crockett, Port Costa, are going to join
the 680 Corridor that goes from Martinez and Vine Hill,
and then, comes south through the 680, including the
Lafayette Orinda Moraga area, keeping all the COIs in
this area intact. And then coming south Alamo, Danville,
San Ramon, and Dublin. Wanting to keep Pleasanton and
Livermore together with this whole area, but unfortunately could not fit in the assembly district. And so went ahead and stopped there instead of splitting Pleasanton. We're actually pretty close to five percent here. And then, there was direction not to go over the Oakland Hills and to keep them with more of the Eastern Con -- the -- mid -- sorry -- Central Contra Costa area. And so those census areas were incorporated with this visualization instead of with Oakland, in order to preserve that Oakland Hill line.

Next, we will go to Oakland which is page 21. Actually, I'm sorry. Red and red. Let's do east first. They all touch each other and they all ripple through each other, so I -- they all -- I want to talk about them altogether. But let's do East Contra Costa first. This is page 34. Just so I don't forget to go back to it. And I love East Contra Costa. So East Contra Costa has a long -- so here is the water line. This is the county line for Contra Costa and the break between the Delta area of the Solano District that is up here -- the Solano visualization. So we are following Highway 4 from Concord through Bay Point, Pittsburg, Antioch, all the way to the county line. We're also following south all the way through Byron, taking all the unincorporated more rural areas of Contra Costa County down to the county
line in this visualization as well. And then, we also have unincorporated areas coming into San Joaquin County. However, none of these areas are within a particular census designated place or city. They stop short right before they get to the Lincoln Village, Stockton area. So none of the cities are split in this visualization. These areas are all unincorporated and are pursuant to COI testimony that we had that these more eastern areas -- east of Contra Costa, west of Stockton, wanted to be with the East Contra Costa region.

And now page 21. I will go to Oakland. As I imagined, Oakland is -- the majority of Oakland is in this visualization. Keeping mindful of the split, which is along the freeway. And keeping intact several communities of interest which were in this area. Alameda City is also whole in this visualization, as is San Leandro City.

The next visualization is page 20. And this is Alameda. What is different here from what you've seen before is that you requested that I take a look at what not going into Mountain House and Tracy would like for this area. And so without that population, while we're able to pull in -- or we would -- we had to pull in some of this West Eden area. And so this is Livermore, Pleasanton, Sunol, along with Castro Valley, Hayward,
parts of Union City, and the smaller unincorporated areas
which are all intact. I did try to do a Livermore,
Pleasanton, Dublin, up to San Ramon area, but then that
would split open further and break some of the COIs over
there as well as a few COIs in Contra Costa. So I
elected to keep it this way but happy to explore further
visualizations. So that's the effect of the Mountain
House Tracy move.

We will go down to Freemont, which is page 29. This
visualization has a split in Union City. This is purely
for population purposes. And has which -- because we got
through .57, if there's another line which you would
suggest for this to be split along, then happy look at
that. Currently, it is just following city streets
because there is -- oh, I'm sorry -- city streets and
there's one COI which kind of cuts off along here. But
if you would like me to explore other areas with that, I
have a little bit of deviation room for that. This takes
all of Fremont City including Newark, which is
incorporated. Takes Milpitas City and the Berryessa
area. There are a ton of COIs right in this area, and so
it keeps many of them together. I believe one comes down
a few blocks lower into Alum Rock that was not able to
kept there for population.

We'll go to page 24, which is Alum Rock. Sorry,
zooming out. There we go. Okay. So Alum Rock starts
with Alum Rock, which is right up here. It's a
neighborhood in San Jose. But as you can see, it
incorporates all of eastern Santa Clara County. So this
whole area here, which is lighter colored, is not part of
the City of San Jose. The darker colors are parts of the
City of San Jose, which has over a million people, and
has very little population in this. And so that's why
you're getting this shape as it is. Alum Rock keeps
intact several communities of interest in the downtown
area right along here, and the several neighborhoods of
San Jose including the downtown COI itself, the Japantown
COI and several others that were submitted. So those
were all put up. That's where this line between Fremont,
Alum Rock, (indiscernible) and Gatos bank came out of --
was really putting all those COIs up and trying to make
sure that we kept as many of them whole as possible. And
I think we actually kept most, if not all of them, whole.
So Alum Rock includes those neighborhoods of San Jose.
It doesn't go into any other cities. San Jose is split
for population.

Now we will go to Gatos bank which is page 23. Uh-
So Gatos bank, I was instructed, this is -- Gatos bank,
it sits at the intersection of where the East Bay
community population ripples down to and where the
peninsula population ripples down to. So I'll talk a
little bit in a second about what that looks like and how
that's affected things. But it's really a -- it really
is where these two areas come together. And one of the
main things in this area that you'll see is that this is
the Santa Cruz area that we just looked at. Keeping that
Highway 17 corridor together, I was requested to take
Santa Cruz and Los Gatos and make sure that this Highway
17 corridor was together. And so I was able to do that.
And when the Commission was looking at this last week,
they were looking at it with the rest of the peninsula
area. So we're going to go up there. And they said --
and what I was instructed was, take a look at doing --
moving those two together, and in exchange, take a look
at the line up in Redwood City and see if you can move
that. So this actually rippled upward in order to try to
accommodate both of those directions. So starting in
Los -- Los Gatos and connecting that with Santa Cruz, we
are able to even the population out by taking out --
taking some areas of San Jose over here, again being
mindful of these COIs, and putting Campbell in with Palo
(indiscernible) District.

So now we're going to go up the peninsula to page
25. We'll start with East San Francisco. And the
direction that I had for East and West San Francisco. So these maps are going to be on page 25 and 26, East San Francisco and West San Francisco, and we can talk about them together because the direction that I received affects them both. And the direction that I received for this area was to take a look at Seacliff and Presidio, and move them over into the east side of -- Presidio Heights, rather -- moving them east to make sure that The Haight was with the Castro over here in the center, moving west of Twin Peaks to the Western San Francisco and moving Bernal Heights west into the Western San Francisco. So that's changed this line where this area is split in San Francisco. The neighborhoods here are all intact, able to keep them whole, and so the lines that you are seeing will reflect those neighborhood boundary lines.

The southern part of West San Francisco remains the same as you saw before. It has Daly City, Brisbane, and Paloma and stops right before the South San Francisco line.

Which brings us to page 27, which is SMATEO. If you recall, the last time that we saw S Mateo, we had to stop on the freeway over here -- a line. And there was PALORED as a -- as a visualization district on the east side, and then, we had a coastal area on the west side.
And I was instructed to -- instead of using that freeway as the line, keep San Mateo with San Mateo, including the coastal areas, and to shift the other districts south accordingly. And so that was what was done for San -- this SMATEO District. And as you can see, that comes south to the SMATEO County line -- the San Mateo County line, sorry -- and stops short of incorporating all of San Mateo County sheerly for population.

Next is page 28. And this is the PALORED District. As I mentioned, this district used to be farther north, and it shifted south when this population was moved out. Remember, we grabbed some population over here in order to put Los Gatos with Santa Cruz. We moved up San Mateo in order to take in the more inland areas. And so this visualization district has shifted south. And it was actually very close to what the Commission directed. The Commission said take a look in Redwood City, and that's exactly where we came down to. So Redwood City is whole. And this -- well, that's pretty much where the line ended up being for population. And so this PALORED District starts in the Emerald Hills, North Fair Oaks, Menlo Park area, takes the rest of San Mateo County, and then, comes over into the beginning of Santa Clara -- excuse me -- County, starting with Palo Alto and Stanford and Mountain View, coming south and taking Saratoga and Campbell.
Next is page 30. And this is LEXSUNNY which is a perfect example of what I said before about how some of these are named for pieces that are no longer in them. LEXSUNNY used to be Lexington to Sunnyvale. And per Commission direction, we've moved some things around and this no longer the configuration; however, Sunnyvale is still intact in this District visualization along with the COI of Sunnydale, Santa Clara, and Cupertino. We also have the northern area of San Jose City. The areas of Burbank and Fruitdale and some other areas of San Jose and unincorporated areas of Santa Clara County. So that's the Peninsula and the East Bay.

We will move down to the coast -- the mid-coast. And in this case, the Monte Coast, which is on page 56. And it requires me to zoom out a lot. Okay. So Monte Coast, as you saw before, has Monterrey County, a piece of the Santa Cruz County which we've already looked at, which wanted to be with the coastal areas -- comes down through Monterrey, except for the Salinas/Prunedale area up in the north which has gone with the Latino Agricultural District, and exploring down to King City, as mentioned. The Monte Coast District goes down into San Luis Obispo County and almost takes all of San Luis Obispo County but stops short for population. The request that was made last week, as I zoom in -- I
apologize, was regarding Arroyo Grande. Arroyo Grande was with the more southern visualization. And the request was to move Arroyo Grande up north and keep it with San Luis Obispo. So now, we -- this has been incorporated -- Arroyo Grande has been incorporated with the Monte Coast visualization.

And we'll go to page 58 which is S. Barbara. So the trade in S. Barbara was that this area down here in Southern Santa Barbara used to be with the Ventura District. And the request was to see if we could pull in and make Montecito -- at least through Montecito whole with Santa Barbara County. So we had cut off right about here and so the request from the Commission was to take in Montecito and to the extent possible, come down to Carpinteria. And so these areas of Santa Barbara County are intact and together with Santa Barbara in this visualization. The trade for this that was requested of me was to look at East Ventura County and take Moorpark and see if that could be an even trade.

So I will zoom out a bit and go to page 59, which is Ventura. Oh, I'm sorry. Before we leave S. Barbara, just noting that another direction of the Commission was to keep the islands together, and so the islands are kept together in the Santa Barbara -- in the Santa Barbara base visualization.
And now to Ventura. Still keeps Port Hueneme through Piru COI together. The only thing that is different here than what you saw last is the addition of that Moorpark, which is what was needed to bring in Montecito and those areas. I was told to use Moorpark and possibly Somis. Somis I could bring in if you would like to be -- to increase -- change the deviation a little bit. But because I did not have to for that Santa Barbara split to be fixed, it's -- it is there still in Jamie's area. So currently, the only difference here is this Moorpark.

And that is the end of my areas. And I'm happy to answer any questions.

CHAIR LE MONS: Okay, thank you.

Commissioner Fernandez.

COMMISSIONER FERNANDEZ: Thank you, Chair.

Tamina, I'm going to take you back to 16 and 17. What's that noise?

And that's the TEHANAPA and Solano area? Yeah, right there is perfect. Thank you. And what I would like to see is I would like to see all of Yolo County included with Solano County, and then, the tradeoff -- which, I just realized someone had given you direction last time to -- to keep Vallejo and Benicia in. I'd actually like to move those out. So that -- if my
numbers are right, I believe it's pretty close in terms of being even with the population.

CHAIR LE MONS: Thank you, Commissioner.

Commissioner Akutagawa?

COMMISSIONER AKUTAGAWA: Yeah.

Now, thank you for the visualization. I'd like to go down to Ventura County right now. In seeing the visualization, I would like to give direction to actually remove Moorpark from this visualization. I know that we received quite a bit of testimony that Simi Valley and Moorpark should be kept together. And instead -- I know that we're going to be getting to a place where we have to split, so considering splitting Camarillo and -- and/or perhaps taking a portion of -- all Somis into Ventura County.

Thank you.

CHAIR LE MONS: Thank you, Commissioner.

Commissioner Turner?

VICE CHAIR TURNER: Thank you.

And stay there. I'd like to ask a question of Commissioner Akutagawa and then give direction depending on the response. At this same visualization for both Santa Barbara, and Ventura, I know we wanted to explore having the island be all one so that it wasn't split.

I'm wondering if there was COI testimony -- outside of it
looking neat, I'm wondering about the population there because we did learn -- I don't know if after the fact, or the same time, that that Santa Barbara island is actually two different counties. It's Santa Barbara and Ventura County. And if that is the case, and if, indeed, there was no specific COI to make it together, I'm wondering if, Commissioner Akutagawa, if you feel it would be okay if we keep them within their counties.

COMMISSIONER AKUTAGAWA: Yes. That -- I was thinking about that too. I thought it might be better.

Yes, I agree with you.

VICE CHAIR TURNER: Okay.

So the -- the direction, Tamina, would be to keep them within their counties -- the island down there that's -- that we -- that we tried to make it nice. We'll go ahead and reverse that. And then -- we good?

Okay. And then, I'd like to see -- Union City. Go back to -- is that page 30? I can't read my own writing. So in this area -- I still don't see Union City. Oh, okay. Yeah. So I'm wondering here -- so we have Alameda -- ahead of it -- on top of it is over by three. And then we have Fremont that's over. But then we have LEXSUNNY underneath. Actually, what I was going to suggest is going to make it worse. I was going to add in, look at keeping Union City whole with Fremont. But you said the
numbers did not work for that? You're on mute, I think.

MS. ALON: Okay.

VICE CHAIR TURNER: Oh, there you go.

MS. ALON: Yeah --

VICE CHAIR TURNER: (Indiscernible) --

MS. ALON: -- I could split Fremont and add some of this part area Fremont to Alameda.

VICE CHAIR TURNER: (Indiscernible) --

MS. ALON: No?

VICE CHAIR TURNER: I just wondered about the splitting Union City when you did that. It -- was it a COI? Because there are population types that just -- it was -- typically, I see Fremont with Union City, but it was split in the middle. And I know you did a good job about saying COI testimony said this, but I didn't catch it for this split and wondered about why you were splitting Union City.

MS. ALON: Yes, we split Union City for population. And I am currently looking for where I got the split from. And that's why you see all the little COIs flashing on and off. I'm sorry, I have hundreds of them, which is why. But I'm happy to go back and explore where that line is if you would like me to.

VICE CHAIR TURNER: Okay. I would. Thank you. And then, the last one I had is on page 21, up in the East
Bay Area. And for this -- this is pretty -- this is tricky to me, all the time. Because when I look at this, I'm wondering about the split between Oakland and Emeryville which they -- I mean, you don't even know when you cross from one to the other. So that is just very bizarre to me. And I would like for Oak -- for Emery -- man.

I would like for Oakland not to be split from Emeryville. I don't have to have Piedmont into that same area, because Piedmont, I think has a different kind of feel to it. A different type of even -- yeah. I think -- I think Piedmont COI's would -- would be okay with not being with Oakland. I do think that we could probably add it into Orinda area. And so we are -- go ahead.

MS. ALON: If I may ask? So Emeryville is currently together with this western half of Oakland. Would you prefer it to be together with the eastern half of Oakland? Piedmont is completely encompassed by Oakland. This is --

VICE CHAIR TURNER: Oh, we got to take it, because it's all together. Darn.

MS. ALON: All Oakland. So currently, Emeryville is with this area of Oakland. If you would like me to explore moving Emeryville to --
VICE CHAIR TURNER: Can you turn (indiscernible) part of Oakland -- the Oakland part of Oakland -- see that real quick for both Oakland and Emeryville -- or both sides, East Bay and Oakland. I should call them by their right names. Uh-huh. Oh shoot. I could have probably went to my pages. I'm sorry, Tamina.

MS. ALON: It's okay. You're just testing me. It's all good.

VICE CHAIR TURNER: Okay. 2.4, 6.04. And then -- 18 -- 14 -- 15. No. 1. 15.49 -- 14 -- 18 -- 18 -- 25 -- 23. Oh, okay. I'm going to leave it there, and see if my commissioners want to -- if other commissioners want to help me. Yeah, because I see six of one and a half dozen of the other. I was hoping to not split Oakland from Emeryville. But I also don't want to alienate the rest of West Oakland as well. And it seems like we're over. So we couldn't just make it all together -- Emeryville, West Oakland, Oakland all together. That would definitely take us over.

MS. ALON: We could definitely do in the other -- in the other maps.

VICE CHAIR TURNER: Okay.

MS. ALON: But they unfortunately do not fit in assembly.

VICE CHAIR TURNER: Oh, There's Commissioner Yee. I
didn't see earlier. Beautiful. Okay.

CHAIR LE MONS: Thank you, Commissioner.

Commissioner Andersen?

COMMISSIONER ANDERSEN: Oops. Thank you, Chair.

Actually, if we pop down to Ventura, again. Or, I might just be able to say. Piggybacking on Commissioner Akutagawa's, she said let's take Moorpark out. I believe I'd like to actually have all of Camarillo in. This is Moorpark out of -- yeah, taking Moorpark out of Ventura, that district, and put all of Camarillo in. And I understand that's going to change our even to molly. It'll affect that by about 20,000. But I think there's going to be more changes in the LA area which will take care of that. So I would like to see that -- that's Commissioner Akutagawa was saying maybe cut Camarillo. I don't think we need to, and I'd like to say not to have it cut right now.

And then, sorry, Tamina. Can we go back up to San Francisco?

MS. ALON: Sure.

COMMISSIONER ANDERSEN: Thank you.

COMMISSIONER SINAY: Chair, can I ask a question?

CHAIR LE MONS: Sure.

COMMISSIONER SINAY: Can we stay in one area and ask does anybody else have any comments in that area so we
can finish a conversation in one region and then move to another region, because we're hopping around and it's getting a little confusing?

CHAIR LE MONS: Sure.

COMMISSIONER ANDERSEN: Yeah. Did Patricia -- Commissioner Sinay mean, let's finish up with Ventura?

Because I can wait.

COMMISSIONER SINAY: Yeah, there's several people. Yeah.

COMMISSIONER ANDERSEN: I will wait, Chair.

COMMISSIONER SINAY: Thank you. Sorry.

CHAIR LE MONS: Okay. Commissioner Toledo?

COMMISSIONER TOLEDO: I don't have a -- I wasn't going to comment on Ventura. I was going to comment on --

CHAIR LE MONS: Go on, and comment on what you were going to comment.

COMMISSIONER TOLEDO: Thank you. So back to Napa's -- to Yolo-Solano area. So I have been receiving quite a bit of feedback that Napa, Yolo and Solano would like to be kept together. So I'm fully in support of Yolo and Solano being together. Not having Vallejo and Benicia. And if there's population need, then pulling from the agricultural aspects of Solano to the north. So I've heard from -- we've received comments from -- and
it's publicly posted from St. Helena and from other entities that would like to be part of that area.

That does mean that to the -- there would be potential need for population for what's left of Lake Napa, Santa Rosa area, and potentially pulling from Santa Rosa. So that would be my comment for the Napa area. And then just in terms of -- and I'll leave it at that for Napa. Thank you.

CHAIR LE MONS: Okay. Commissioner Andersen, you want to do anything while we're up north here?

COMMISSIONER ANDERSEN: Yes, I do. Thank you, Chair. If we just stay in that area, what I would like to do is I -- I agree with what Commissioner Toledo was saying. And where does actual population come from?

I see the -- the NC coast is already -- it's a negative 3. I would like to actually take more of the South Marin. Put the population in there. I would cut that right about Novato, and put the lower portion of Sonoma-Marin, from Novato down, into the North Coast, which I think has the population.

Then I would like to take from Sonoma-Marin, add either -- if you could go in just a little bit please, Tamina. If you could zoom in just a bit. Thank you. A little bit north. Oops. Perfect.

We -- right now, we have -- I just -- this is where
I'm trying to go. I'm trying to add Sonoma Hot Springs, that's with -- to Napa, because that is -- those are -- that's the heart of the wine country. So what I'm wondering is, if I've cut the population out of Sonoma-Marin and we go up and add -- is Santa Rosa already in Sonoma-Marin? It is. Okay.

So then, I would -- I would like to -- I guess I'm cutting up Sonoma-Marin quite frankly. I guess I'm taking the bottom part out. And I'm putting the top part, which is from above Novato to Sonoma -- to say, below Santa Rosa, with the Napa -- TEHENAPA. And depending on population, Santa Rosa will either go either west or east. And then, going up the -- to Tehama to TEHENAPA area. If --

MS. ALON: I got that. So Santa Rosa goes in with Tehama-Napa, Yolo.

COMMISSIONER ANDERSEN: As -- as does that portion. Essentially, we're cutting up --

MS. ALON: As does this --

COMMISSIONER ANDERSEN: Okay.

MS. ALON: So you just want to slice in half, and move here and here?

COMMISSIONER ANDERSEN: I actually want to slice a little bit further south. Yeah. Like slice it -- slice it around -- around there. Either, like, depending on
population, maybe put all of Novato into the Sonoma-Marin -- into the North Coast. From Novato down, put that into North Coast. And then, create the other part of Sonoma-Marin into the -- the TEHENAPA. See how these are negative. I'm trying to kind of balance them out. Keeping common interests. Which I'm trying to put more the wine country, which is in Sonoma -- the Sonoma-Marin in with the TEHENAPA wine country and then --

MS. ALON: Where are we going to repopulate Sonoma-Marin from?

COMMISSIONER ANDERSEN: We're essentially kind of taking it out, at this point.

MS. ALON: I can't do that.

COMMISSIONER ANDERSEN: And going up --

MS. ALON: It will overpopulate both of the other districts.

COMMISSIONER ANDERSEN: Correct -- correct -- correct. But keep on going up north. And then, adding -- taking possibly Lake, and putting it into the Central North, Lake County.

MS. ALON: It would be putting in with Colusa.

COMMISSIONER ANDERSEN: Correct.

MS. ALON: And Butte.

COMMISSIONER ANDERSEN: Correct.

MS. ALON: Okay. Okay.
COMMISSIONER ANDERSEN: And seeing -- you see -- see what I'm trying to do? I'm trying to shift that population in that area, to balance them out. Does that make sense to --

MS. ALON: Yes. I will definitely take a look.

COMMISSIONER ANDERSEN: Okay.

MS. ALON: I've not done it that way yet.

COMMISSIONER SINAY: Jane, are you trying --

MS. ALON: I will take a look at it.

COMMISSIONER SINAY: Are you trying to merge -- get rid of one district in the north area so we can create one somewhere else, or? We're just trying to figure out what you're doing. Because it does feel like there's too many districts up there. Because they'll all in negatives. But we're just trying to figure out what --

COMMISSIONER ANDERSEN: A little bit.

COMMISSIONER SINAY: If we could know the big picture, maybe the mappers can help you.

COMMISSIONER ANDERSEN: Yeah. And it is. Thank you, Commissioner Sinay. It is. I'm trying to balance those out, which actually might end up adding an area. It's giving us an area for a district around Sacramento is where I'm getting at. Is --

COMMISSIONER SINAY: All right. And then keeping going.
COMMISSIONER ANDERSEN: Correct. I will in a little bit. I'm going to pause right there.

CHAIR LE MONS: Thank you.

COMMISSIONER ANDERSEN: Because that's a long direction.

CHAIR LE MONS: Thank you.

COMMISSIONER ANDERSEN: And I'd like to give someone else a chance. Thank you.

CHAIR LE MONS: Thank you. Is there anyone else that has a contribution to make to this area that we're working on right now? And it's hard now, because -- okay.

Thank you, Commissioner Kennedy.

Commissioner Kennedy, and then Commissioner Sinay.

So hold on. I'm sorry. Commissioner Kennedy.

COMMISSIONER KENNEDY: Yeah. Okay.

CHAIR LE MONS: So hold on. I'm sorry, Commissioner Kennedy. I'm going to go with Commissioner Yee first. And -- because I want to try to -- because I know a lot of people have been waiting, and I -- and they're in order. And I'm trying to now keep track of who's been waiting, et cetera. So I apologize, Commissioner Kennedy.

Commissioner Yee.

COMMISSIONER YEE: Thank you, Chair. I'd like to go
back to the East Bay-Oakland border.

I'm okay with Emeryville staying where it is, because it -- you know, although it does have connections with Oakland, it also has connections with Berkeley. So I think I could go either way. (Indiscernible) sitting the border right below Piedmont there. I think they talked about this last week. So I'm wondering if we can come further southeast along 580 there. Kind of directly below Piedmont.

Yes, full disclosure. This would change the -- where the district -- my neighborhood is in.

So that line that goes to the right. I mean, it goes through a bunch of intact neighborhoods, as far as I can tell. And I think it would be better to come down 580, more to the east. And then go up, I don't know, maybe 35th Ave. or even farther south, Keller, or Golf Links even, would make more sense to me. And that would balance the two districts out with population a little bit more too. So it's just a matter of what would be the best balance point and how far to the east you would go. But farther east than it is right now. Thank you.

CHAIR LE MONS: Thank you, Commissioner Yee.

Commissioner Sadhwani?

COMMISSIONER SADHWANI: Sorry, did you call on me?

Sorry.
CHAIR LE MONS: Yes.

COMMISSIONER SADHWANI: Oh, sorry about that.

CHAIR LE MONS: I did.

COMMISSIONER SADHWANI: My comment was about the 
TEHENAPA piece that we were looking at. Commissioner 
Toledo was giving some instruction, or direction, about 
including some of those more agricultural parts of Yolo. 

Was some of the -- some of the pieces that we have 
lifted for Kennedy was around that part of West 
Sacramento that's included in this district. I'm not 
entirely certain what Commissioner Andersen's vision was 
for removing that district and possibly putting one in 
Sacramento. But I mean, if something like that works out 
I mean, I think -- I'm thinking about taking West 
Sacramento out of this more rural district, and keeping 
it with some of the other COI's that we had received, 
would make a whole lot of sense to me.

I don't have a sense of what the population 
differential is between West Sac and -- and this rural 
area that Commissioner Toledo had mentioned, I think 
going down into Solano County. But I'd definitely like 
to explore that. Thank you.

CHAIR LE MONS: Commissioner Kennedy?

COMMISSIONER KENNEDY: Thank you, Chair. Two 
things. One, you know, we see negative sides, and we try
to find population but, you know, keep in mind, one percent, if you see a negative one percent it's 5,000 people roughly. You know, if you see negative 4 percent, that's 20,000 people. So a whole district is 500,000 people, not 20,000 people. So let's try to keep our math in mind as we do this.

Second of all, I've said before and I'll continue to say, if we look at the relief map, you will see Lake County is very different from Colusa County. You know, I could see a case being made to take the southern part of Lake County, which is more heavily agricultural, and wine based, and looping it with Napa. And the northern part is perhaps a little more like Mendocino County. But, you know, neither the north nor the south, is like Colusa County. So I don't see that as a way to go. Thank you.

CHAIR LE MONS: So I just want to ask a question there, because it seems as if we have some contradictory, at least, positions, so I don't know if that affects how Commissioner Andersen feels about the direction, or not. I do want to ask that question.

Commissioner Andersen?

COMMISSIONER ANDERSEN: Yeah, thank you, Chair. We have gone back and forth on this issue before with Lake County. And I completely understand Commissioner Kennedy's perspective on Lake County. And
what we are sort of grappling with before, which I understand Tamina has been too, which is why we have these districts the way they are. And I appreciate that Tamina, thank you.

We are trying to sort of, let's put the wine countries areas together -- being Lake also has wine. Population wise, we just might not be able to do that. And if it turns out that Lake should go up with Nor-Coast, and it -- we change it a little bit that way, I am agreeable. So I think that's a little bit that I would say, let's have a quick look -- what the mappers can actually come up with for us. So --

CHAIR LE MONS: Thank you, Commissioner.

COMMISSIONER ANDERSEN: I would lead the way. Thank you.

CHAIR LE MONS: Commissioner Sinay?

COMMISSIONER SINAY: Thank you, Chair.

You know, as I was looking at the Bay Area last -- last week -- two days ago -- whenever we met last. We were talking about anchors, and priorities in areas. And I think that that's helpful for the mappers as well as for us, in thinking about the story we're trying, you know, the stories we're trying to tell.

It's not one story, but it's multiple stories. And when I looked at the Bay Area and -- and the communities
of interest that we received, as well as the
conversations that we've had, I kind of came up with
some. And I was just curious if this was, you know,
just -- if others were seeing it the same way, or not.

But we really wanted to see in the -- in kind of the
East Bay, and North -- North Contra Costa just really
making sure that the working class is all put together.
And that includes bringing in Benicia and Vallejo where
needed. But that was just one thing that kept coming up,
both in our communities of interest as well as in our
conversations.

The East -- East Contra Costa, I think, that's more
of our suburban, professional, a little bit more rural.
But it's not as rural as some people are trying to say.
I mean, there's some really good shopping in that area
and stuff, you know. It's -- it -- I would just say
it's, you know, it's not as rural as I've heard some
people say.

And then, there -- we've received a lot of COI
testimony from different Asian communities, remembering
that the Asian communities are very diverse. And that,
in looking through the input, and looking where the maps
are right now, we have been able to create two -- two
Asian-opportunity communities for -- one in San Francisco
-- East San Francisco, and then one in the South Bay
Area. Yes. Santa Clara South Bay. And we say that because Isra and I are always teasing -- sorry Commissioner Ahmad and I are always saying remember that there's three South Bays in California.

And then -- and then we had the rural coastal, and then Silicon Valley. And there's others also as well in there, but it is important that we, you know, for me at least, that we know what our themes are, so that we don't keep changing them around. Because I feel like we have the conversation about working class, and East Bay and North Contra -- and North Contra Costa. And then it kind of got lost. We've also said, you know, it's really important to keep the Tri-Valley together.

I mean we received a lot of community interest around the Tri-Valley, being Dublin, Livermore, Pleasanton, and San Ramon. And I think, if we remember some of the other themes, we can move things around a little bit.

And if, Chair, if you'd like, I can give some suggestions on moving things around to keep within those themes, or I can wait to see if there's additional conversations on the questions I raised.

CHAIR LE MONS: That's your call, Commissioner.

COMMISSIONER SINAY: Well, I'll just finish this, you know, and then others can. On the -- the RODUBLIN
(ph). Well, I think, I haven't been able to look at all
the visualizations. That's my homework for tonight. But
I believe, that -- the other visualizations, I've looked
at all these. We do have a Tri-Valley and other -- and
other areas together, correct? In some of our other
plans? Tamina?

MS. ALON: Yes, they are together in other plans,
I'm sorry.

COMMISSIONER SINAY: If, I mean, if it's possible to
bring them together in this one, it would be great.

My thought was to kind -- to move, you know,
Danville into East Contra Costa -- not Danville. Oh.
No, well Benicia, and Vallejo into -- into the North
Contra Costa. But, you know, to put it with Martinez.
But that, right now we don't have it going all the way
across the north. So that makes it a little different.

But I was thinking of Walnut Creek. Walnut Creek
moving over to East Contra Costa, and then to Dublin. I
didn't know -- that if the Tri-Valley made more sense
going south, you know, in the yellow, or staying in the
green. I know that East Contra Costa is at a negative
right now. And the green is at the very -- is a
bright -- is very close to five already. And that
Alameda is -- is close to that as well.

But I guess my -- my concern was kind of -- can you
go back up to the northern part? I'm just concerned here in the north, that just Martinez, you know, if you put Vallejo and Benicia, Martinez, Bay Point, Pittsburg, Antioch. Those are more of our working class communities that we were discussing earlier. And there might be a few others. But I just feel like we've been kind of mixing apples and oranges.

No, I mean there just different fruit that, you know, because we're trying to do along the water there. But there's different types of industry that are around the waterways. So I'll just leave it at that for right now and see what others are thinking.

CHAIR LE MONS: Thank you, Commissioner.

Commissioner Fernandez?

COMMISSIONER FERNANDEZ: Thank you, Chair.

Just quickly. Commissioner Sadhwani had mentioned West Sacramento. I would prefer to keep it with Yolo. I am warming to the idea of having it with Sacramento and potentially keeping the rural parts of West Sacramento with Yolo. So I just wanted to kind of throw that out there. That I'm warming to it. So that it Commissioner's Vazquez's term.

CHAIR LE MONS: Thank you.

Commissioner Akutagawa, is your hand raised? Well, your hand is raised, but --
COMMISSIONER AKUTAGAWA: Yep, sorry about that. I didn't realize I hadn't taken it down. Thank you.

CHAIR LE MONS: No worries. I just wanted to confirm.

Are there any other questions or comments for Tamina? Thank you so much, Tamina, for doing an incredible job of presenting. We appreciate it.

And thanks to Kennedy as well.

Karen. Karin, we can continue.

MS. MAC DONALD: Thank you so much. This is fantastic. I guess we're going to move on to Jaime now. And Jaime are you ready? This was a very quick ending to this presentation. So I just want to make sure that Jaime's ready to go, which I'm sure she is. So just a second, please before she -- so she has a moment to pull up her map.

MS. CLARK: Yeah, thank you. Just a second.

CHAIR LE MONS: We are going to be -- while she's doing that -- we are going to be taking a break in about 12 minutes. So we'll get started, and we'll pick up when we come back. So, you can continue.

MS. CLARK: One more quick second while I just get my notes in order here.

CHAIR LE MONS: Take your time, no worries.

MS. CLARK: Thank you all for your patience. And
to -- for you to prepare. I am going to start on page 67. Oh, I'm not quite sharing my screen yet. So sorry. Here I go. And it should be shared now. I hope everyone can see it.

MS. MAC DONALD: It's up, Jaime.

MS. CLARK: Okay. Great. And just before we get into any of it I, based on last week's feedback, there weren't any major structural changes to this assembly visualization. So I'll be, you know, happy to walk you through what differences there are and explain, you know, why those differences occurred. There were some instructions that I received that would, you know, split the -- you know, by taking a certain city out or split a different city or cell. So some of those things I will just be able to note to you and maybe suggest that those could be worked out in live line drawing, if there are things the Commission would still like to explore. And I'll be able to point those out to you specifically.

And I'm going to move in. It's page 67. And it is -- this visualization called 5 Corridor. It includes Montebello, Commerce, Vernon, Bell Gardens, Downey, Norwalk. This is different from last time, in that Vernon is included in this visualization, per Commission request.

Additionally, there was a request to either add Pico
Rivera or Santa Fe Springs to this visualization. And
the purpose of that would have been to remove Artesia and
Cerritos. Those were included in this visualization last
time. As you can see, Artesia and Cerritos are removed.
And just in order to not split any of the aforementioned
cities, Montebello is included in this visualization.

And I don't know if Mr. Becker had anything to add?

MR. BECKER:  Nope, I don't have anything to add.

Just with all of these, as usual, pay close attention to
the total primary minority CVAP, and the deviation. The
deviation is incredibly close to zero here. Very good.

MS. CLARK:  Yeah, the deviation is .20 percent.

And next, we'll go to page 68. That is right next
door. It's this visualization called, sort of like 710
gateway. This was, created per Commission request, sort
of to have the -- some cities along 710 Corridor
intact -- or excuse me -- together in this visualization.
This visualization has a 4.99 percent deviation. It
includes Florence-Firestone areas just north of that, and
the city of Los Angeles. This is a neighborhood council
area called Central Alameda Neighborhood Council. Watts
is whole in this visualization that was accomplished in
part, based on the sort of city swaps that also included
this 5 corridor visualization. So it includes Florence-
Firestone, Watts, South Gate, Windwood, Paramount, sort
of the Northwestern part of the city of Long Beach, and then unincorporated area herein just west of the city of Long Beach.

MR. BECKER: I'll just add briefly, as with the previous. The levels of Latino CVAP are significantly higher than that which is necessary to enable Latino voters to have an opportunity to elect a candidate of their choice. That's something to keep an eye on. And you'll note that, as opposed to the previous distribution, is very close to zero deviation. This is at the very upper limit of deviation. So a significant amount of population to be removed here.

MS. CLARK: Thank you. And next we'll go to page 75. This is the West San Gabriel Valley visualization. This visualization here has a percent deviation of negative 1.55 percent. And this includes cities of San Moreno, Arcadia, Temple City, El Monte, North El Monte, Rosemead, South San Gabriel, San Gabriel, Alhambra, and Monterey Park.

There had been a request from the last round of visualization feedback sessions that we had, to include South El Monte, just for Asian CVAP that city couldn't be included. However, there was also a request to keep all of Arcadia in this visualization. And that is represented here. So there's -- this split is no longer
around 210. And Arcadia is whole and included in this visualization.

And unless Mr. Becker has anything to add? It looks like no, then we're going to move on to page 76.

Oh, I went the wrong way. Went in the wrong order.

All right. Here we go on page 76. It's the South San Gabriel Valley visualization. So this includes -- it has a 4.07 percent deviation. Includes Pico Rivera, South El Monte, Avocado Heights, La Puente, most of the city of Industry, Hacienda Heights, Whittier, La Habra Heights, La Habra, East Whittier, La Mirada, South Whittier, and Santa Fe Springs. And Industry is the only city split. Oh, I'm sorry, Valinda also is split, I believe. And that is for -- would be for population purposes. And yep, again, it's a 4.07 percent deviation.

And next, we're going to move on to page 77. Let me just check here. So next, on page 77, this is sort of the East San Gabriel Valley visualization. It represents a percent deviation of negative 2.3 percent. This includes Glendora, Azusa, Duarte. The split here at Duarte is at Angeles National Forest. It includes South Monrovia Island, Mayflower Village, Irwindale, Baldwin Park, West Puente Valley, West Covina, Covina, Charter Oak, Glendora. If I missed that, at the very beginning.

And there was a request in this to perhaps remove
Azusa from this visualization. This is one of those instances where it would cause -- to accomplish that would cause a split somewhere, or would need just sort of a population trade somewhere. And if there are not suggestions as to, like, what to bring in, then this is -- this is something we could really easily explore during live line drawing next week.

And those are the visualizations that were created in collaboration with your VRA team. I'm just going to zoom out, so we can kind of see where they all are, and how they all fit together.

CHAIR LE MONS: Great. So we're right on the lunch hour. So that was perfect to get that segment done. Commissioners can think about if they have any comments or questions about it and present those after the dinner break.

So we're going to, at this time, break for dinner. And then we'll return at 6:45 to continue this process. We're also going to be taking public comment this evening as well. So everyone enjoy your dinner, and I look forward to seeing you all back at 6:45.

(Whereupon, a recess was held)

CHAIR LE MONS: Hi. Welcome back, Commissioners.

Welcome back, California.

I wanted to -- before the break, I mentioned I would
lay out how we were going to proceed for the rest of the evening.

So we were slated to go until about 7 on visualizations and then move into public comment. I think, because the way I understand it, Jaime outlined in her opening presentation that there wasn't significant changes in the Los Angeles VAP. So my thinking is, that we could get through Los Angeles, which may take us to close to 7:30. That should include commissioner comments, et cetera. At which point we could move into opening the lines for our public comment. So that's what I'm thinking. And then that way, we can start our Southern tomorrow, and kind of jockey the time a bit to get a bit back on track. So we have a lot of ground to cover. So why don't we try that. That's the plan.

We'll still open the lines.

I know people are probably queuing up. And we will still close the lines at 8 o'clock. So people can starting get in the queue now, if they like. We will close the lines at 8 o'clock for getting in the queue for public comment. And we will of course hear all the public comment for anyone who has gotten in the queue by 8 p.m.

So let me repeat that. The lines are open. You can get in the queue now. We will start taking public
comment around 7:30, at the very latest. My hope is that we'll get through Los Angeles by then. And we may even get done a little bit sooner, we'll see. But as soon as we get done with Los Angeles, we'll move into public comment. At the very minimum, it'll start at 7:30. We will close the lines for queuing up at 8 p.m. And we will hear from everyone that's in the queue.

And then again, let me also remind listeners, that you can always present your feedback and comments via the form at our website. And we are monitoring that throughout the meeting. So that isn't something that we get to later, or at some point in the future, we are monitoring that real time. So feel free to take advantage of that mechanism as well.

So with that, I'm going to hear from Commissioner Kennedy, who had his hand raised before we left for dinner. And then we'll go back to Jaime and continue with Los Angeles visualizations.

And welcome, Katie, our Comment Moderator has joined us. And we look forward to you doing your magic in a little bit.

Commissioner Kennedy?

COMMISSIONER KENNEDY: Thank you, Chair.

Just on what Jaime had presented earlier. I wanted to propose a small rotation that I think will leave us
net very close to where we started. If we move both
Rossmoor and Los Alamitos into the NOCC visualization,
that is approximately 21- or 22,000 people. And then, if
we take approximately that many from the northern part of
Long Beach and move it from the 710 gateway visualization
to the Harbor Gateway visualization, I think we've pretty
much addressed both the Harbor Gateway surplus as well
the NOCC. Anyway, I think we've addressed a number of
issues and not made ourselves any worse off, if that
makes sense.

Jaime does that make sense?

MS. CLARK: Thank you so much for that direction,
Commissioner Kennedy. And, I guess just a follow-up
question. And I know that you'll be giving Sivan
direction, it sounds like tomorrow. And just, what
population would you remove from this visualization if
we're adding Los Alamitos and Rossmoor into this
visualization? It's currently overpopulated.

COMMISSIONER KENNEDY: It's not -- sorry. It's not
NOC. It's NOCCC.

MS. CLARK: Oh. Thank you for that clarification.

Thank you so much. Yeah. That and -- that handoff that
you just outlined would -- yeah -- is certainly doable.

Thank you so much.

COMMISSIONER KENNEDY: Okay. Thanks.
Thank you, Chair.

CHAIR LE MONS: Thank you, Commissioner Kennedy.

Jaime, you can continue.

MS. CLARK: Thank you. So where we left off were those visualizations that were created in collaboration with your VRA team. And now we can just go through the PowerPoint. I'm just going to go in the order that it's presented in the PowerPoint. That begins on page 62. And while you find -- or excuse me -- the PDF's. Pardon me. And while you go to page 62 in the handout -- 62 of the PDF, I'm going to make my way over there as well.

We are here in the East Ventura and Malibu area.

This visualization hasn't changed -- hasn't changed very much, with the exception of moving Moorpark out and adding it to the Ventura area. Didn't really get much feedback, or any requests for this visualization. And so that's why it is largely the same. And it was created just based on previous Commission direction to have -- and to explore having the sort of Malibu, Calabasas, Topanga area, with Pacific Palisades, and include that with some of the East Ventura areas.

And I just noticed, during lunch I forgot to take off -- to change the labels on this. So I'm going to change those, so that you can see a little bit more underneath here. So just one moment, please, while I do
that. Thank you for your patience.

And, Chair Le Mons, should I move on to the next visualization?

CHAIR LE MONS: Yes, please.

MS. CLARK: Okay. Thank you so much. Next is page 63. It is this West Side visualization. Page 63 of the handout. This visualization also hasn't changed much. It was based on Commission -- previous Commission direction to use 405 as a border here, on sort of the West Side and Bay Areas, and Los Angeles, and also includes Westwood Neighborhood Council, Westside Neighborhood Council, Palms, West Los Angeles, Mar Vista, Santa Monica, Van Nuys, Marina del Rey, Del Rey, and all of Westchester. And this is a negative 2.97 percent deviation.

And I'm going to move on to page 64. This visualization also hasn't changed since the last time you saw it. It includes El Segundo, Manhattan Beach, Hermosa Beach, Redondo Beach, Lawndale and Gardena, Torrance, Wilmette, Rolling Hills, Palos Verdes. All of those are full and intact in this visualization. It has a percent deviation of negative 1.81 percent.

And next is page 65 of the handout. It's right next door here. It's the South LA visualization. This represents 8 percent deviation of negative 1.27 percent.
It includes Willowbrook, West and East Rancho Dominguez, Compton, the Harbor Gateway areas. The city of Los Angeles. It includes Wilmington Neighborhood Council and San Pedro. And this was created based on Commission direction, to have the San Pedro areas you know, connected north.

Moving to page 66.

VICE CHAIR TURNER: Jaime, before you move.
Chair?

CHAIR LE MONS: Yes. Go on, Commissioner Turner.

VICE CHAIR TURNER: Jaime, in this area. Is this the visualization where we had Watts split before?

MS. CLARK: I'm going to zoom into Watts. It was split before. And now it's whole and in the visualization called 710 Gateway.

VICE CHAIR TURNER: Okay. Perfect. Thank you.

MS. CLARK: Thank you so much for that question. And next page --

COMMISSIONER ANDERSEN: I'm sorry, Jaime.
Chair could -- one more clarification?

CHAIR LE MONS: Yes, Commissioner Andersen?

COMMISSIONER ANDERSEN: Thank you.
A little clarification? The little -- in this -- in this particular one. That little kind of square that goes up into Gardena. Gardena, is that also part of the
city or?

MS. CLARK: This follows the city boundary of the city of Gardena.

COMMISSIONER ANDERSEN: Okay. Thank you.

MS. CLARK: Thank you so much for that question.

And next, let me find the handout one more time.

Page 66. Looking at this one called Harbor Gateway. The names -- or the areas really do change. This includes much of the city of Long Beach. It includes Rossmoor and Los Alamitos, Hawaiian Gardens, Lakewood, and Signal Hill. It also includes San Clemente Island and Catalina Island. Per Commission direction, and again this hasn't changed since you last saw it. This was based on Commission direction from a couple weeks ago, to include Los Alamitos, Rossmoor, Lakewood, Hawaiian Gardens, with most of the city of Long Beach, and to include the islands I just mentioned, with those areas, and -- yeah, and the city of Long Beach is split here for population purposes.

And next, I'm going to move to page 69 of the handout. This is a visualization called 110, LA. It also hasn't changed since you last saw it. It includes sort of this line where I'm running my hand is the 110 highway and the city of Los Angeles. This includes Westmont, Empowerment Congress Southeast, Canndu --
Canndu, Zapata King, South Central Neighborhood Council, Jefferson Park areas. And this is a percent deviation of 3.65 percent.

Next, I'm going to page 70 in the handout. This visualization also hasn't changed since you last saw it. This is a .19 percent deviation. It includes P.I.C.O. Neighborhood Council, Mid-City, West Adams, much of Culver City, although Culver City is split around 405, which is where the hand is waving right now. That includes Ladera Heights, View Park, Empowerment Congress West, Park Mesa, all of Inglewood, Lenox, West Athens -- West Athens, Hawthorne, and Del Aire. And again, it's a .19 percent deviation.

Next, I move into page 71 in the handout.

VICE CHAIR TURNER: Jaime, before you move. I'm trying to locate Gardena and Lawndale in that visual. Is that -- is it in that map?

MS. CLARK: Gardena is in the South Bay visual location.

VICE CHAIR TURNER: Okay. Then we won't move. Yeah. Then --

MS. CLARK: And what was the other -- the other cities, please?

VICE CHAIR TURNER: Yeah. You -- for Culver City, you were pretty low deviation there, but we've split
Culver City there a little bit. I was wondering about --

MS. CLARK: So this -- the area Where the hand is running. That's the part of Culver City that is slid off. It's just a little bit. This shape here.

VICE CHAIR TURNER: Okay. So I'll guess I'll just give direction. If we can keep Culver City whole unless it's needed for something different. I'm looking at the numbers. They seem pretty insignificant.

MS. CLARK: Thank you for that direction.

CHAIR LE MONS: Commissioner Vazquez?

COMMISSIONER VAZQUEZ: Yeah. I was just going to comment that I used to live right around there. And things really do shift quite a bit once you jump the 405. It's similar, so I can see an argument. This might be something we consider leaving open for live line drawing, because we may need it for other pieces. So I'm again, I'm open to it. But the 405 is a pretty bright-line barrier through that whole area, in terms of communities of interest.

CHAIR LE MONS: Commissioner Akutagawa?

COMMISSIONER AKUTAGAWA: Sure. Are we giving any kind of specific direction now? My understanding is we were going to wait. But if not, then I'd like to give some direction to?

CHAIR LE MONS: Go on, give direction.
COMMISSIONER AKUTAGAWA: Okay. Well since we're on this one. I was going to suggest removing Culver City from this particular visualization. And what I wanted to suggest on this particular one is, I wanted to add the portion of Culver City that borders Palms, Mar Vista, and the Del Ray Neighborhood Councils. I think we're at a point now where we do need to possibly look at splitting some cities. That is -- that was one suggestion. Because -- here's the other things, and they kind of all -- kind of connect together.

If we move some of that Culver City population out of the east of 405 visualization, what I wanted to see is -- let me go down to that particular one. Okay. One is -- sorry. I'm trying to look at it not on paper, but on -- the South Bay one. Okay. Gardena. We did get Communities of Interest testimony about the northern portion of Gardena, particularly being -- having some -- some alignment with some of the other communities like, Hawthorne, West Athens.

And so my thought was, I'd like to see if we can cut Gardena, and move a portion of Gardena up into the east of the 405 visualization there. Now actually, you know what, I'm sorry. I'm going to go back to the Westside one.

Going back to the Westside visualization. I notice
that Beverly Hills Neighborhood Council is included, I believe. Oh no. Okay. No. I take that back. I'd like to add the Beverly Hills Neighborhood Council to the West Side visualization, and then move the Westchester/Playa Neighborhood Council, to the South Bay. And then that way then, we could actually move all of Gardena and possibly even that unincorporated city that's between Gardena and Lawndale. Perhaps we could move that to all of the South LA visualization. My apologies. That one's more clear.

MS. CLARK: South LA visualization?

COMMISSIONER AKUTAGAWA: Yes.

MS. CLARK: I'll try that. Thank you.

COMMISSIONER AKUTAGAWA: Okay. And I know that I -- I did think this through. Let me go to the South LA visualization. Because I know that that's the question is, like, well if I do that, then what happens to South LA? Okay. So -- okay. South LA -- if we move that then, I think -- oh, shoot -- I think I got too many notes here. Okay. Jaime --

CHAIR LE MONS: Okay. Do me a favor. Ms. Akutagawa, review your notes. I'm going to go to Commissioner Vazquez, and I'll come back to you.

COMMISSIONER AKUTAGAWA: Thank you.

CHAIR LE MONS: Uh-huh.
Commissioner Vazquez?

COMMISSIONER VAZQUEZ: Yes. Thank you. If we could go to the VAD West Side. I like to add the Palms Neighborhood Council, actually to the VAD east of 405. That's mostly -- so the Palms Neighborhood Council, if we add that to the visualization south of it. It's much more in line with, I think, the rest of those communities. It's largely apartments and working class, and not quite aligned Communities of Interest with the West of that West Side District where it currently lies. Thank you.

CHAIR LE MONS: Commissioner Akutagawa?

COMMISSIONER AKUTAGAWA: Sorry. You can just skip me. Let me take my hand down.

CHAIR LE MONS: Okay.

Continue, Jaime. You're on mute. Or I can't hear you at least.

MS. CLARK: I'll Scoot closer.

CHAIR LE MONS: There you go.

MS. CLARK: Commissioner Vasquez, I believe that adding this Palms Neighborhood Council area into -- or out of the Westside visualization might make the Westside visualization underpopulated. Right now, it's almost negative 3 percent. Would you have a suggestion of where to add population?
COMMISSIONER VAZQUEZ: I would go into -- since we're already at -- I would go north.

MS. CLARK: Thank you so much.

COMMISSIONER VAZQUEZ: Yeah, into the Palisades and --

MS. CLARK: Bel Air.

COMMISSIONER VAZQUEZ: Yeah. Palisades and Bel Air.

CHAIR LE MONS: Commissioner Sinay?

COMMISSIONER SINAY: Sorry to interrupt then. I wanted -- well, that was the main thing I wanted to say, was go to Bel Air. And we haven't talked about the Hollywood area yet, right?

CHAIR LE MONS: No.

COMMISSIONER SINAY: Okay. Sorry. I'll come back then.

CHAIR LE MONS: Karin. I'm sorry. Jaime, continue.

MS. CLARK: This is page 71 of the handout. This includes South Robertson Neighborhood Council, Beverly Hills, West Hollywood, Mid-City West, Greater Wilshire, Koreatown, East Hollywood, and Hollywood Hills area. And it says 8 percent deviation of negative .85 percent.

COMMISSIONER SADHWANI: Sorry about that. What page did you say?

MS. CLARK: This is page 71.

COMMISSIONER SADHWANI: Great, thank you.
CHAIR LE MONS: Commissioner Sinay, did you want to comment on this area?

COMMISSIONER SINAY: Thank you.

So in this one, we -- we split the LGBT COI. And I wanted to see if we could move -- so here's some thoughts. Is looking, you know, looking at -- Equality California's map that they -- yeah, they submitted many of the congressional district's as is. But, if we could add into the West Hollywood. And I will have with -- I have some thoughts on how to take out. But add Studio City.

I know Los Feliz, we've gone back and forth. And so I'd be interested in hearing from those who know San -- San Diego -- know Los Angeles better if Los Feliz makes sense with Hollywood and West Hollywood. Beverly Crest, Silver Lake, yeah. So those would be -- so then, we could pull out Beverly Hills. And I know we need to -- I need to see all the numbers because we just moved Bel Air going north. But you know, so kind of Beverly Hills -- that would leave Beverly Hills, South Robertson, and Mid-City West, Greater Wilshire, Wilshire -- yeah, we'd kind of have to find new homes for that.

But I wanted us just to be aware that we were splitting a traditional COI in this -- in this area where there are LGBT businesses and homes and centers.
CHAIR LE MONS: Thank you.

Continue, Jaime.

MS. CLARK: Thank you.

Next, looking at page 72. This COI was created based on Commission direction to keep East Los Angeles, Boyle Heights, Lincoln Heights, LA 32 through the El Sereno area together with Downtown Los Angeles. This includes the Chinatown, Little Tokyo COI's. It also includes historic Filipinotown. That's how this has changed as before it was split in our last visualization.

It includes Westlake areas and Pico Union Neighborhood Counsel.

Next on page 73, moving north. This visualization hasn't changed since you last saw it, with the exception of this -- got to keep zooming out here -- with the exception of this boundary that unites historic Filipinotown, and the district to the south. But this includes all of Glendale, Los Feliz, Silver Lake, Echo Park, Glassell Park, Eagle Rock, and Highland Park, and South Pasadena.

Next moving on to page 74 of the handouts. This also, just based on Commission direction, hasn't changed since the last time that we looked at these visualizations, with the exception of this area of Arcadia north of 210 is not included in the visualization.
anymore. But it's really like a 210 corridor visualization. It includes these same areas. And San Bernadino County. Those are Wrightwood, Lytle Creek, Northern, areas of Rancho Cucamonga, Upland, and San Antonio Heights. It includes Claremont and San Dimas. The part of Duarte that is in Angeles National Forest. It includes Bradbury, Monrovia, Pasadena, Altadena, out to La Crescenta.

CHAIR LE MONS: Commissioner Sinay?

COMMISSIONER SINAY: Thank you, Chair.

This is one of those areas we -- we have made some changes in this. But I was interested Jaime, if we quit thinking of the 210 corridor and connecting it to the -- the National Forest; have we given you enough leeway that you don't have to keep it all connected? I see that there's different districts now that are connected to the forest. But are you -- do you -- or do you still need more flexibility?

MS. CLARK: Do you mean to keep these cities with the forest, or to have the forest other places? I'm sorry, I don't understand your question.

COMMISSIONER SINAY: Well originally, we had said keep the -- you know, the 210 and the -- you know, the corridor all together. And we've slowly started, you know, kind of pulling some communities out of there. We
had talked last time about maybe it's not -- you know, we
had gotten a call from the same group that we've gotten
several calls.

But saying maybe it's not one district, but you --
you look at it from north-south and split it, you know,
split it into different districts with the forest. I
just wanted to know if you -- I guess you don't feel that
the 210 corridor is sacred. I mean, that you can do what
you need to do -- to do -- to figure out other issues
that would -- other area -- COI's that we're bringing up.
And if I'm not making sense, don't worry.

COMMISSIONER SADHWANI: Can I jump in here?
CHAIR LE MONS: Oh, absolutely.
COMMISSIONER SADHWANI: Thank you. That made total
sense to me, Commissioner Sinay. Like, if we ultimately,
as we're making any small shifts in there -- in and
around other areas, if we need to break up this very long
210 corridor, that it's okay to do so, right? I -- if --
is that correct, Commissioner Sinay?

COMMISSIONER SINAY: Yes.
COMMISSIONER SADHWANI: Okay.

COMMISSIONER SINAY: I mean, I felt -- I feel like
it is --

COMMISSIONER SADHWANI: Right.

COMMISSIONER SINAY: But I wanted to see if -- I
didn't know if we all had agreed on that or not. I kind of felt like we were hemming and hawing on that last time. And so I guess that -- the question isn't so much for Jaime, but for all of us, yes. All right.

COMMISSIONER SADHWANI: And I would agree with that. I definitely agree with it.

CHAIR LE MONS: Commissioner Vasquez?

COMMISSIONER VAZQUEZ: You know -- never mind. I was going to give direction, but I thought better of it.

CHAIR LE MONS: Okay. I appreciate that.

Continue, Jaime.

We can't hear you. Can't hear you, Jaime.

MS. CLARK: I'm muted. Yeah.

If we could please look at page 80. Moving to page 80 of the visualizations.

This visualization hasn't changed much since you last saw it. It includes Bell Canyon, Hidden Hills, West Hills, Canoga Park, Woodland Hills, Tarzana, Encino, Sherman Oaks, Valley Village, Studio City, and Bel Air. It does have a change in this northern area.

There was a -- there was direction to keep the Poso -- or P-O-S-O-- COI intact. That's this change here. There's -- this is something that we could further explore in live line drawing. There is different definitions of how far north that goes. And it is
sometimes in conflict with COIs that are based in Van Nuys itself. So there's a question as to whether it goes to Oxnard Street or Califa Street. And right now, it's generally at Califa Street. Oxnard is a little further north.

Additionally, there was direction last time to look at moving Bel Air so that the Mulholland Drive border could be respected. We've heard a lot of testimony about that being the cutoff for Mulholland -- excuse me for San Fernando Valley as a whole.

And that change, it does -- would have bigger ripple impact in the San Fernando Valley. I did hear more information today about, like, not only where Bel Air could go. But also some other changes to this area, including potentially removing Studio City from this area. So if -- if the Commission wants to see a visualization with that, then all of these will be changing. I'm happy to explore that and present something to you with that next time.

CHAIR LE MONS: Commissioner Sinay?

COMMISSIONER SINAY: Jaime, we heard a lot of testimony about Mulholland, and we keep getting more testimony. And so I was just curious, when you said there would be ripple effects, can you give a high level what some of those effects may be?
MS. CLARK: Yeah. Absolutely. Thanks so much for that question. So removing Bel Air would make this -- right now it's called SSFV. Visualization again, we're looking at page 80 of the handout. That would -- that would make this less than negative 5 percent deviation. So then would need to pull from somewhere. This area, which we haven't talked about yet, West San Fernando Valley is also pretty close to negative 5 percent deviation. There's also a lot of COI input about keeping some of these areas together.

Additionally, this sort of Santa Clarita Valley based district, there's COI input and Commission direction to specifically keep these areas of San Fernando Valley with Santa Clarita Valley. So their individualization, as it is now, removing population from this San Fern -- S -- South San Fernando Valley district would just have different ripple effects, right? Would -- there would just be a population trait here ultimately, pulling population down, either from the East San Fernando Valley or the Santa Clarita Valley districts.

And I thought that -- that's something that absolutely easy to explore in live line drawing and also the -- I thought the Commission should -- should have, you know, more discretion in choosing what areas would --
would be moved. Because these visualizations, I didn't really get any feedback on, so I thought that maybe you liked them how they are.

CHAIR LE MONS: Okay. Thank you, Jaime. You can proceed.

MS. CLARK: Thank you so much.

Next is page 81 of the handout. This is WSFV, West San Fernando Valley. The 405 runs right here. This includes Reseda, Lake Balboa, North Hills, most of Panorama City, North Hollywood areas, Greater Valley Glenn Council, and most of Van Nuys, north of Califa Street.

Next, I'm moving on to page 82 of the handout. And this is the visualization ESFV, East San Fernando Valley. This includes Sylmar, Mission Hills, most of Panorama City, Arleta, Pacoima, the city of San Fernando, Sun Valley, city of Burbank, Foothills District, Sunland-Tujunga, and part of Angeles National Forest.

CHAIR LE MONS: Commissioner Sinay?

COMMISSIONER SINAY: Thank you, Chair.

Jaime, the San Fernando Valley business group. I forgot their name. And they identified one of VRA district focused on Latino majority. And I noticed that on our West San Fernando Valley, we were, you know, we were a 42, which isn't -- but did you explore that at all
to see if there was a potential majority/minority, if there's an BRA district in this area?

MS. CLARK: This visualization that we're looking at has Latino CVAP of 52.61 percent.

COMMISSIONER SINAY: Whoops. I was looking at the wrong one then. Which one -- okay. Sorry, I was at 81.

Thank you.

CHAIR LE MONS: You can continue, Jaime.

MS. CLARK: Thank you so much.

I am -- next is page 84 of the handout. This visualization includes these -- the following areas in San Fernando Valley: Northridge, Granada Hills, Porter Ranch, and Chatsworth.

And in Santa Clarita Valley, includes Santa Clarita, Stevenson Ranch, Val Verde, and Castaic. This has a percent deviation of negative 1.15 percent. This hasn't changed since you last saw it.

And moving on to page 85 of the handout. This is the last visualization I'll be presenting tonight. This visualization is page 85 of the handout. It includes Antelope Valley, and areas in Kern County that include California City, Edwards Air Force Base, Mojave, Rosamond.

And I'm going to zoom into this area just to show detail. There was a change here. This includes the
Tehachapi and Mountain Meadows area. And now includes Stallion Springs, Bear Vall -- Bear Valley Springs and Keene. And these were included for population purposes, working with Kennedy on this handoff area.

I'm just going to zoom back out to get a bigger picture. This is .86 percent deviation.

CHAIR LE MONS: Thank you, Jaime.

Are there any -- Commissioner Sinay?

COMMISSIONER SINAY: Thank you. There's two -- the -- there's two visualizations in Los Angeles. The north LA -- NLA, and a South San Gabriel Valley -- San Gabriel Valley. In both of them, I would -- are pretty high on the, you know, it's a -- it's a dense Latino population. And I was wondering if we could look to see if there's ways to spread the Latino -- the Latinos among the districts around them, as well?

MS. CLARK: I will do my best to do that.

COMMISSIONER SINAY: Thank you, Jaime.

CHAIR LE MONS: Thank you, Jaime.

MS. CLARK: And if there are any specific ideas, happy to hear about those too.

COMMISSIONER SINAY: Yeah, I'll look -- I'll look a little bit more, and maybe be able to give you some ideas tomorrow.

MS. CLARK: Okay. Thank you.
CHAIR LE MONS: Okay. So I do see some hands up. I do want to note that it's 7:26. I will be going to public comment at 7:30. So if your comment is germane to today, feel free to stay in the queue and talk to the Commissioners. If not, then tomorrow we'll have to pick up your comments on the Los Angeles map, because we do want to go to public comment at 7:30.

Commissioner Fernandez?

COMMISSIONER FERNANDEZ: Thank you, Chair. Actually, just really quick. Just kind of responding to Commissioner Sinay's comment about this area. I was looking at that area as well. But it -- it appears the surrounding districts are also high in Latino CVAP. So I think it's going to be very challenging. So it's -- I'm sure Jaime's up for the challenge. But it just seems to be a heavily Latino populated area.

CHAIR LE MONS: Thank you.

Commissioner Akutagawa?

COMMISSIONER AKUTAGAWA: Yeah. Jaime, I'm just curious. Because this could also have ripple effects too. Looking at the South San Gabriel Valley, I know it's a -- because it's in yellow, I'm assuming it's a VRA district. But I just want to reiterate again, Hacienda Heights, there's been lots of COI testimony that Hacienda Heights, Rowland Heights and Diamond Bar should be
together. I will say that they -- their profile does not match the profile of this current district. And I know that this is going to have ripple effects too.

I think Sivan is the one that's now doing the Orange County, LA, San Bernadino Area. Because that CNF visualization, I think that one is probably one of the oddest ones that I've seen, to be frank. So we don't have to talk about that today. But I think there's going to be ripple effects, if you move Hacienda Heights out.

CHAIR LE MONS: Thank you.

MS. CLARK: And I will look at it. Thank you.

CHAIR LE MONS: Commissioner Andersen?

COMMISSIONER ANDERSEN: Thank you. I agree, and I like that we're looking at Hacienda Heights, Woodland Heights area. This is back to the -- what Commissioner Sinay said about the switching population a little bit from the South San Gabriel Valley in the east, and Gabriel Valley. What I'd like to see is, if possible, if I guess is if La Puente went into the East South San Gabriel Valley. And then Azusa could go up into the forest one because, you know, that's the gateway -- it's a gateway city for a million minorities -- those minority programs into the Los Angeles Forest.

CHAIR LE MONS: Thank you. Commissioner Sadhwani?

COMMISSIONER SADHWANI: Thank you. Yes.
I actually -- we actually gave -- I think I gave the test -- the direction last week around this region of Hacienda Heights, Roland Heights, Diamond Bar, et cetera. I think we just need greater synergy here between LA, Orange County. I do think, to Commissioner Sinay's point, if we can figure out a right -- I -- words are escaping me at this time of night. The right -- architecture for that district, it might actually alleviate some of the -- these other VRA districts that look fairly packed.

The other area that I just wanted to go to really quickly is, back in the -- the San Gabriel Valley, we had received testimony from that region where it -- in Santa Clarita, where it dips down into the San -- sorry, the San Fernando Valley -- sorry, San Fernando. In San Fernando currently, I think we're dipping into, like, Chatsworth kind of areas, Porter Ranch. I believe we've received some testimony here about that Santa Clarita's more connect with Sylmar/Pacoima areas. But I think that -- that can -- that hits into some of the VRA considerations in the San Fernando Valley. So I wanted to raise that. I think it's something worth looking at and kind of playing around with to see what our options might actually be in that area. Thank you.

CHAIR LE MONS: Thank you. Commissioner Vazquez,
you'll be our final comment for today on this before
going to public comment.

COMMISSIONER VAZQUEZ: Thank you. I actually
strongly, strongly disagree with Commissioner Andersen's
direction to move Azusa into that, sort of Forest Gateway
visualization.

I just, Azusa is just such a -- it's very much part
of the San Gabriel Valley, in terms of the communities
that are there. Particularly, the Latinx communities,
second and third generation Latinx in particular. Very
working class. The school district there serves kids
largely from below the 210. And just -- they're very
much connected to the San Gabriel Valley portions.

I know that they are also a gateway into the Forest.
But I think the folks who live and work there and go to
school there, very much identify with -- with those whom
they're currently district -- visualized with currently.
So I just -- I really disagree with that direction.

CHAIR LE MONS: Thank you for that.

So with that, I'm going to switch over to Katie. I
want to thank our callers for waiting patiently.

And let's get right to public comment, please,
Katie.

PUBLIC COMMENT MODERATOR: Thank you, Chair.

In order to maximize transparency and public
participation in our process, the Commissioners will be taking public comment by phone. To call in, dial the telephone number provided on the livestream feed. It is 877-853-5247.

When prompted, enter the meeting ID number provided on the livestream feed. It is 845-9522-1762 for this meeting. When prompted to enter a participant ID, simply press the pound key.

Once you have dialed in, you will be placed in a queue. To indicate you wish to comment, please press star 9. This will raise your hand for the moderator. When it is your turn to speak, you will hear a message that says the host would like you to talk and to press star 6 to speak.

If you would like to give your name, please state and spell it for the record. You are not required to provide your name to give public comment.

Please make sure to mute your computer or livestream audio to prevent any feedback or distortion during your call. Once you are waiting in the queue, be alert for when it is your turn to speak. And please turn down, again, turn down your livestream volume.

And we will be giving a warning at 30 seconds, and 15 seconds remaining, of the two-minute public comment period.
We will be starting with caller with the last four, 0497, and up next after that will be caller 0645.

Caller 0497, if you will please follow the prompts to unmute at this time by pressing star 6?

The floor is yours.

CALLER 0497: Hi, can you hear me?

PUBLIC COMMENT MODERATOR: We sure can.

CALLER 0497: Awesome. Thank you so much for taking my comment. I'm a current -- I'm a resident of Chino Hills. Chino Hills is in San Bernadino County. But we've -- we have much more in common with North Orange County than the rest of San Bernadino County. Chino Hills and North Orange County, they have similar interests and concerns, such as high price of housing, traffic and infrastructure, and wild card issues.

We have unique problems, and I was disappointed to see Chino Hills separated from North Orange County in the most recent congressional lines. So let's keeps Chino Hills, Brea, Yorba Linda, and Anaheim Hills together in the next rendering. Thank you so much.

PUBLIC COMMENTER MODERATOR: Thank you. And right now we will have caller 0645. And up next after that, will be caller 1862.

Caller 0645, if you will please follow the prompts to unmute, the floor is yours.
CALLER 0645: Hi. Yes, thank you for having us and having so many meetings.

Yeah, so I -- I live in the 93550 area. I have a rental in a 93535 area. And it is the Antelope Valley. I -- I don't know if I'm seeing right or not, because I'm only on a telephone. But I -- am I'm still seeing that Lancaster -- parts of Lancaster is still not all together with the Antelope Valley, and also Littlerock?

Because we all commute all over the Antelope Valley. And then, we definitely commute to the Santa Clarita Valley, so you got to keep those together. And then we go into Simi Valley. So I hope I'm not seeing, like, the San Fernando Valley with us, because they really kind of have nothing to do with us. We -- we share the Santa Clarita Valley and the San Fernando Valley; I think have the Santa Susana Mountains separating them. But the Santa Clarita Valley, and the Simi valley have pretty much all the same common -- common, you know, the -- the demographics, the common -- the wildfires, the -- we share water, sheriff resources, the film industry, mileage and -- and just on and on. There's a lot of things that we share between the Antelope Valley and Santa Clarita Valley. And then the Santa Clarita Valley to the Simi Valley. So I just wanted to give that little excerpt. And I appreciate you having us.
Okay. And then I don't know if you can answer the questions that I had asked but, you know, where do I listen for those answers?

CHAIR LE MONS: We -- we will take your feedback into consideration, and note all of the points that you're making. We're not looking at the map you're referencing. So it's a little difficult to speak directly to that right now. But we have captured your feedback. And we'll make sure that it's incorporated. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much. And right now, we'll be going to caller 1862. And up next after that will be caller 2146.

Caller 1862, if you will please follow the prompts to unmute. The floor is yours.

Caller 1862, can you hear me?

CALLER 1862: Yes. Can you hear me?

PUBLIC COMMENT MODERATOR: We sure can. The floor is yours.

CALLER 1862: Okay. My name is Denise Robertson (ph). I live in the Central Valley. And I want to thank the Commission for all of its hard work, and the efforts you've put in to ensure the Central Valley is fairly representative.

And I wanted to take the time to say, I feel like
you got it right for the senate and the assembly lines in this week's visualization map. Specifically, the assembly handout pages 42, 43, 44. And just please keep on this direction, and keep our agricultural areas intact. And that's all I have to say. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much. And right now we will have caller 2146. And up next after that will be caller 2668.

Caller 2146, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 2146: Thank you. Good evening Commissioners. My name is Jeff Flores, president of the Kern High School District, Board of Trustees. Just for some context, our high school district is the largest district in the State, with 42,000 students. And we have a budget of 600,000,000. I myself represent a voting rights district. We have a majority ethnic majority district. And I'd like to make a few comments about VCD Madera-Kern. To me the latest visualization does not make sense. I believe they do a disservice to the Kern constituency that we represent. Our district's been navigating the pandemic. We've been dealing with mandates, learning loss, keeping our students safe, and many critical issues in education, and our district lines
represent -- and representation have given us effective voices in Washington every step of the way. We don't want to lose this structure.

Kern County is a unique community of interest with industries in geography, like aerospace, energy, military bases, and mining, and renewables, and logistics. We've spent a hundred million dollars in career technical education developing our future workforce and career pathways, and I just feel that the proposed maps would dilute the voices of Kern County residents by linking our county with Fresno, over two hours away to the north, with dissimilar industries and geographies. So I just urge the commission to keep this in mind as maps are developed and adopted. Thank you so much for the time to address your Commission.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 2668, then up next after that will be caller 3028. Caller 2668, if you will please follow the prompts to unmute at this time by pressing star six. The floor is yours.

CALLER 2668: Hi, so I'm a first generation college student at Cal State, Bakersfield. I think that the Kern/Fresno district is too geographically diverse to maintain equitable representation for all of our community interests, and for that reason, I think that
Fresno and Kern should not be linked together. That's all. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.

Okay, now we will have caller 3028, and up next after that will be caller 3220. Caller 3028, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours. Go ahead, 3028. Can you hear me?

CALLER 3028: Sorry. Hello, is it working?

PUBLIC COMMENT MODERATOR: Sure is. The floor is yours.

CALLER 3028: All right. Thank you.

PUBLIC COMMENT MODERATOR: Uh-huh.

CALLER 3028: Hello. I'm a student at Bakersfield College, born and raised in Bakersfield, and I don't think that Fresno and Kern County should be in the same district. The resulting district would be too large and far too geographically diverse to feasibly be represented as a single group. The people of Bakersfield have different needs than the people of Fresno, and the two districts should have separate representation. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 3220, and up next after that will be caller 5410. Caller 3220, if you will
please follow the prompts to unmute at this time by
pressing star 6. The floor is yours.

CALLER 3220: MR. SAYLOR: Thank you. My name is
Don Saylor. I'm in -- I live in Yolo County, have been
here since 1987. I want to thank you all for your hard
work. It's been a pleasure to watch the Citizen
Commission going through this -- this puzzle.

You're making some amazing progress in terms of Yolo
County's interests, and I -- you know, been very
responsive to our concerns and comments. I want to
especially thank Commissioners Fernandez and Toledo for
their comments today. We see Yolo County as a community
of interest, as a county in whole, and we think that
moving Benicia and Vallejo to Tehama District and having
Yolo County be united in the Solano District makes a lot
of sense. I know for a fact that the cities of American
Canyon and -- South Napa would welcome Benicia and
Vallejo to the fold.

The splits of Yolo County that are depicted on page
17 are problematic for several reasons. One of them is
that it separates a neighborhood called "El Macero" from
the rest of Davis. El Macero is a part of the Davis
School District, it's served by the water and wastewater
system of the city of Davis. You can't get from El
Macero to Sacramento or to Napa or anywhere without going
through the city of Davis.

This -- this division of the county also -- also splits the planning area -- the -- the general plan planning area of the city of Davis, and it splits the University of California, Davis campus area from the built area to their agricultural space.

It's -- it also splits rural communities aligned by the rural communities of Madison/Esparto from the areas adjacent to them that are farm country, and it says it right on the street line.

Thank you very much. I really appreciate the hard work you're doing. I'd like you to keep Yolo whole -- Yolo whole, include -- included in the Solano assembly district. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 5410, and up next after that will be caller 5454. Caller 5410, if you will please follow the prompts to unmute at this time. And the floor is yours. Hello, 5410? You were unmuted.

Caller 5410, if you will please press star 6 again, this will unmute you. Awesome. You are unmuted. Can you --

CALLER 5410: Can you hear me?

PUBLIC COMMENT MODERATOR: -- hear me? Yes, we can.

CALLER 5410: Yes.

PUBLIC COMMENT MODERATOR: The floor is yours.
FEMALE SPEAKER 8: Okay. Thank you. Hi, so my name is Carrie (ph.). I'm from the Central Valley, and I've -- I've been following what -- what's been going on for the last couple months for -- for a while now. And first off, I just want to say that I feel like Commissioner Turner and Andersen are correct and things don't need to be moved. Stockton and East Stanislaus County have nothing in common, and I feel like the Central Valley needs to be kept together just for the -- the community of interest. And you know, Commissioner Sinay's recommendation to tie East Stanislaus to Stockton would just completely disenfranchise the -- East Stanislaus from representation.

You know, I agree with Commissioner Turner that Riverbank and Del Rio should be put back with Stanislaus in order to keep community of interest whole. You know, Stockton does not need to be tied to Stanislaus. And again, I feel like by tying them together you're doing a disservice and completely disfranchising the voters of the Central Valley in this community, and it's -- you know, it's something not a lot of us are very passionate about, and I hope that's taken into consideration.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 5454, and up next after that will be caller 6278. Caller 5454, if you will
please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 5454: Good evening. My name is Nikki Nguyen, and I live in Garden Grove City. I want to thank you for your time; I know it is not easy.

I'm asking you to keep Little Saigon in Orange County whole and help to keep our families together. The new map does not make any sense by adding Costa Mesa and taking away Huntington Beach. Please keep Midway City, Westminster, Garden Grove, Fountain Valley, Los Alamitos, Huntington Beach, Seal Beach, and Rossmoor more together. That is where my family, my children, and friends live here. Our kids attended school here, our temple and church is here, so a parent and where my children go from Garden Grove to Huntington Beach for Vietnamese (indiscernible) education. Our schools, churches, medical doctors, and hospital that has Vietnamese language available are all within this area. Please don't split us apart. We would like to be able to have representatives who will work and fight this for us. Leaving us in (indiscernible) will just -- just lose us our voice. And again, please keep Midway City, Westminster, Garden Grove, Fountain Valley, Los Alamitos, Huntington Beach, Seal Beach, and Rossmoor together.

Thank you so much for your time. Well, thank you so much
and God bless.

PUBLIC COMMENT MODERATOR: Thank you so much.

Right now we will go to caller 6278, and up next after that will be caller 6491. Caller 6278, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 6278: Thank you. Thank you for your work, I know this is not an easy task. I'm Laura Lee Martin (ph.). My comments are regarding the Monterey Bay region.

I've lived in Santa Cruz County for over thirty years, and I'm distressed by the preliminary visualizations that divide Santa Cruz County into several parts and separate us from Monterey County. The images radically change what previous districting efforts have established, and the conclusions of the last reapportionment commission and legislative bodies before them. They all kept the integrity of Monterey Bay together. It makes no sense to split our county from Monterey County or to split Santa Cruz County into disconnected regions.

The watershed in Monterey Bay is one contiguous community of interest in one economic region. This is easily demonstrated by school sports leagues, cultural programs such as our symphony and theaters, economic and
professional associations, our specialty agricultural industry, growing crops in our microclimates on the coast, or academic institutions, and our world-class marine research consortium that rings around Monterey Bay.

The preliminary redistricting visualizations are dividing significant communities of interest in ways determinantal to our health and safety as well as our cultural and economic links. Any adjustment to the current districts -- assembly, congressional, and state senate -- should move further east or south to accommodate the population change. Moving inland from the coast of Monterey Bay makes more sense than linking us north to a major metropolitan district in Silicon Valley and up to San Francisco.

Santa Cruz County residents who drive north to Silicon Valley refer to this as going over the hill. When disasters hit, we are literally isolated. I have five reasons that I've submitted, but two that I want to just mention here. One is the emergency response: our firestorms, our earthquakes, our floods. We are literally cut off from San Jose and anything north. Our regions connect together, and our economic ties around the crescent are world-class institutions. Thank you so much.
My last comment is just that somebody commented about the Highway 17 corridor linked to Los Gatos. That's not a community of interest; it's a way for --

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 6491, and up next after that will be caller 7883. Caller 6491, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 6491: Hi, good evening. My name is Emily Ramos (ph.). As a lifelong community -- community member of Highland Park, I think that it's important to keep Northeast L.A. and other eastside communities together. Our communities share many common interests, and we believe we should be inside within the same congressional district.

We believe that Eagle Rock should remain part of our district as -- as well as parts of Highland Park, continue to be together with Congressional District 14. Thank you and have a good evening.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 7883, and up next after that will be caller 8091. Caller 7883, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 7883: Thank you for having me today,
commissioners. My name is Jack (ph.), and I have lived
in Long Beach for the past two years. Long Beach is a
place that has something for everyone, especially from my
perspective as a member of the LGBTQ+ community.

I wanted to call in today to voice my deep concerns
about the most recent congressional visualizations that
include the city of Long Beach. These new visualizations
are disenfranchising the LGBTQ+ vote and voice. We have
made so much progress and this map puts us back. It's
not acceptable to our community.

Recently, Equality California presented to the
Commission and identified Long Beach as one of the most
populous communities in the state with a concentration of
LBGTQIA+ culture and gay-focused businesses and
residents. The most recent map splits our community down
the middle and disconnects our historically gay
neighborhood from our downtown and from Long Beach
communities to the north that also have many gay-friendly
businesses.

All -- all across our city, from the shoreline and
Retro Row, to downtown, and up to where I live on the
east side, we have businesses that represent our needs
and interests. I strongly support keeping our city in as
much of the same district as possible in the next
visualization, and I encourage the Commission to use the
Equality California map as a guide to unite our community in our city.

Long Beach is a diverse community and one that -- that's closely knit, and that community collaboration and culture has created an incredible sense of place which I am proud to call home. I join my neighbors in asking the Commission today to keep Long Beach together as the previous Citizens Redistricting Commission has done so that we keep our unique culture and identity intact. Keeping us in a single district will allow us to organize and ensure our rights as LGBT people are -- and that we're respected and advocated for at all levels of government. I know you have a lot of work ahead of you, and I thank you for your service and for this opportunity to speak.

PUBLIC COMMENT MODERATOR: Thank you so much.

Right now we have caller 8091, and up next after that will be caller 9069. Caller 8091, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 8091: Hi, I'd like to first thank the Commission for all their hard work and for hearing my comment.

I'd just like the Commission to consider that combining the two most populous agricultural communities
in the state that link the representation of farmers and
farm-working families, Fresno and Kern County should have
separate representation in the next visualization. Thank
you again.

PUBLIC COMMENT MODERATOR: Thank you so much.

And now we have caller 9069, and up next after that
will be caller 9745. And as a reminder to all of our
wonderful participants out there, the line will be
closing at 8 p.m.

Caller 9069, if you will please follow the prompts
to unmute at this time by pressing star 6. The floor is
yours.

CALLER 9069: Thank you so much. My name is Lisa
(ph.), and I live in Valencia. I'm a sixteen-year
resident and wish to state that I do not approve of Simi
Valley being part of Santa Clarita.

The city of Santa Clarita council members are bowing
to political pressure by advocating for placing Simi
Valley back in the district. Considering that the city
of Santa Clarita is knee-deep in litigation for its
refusal to abide by the California Voting Rights Act,
their input is inappropriate and irrelevant. The
Commission has worked hard to ensure voting rights are
fair and properly represent the community interests of
our city, and the current visualization map of Santa
Clarita demonstrates this, and I thank you very much for your hard work.

Additionally, adding another city exceeds the population requirements under the California Constitution. As a registered voter in Santa Clarita, I ask that the Commission take serious consideration of the legal problems that the city of Santa Clarita is involved as anything they have to say is stained by their refusal to follow the California Voting Rights Act.

I want to thank you very much for all your hard work and appreciate the time. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 9745, and up next after that will be caller 3496. Caller 9745, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 9745: Hi there. My name is Gail Pellerin, and I served as the county clerk register of voters for twenty-seven-and-a-half years before I retired this past December. This is actually my fourth redistricting, having worked for the state legislature in 1990.

First, I want to thank Karin Mac Donald and her amazing female mappers and David Becker for serving as experts on this very important democratic process.

I also want to thank the Commission for all your
hard work and for keeping Santa Cruz and Monterey counties together at the senate level in your latest visualization. And I want to express how important it is to do the same thing for our assembly and congressional districts. The Monterey Bay is a community of interest on many levels: environmental, educational, agricultural, and disaster awareness and prevention.

As a region, we share our commitment to preserve our Monterey Bay. We share a watershed, we have shared community-based organizations such as AMBAG and Central Coast Community Energy. Our community colleges feed into UCSC and CSUMB. We share experiences dealing with disasters such as fires, flooding, drought, earthquakes, and other impacts of climate change, and we are bound together by our geography. Splitting our small, unique county into three assembly districts is not in the best interest of our residents and divides our communities of interest.

I believe Commissioner Sinay questioned splitting up our county as well this evening, so thank you for that.

I strongly urge you to take another look at Santa Cruz and Monterey counties to preserve our (audio interference) of interest when you release the draft maps for the assembly and congressional district lines. Thank you so much for your time.
PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 3496, and up next after that will be caller 1270. Caller 3496, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 3496: Good evening, Commissioners. This is Karen Goh, K-A-R-E-N G-O-H. I'm mayor of the city of the Bakersfield. Thank you for the opportunity to speak.

As mayor of Bakersfield and a long-term resident of Kern County, I believe that Kern and Fresno counties should not be linked. The current visualization of congressional lines combining Kern and Fresno do not take into account our very different communities of interest. The energy sector is a core industry in Kern County not shared by Fresno County. The line should keep Kern's vital community of interest together.

Bakersfield and Fresno/Clovis are the two largest cities in the Central Valley. In fact, no other city is close to their size until you go 200-plus miles north to Stockton/Sacramento. It is possible to not split these cities in a way that one member of congress represents a large piece of each of these very distinct cities separated by over 100 miles of highway. Commissioners have made it clear that they don't want to split up Sacramento or Stockton, so it certainly would make the
same sense to not split Bakersfield and to not split Fresno/Clovis. I ask that you keep our communities of interest together by not linking Kern and Fresno counties. Thank you again for your willingness to listen.

PUBLIC COMMENT MODERATOR: Thank you so much.

And at this time, we have caller 1270, and up next after that will be caller 4828. Caller 1270, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 1270: Hi. Good evening, Commissioners.

Thank you for your time and thank you for the work that you've put into these visualizations. As you have heard several callers today saying that they have no commonality with Stockton, I, however, am here to advocate for -- please give us Stockton back. I'm calling from Brentwood, I live in East Contra Costa, and there is more commonality between the farmers in the delta south of Mokelumne River than in the valley districts of North Walnut Grove.

For decades, Antioch/Brentwood/Oakley has been the (indiscernible) for shipping, fishing, and recreation into Stockton. The sailors left and right of the delta frequently travel back and forth through the area to Stockton. There is less equestrian terrain or
constituency northwest of the Sacramento River than we have south of the Mokelumne.

We also have no commonality with the cities in Yolo County as far north as Rumsey -- I'm calling to -- and as far as west as Orinda. This visualization of VCD_CONCORDTR_1102 does not work for many reasons similar to the pri -- previous callers have highlighted. We need to keep these communities that rely on the San Joaquin Delta together. Right now, the visualization that you published today is -- is not manageable, and it has so many different communities that have no commonality. And there's no way to have a strong, healthy delta and keep these communities intact with a common visualization. A visualization from 10/27 called "East Contra Costa" was perfect. If we could go back to that, we would all really appreciate it. Thank you again for your time.

PUBLIC COMMENT MODERATOR: Thank you so much.

And now we have caller 4828, and up next after that will be caller 2252. Caller 4828, if you will please follow the prompts to unmute at this time by pressing star 6. And one more time, caller with the last four -- 4828, if you will please follow the prompts. The floor is yours.

CALLER 4828: Hello?

PUBLIC COMMENT MODERATOR: Hello. The floor is
CALLER 4828: Good afternoon. My name is Jeremiah. So the Commission's directions are great. San Gabriel has been unified and so has Northeast with the exception of Eagle Rock. Eagle Rock is part of the Northeast and should unify with the rest of the congressional district. Echo Park and Silver Lake share many common interests and populations, and should be considered a community of interest along Sunset Boulevard. They should be unified with the Hollywood Congressional District. That's about it. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 2252, and up next after that will be caller 9316. Caller 2252, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours. Caller 2252, if you will please mute your livestream audio, and now, again, press star 6 to unmute. The floor is yours.

CALLER 2252: (Spanish-speaking caller).

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 9316, and up next after that will be caller 6654. Caller 9316, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 9316: Hi, I'm calling because -- I'm just
calling on behalf of the communities of Northeast Los Angeles, and specifically Highland Park and Eagle Rock, and I would like for those parts of Northeast Los Angeles to stay unified with the rest of the congressional district. The map seems to split them up into the two different valleys: San Gabriel and San Fernando, and we have nothing in common with those communities, and it just seems a little unfair to the people living there that you're trying to split them up like that.

You know, for the assembly visualizations, the Northeast has been, you know, like I was saying, split up, and there's a high -- there's still -- although you may not believe -- a high population of Latino population here in these communities, and you know, we're hopefully opening -- wanting to create an -- an extra -- a seat for our Latino population and continue the representation that we're trying to cling on to. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 6654, and up next after that will be caller 2716. Caller 6654, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 6654: Hi, commissioners. Thank you for the opportunity to provide feedback on today's visualizations. My name is James Robinson, and I'm
calling from Long Beach as a long-time resident and a
business owner in the downtown area.

My community and I have been following the updates
from the Commission, we are very interested in keeping
our city together as much as possible. After seeing
today's congressional visual -- visualization, which tear
apart our downtown community from much of the city, and
I'd like to share my deep disappointment in these
renderings. We have been consistent in asking to stay as
intact as possible and many of our community members have
engaged in this process since the very beginning. Having
followed many of the meetings of this Commission, we do
not recall a single commissioner giving directions to
completely split our city. We also have not heard a
single Long Beach resident ask to split our city in any
way.

We ask that the Commission work to put us back
together in a single congressional district. We believe
asking to keep downtown Long Beach connected with the
rest of our coastline and the rest of our city is a
reasonable request that unites our residents, small and
large businesses, communities, and nonprofits. Downtown
Long Beach represents the core of the city and anchors so
much that happens at our university, CSULB, Long Beach
City College, and business organizations throughout our
community. Please restore the Long Beach map to the way things were before today's visualizations. Thank you for hearing our calls in the past, and thank you for your work this week.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 2716, and up next after that will be caller 7175. Caller 2716, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 2716: Hello, my name is Connie Ramirez. I am from Merced County, Senate District 12.

Based on the current visualization presented, this is not reflective of what we would like to see. It is analogous to the previous redistricting. It dispreserves (sic) Latino voting power for both sides of the coastal range from Merced County and Monterey County. This map and the map surrounding it makes sure that seats in the Central Valley that are reasonably expected to be Latino won't be reduced; right now it's two, and these maps keep it that way. Thank you very much.

If they get split up, they get lumped in with other areas and leave the power that they have when kept together. Thank you so much for your time and consideration, it's been a long night. So thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.
And right now I'm going to caller 7175, and up next after that will be caller 2638. Caller 7175, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 7175: Hello there. Thank you, commissioners. This is Jeremy Payne with Equality California, the nation's largest statewide lesbian, gay, bisexual, transgender, and queer civil rights organization, LGBTQ+.

I am here to bring attention to an assembly district down in San Diego where, over the last decade, LGBTQ+ San Diegans in Assembly District 70 have been able to repeatedly elect candidates of choice, two of whom went on to make history when they were elected to higher offices. But in the current batch of visual -- visualizations for this general area, they have removed South Park, Golden Hill, and downtown San Diego from the historic LGBTQ+ communities in San Diego that surround Balboa Park; those include the Mission Hills, the Bankers Hill, the Hillcrest, University Heights, North Park, South Park, Normal Heights. And then the downtown San Diego region, including Little Italy, the Gaslamp District, add the regions to Golden Hill.

And as this is done, it dilutes the LGBTQ+ community's power to elect candidates of choice, and for
the LGBTQ+ communities, these neighborhoods have served as major building blocks of community organizing and leadership, as I've shared in my previous presentation. And these neighborhoods have a long history of voting (indiscernible) to elect candidates of choice, as I mentioned at the beginning of my public comment.

Quite simply, I'd ask that you please do not remove the residents of South Park, Golden Hill, and downtown San Diego from the greater LGBTQ+ community of San Diego. It is paramount that the LGBTQ+ community kept together as much as possible.

I recognize that this may be require -- this may require some cutting in other areas in the visualization to kind of make room for those residents, and I would urge the Commission to remove some of the northern end of the visualization which shares far less in common with the historic LGBTQ+ communities that I mentioned before. Thank you so much for all your work, and look forward to seeing the draft map in the coming weeks.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 2638. If you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 2638: Hi, this is Bill (ph.) (audio interference). I'm calling from Oakhurst. I represent
Mountain (audio interference. We're a group of loosely affiliated folks that represent the -- the portions of -- of Fresno County and Madera County. And we're happy to see that the map has changed, but we're not (audio interference) represented by a member of the -- of the group (audio interference) that's up -- up towards Sacramento that you have down now into Fresno.

So what we're concerned about is the -- the communities of Oakhurst and -- have nothing to do with -- with what's going down in -- in Kern County. And also, we're in the Central County (audio interference) Mountains, whereas this part of the district that we're in is in the Southern California coastal range, and we're in the Central California Eastern range near Mammoth Mountain and Yosemite. There's no community of interest between our two communities. We do our shopping and our medical care is in -- in Madera. In Clovis and Fresno we have nothing to do with -- with Kern.

What's interesting in (indiscernible) presentations earlier is we're seeing on four visualizations in the Central Valley combined for nearly a hundred (audio interference). (Audio interference) after ours failed so miserably in drawing these numbers so low. And what they're trying to accomplish, it looks to me, based on the first vis -- visualization. Now the second
visualizations, there's lots of games being played. The reality is in the past we were represented by a member of congress from Fresno/Clovis area that we could go and visit. For the last ten, twenty years, we've had to go to -- all the way up to Sacramento. That doesn't make sense. It'd be very simple to -- to adjust districts, to increase the populations on all these floor seats to make them more whole -- and more compact, and we'd hope that you would do that. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much. And Chair, at this time, we are up against a break. CHAIR LE MONS: Okay, we will go on and take our break now. And callers, we'll be back at 8:29 to continue public comment. (Whereupon, a recess was held) CHAIR LE MONS: We want to thank the 220 commenters that sent in comments via form throughout to date -- throughout the day today and encourage people to continue to do so. With that, Katie, let's get back to public comment. Thank you so much.

PUBLIC COMMENT MODERATOR: Thank you, Chair. Caller 8050 will be the first, and after that will be caller 9744. Caller 8050, if you will please follow the prompts to unmute at this time by pressing star 6.
The floor is yours.

CALLER 8050: Good evening, commissioners. My name is Noel Hacegaba, and I'm calling to represent the Port of Long Beach tonight.

First of all, thank you for the opportunity to share the disappointment with this week's congressional visualization. The Port of Long Beach has consistently shared how important it is to keep Long Beach whole. This week's congressional map separates a downtown and west side of Long Beach where our port is located for much of the city. As an organization that is rooted in our community but works across the city, I cannot overemphasize how important it is to keep the city of Long Beach together. Our port, for as long as I can remember, has never -- I mean, never -- been separated from the Long Beach coast. It would be devastating for building community support and partnerships.

We're also very mindful of goods movement, shipping, and the way that these impact the local community. That is why we partner with Cal State University, Long Beach on the east side of the city on curriculum and have a robust internship program for local students, too.

So I urge you to please keep Long Beach together just as the independent Commission did so ten years ago. We are grateful the State Assembly and the senate vis --
visualizations kept Long Beach mostly together. Please look to those maps as models for remapping our congressional lines. Congress is vital to our port and our ability to build a world-class port together, so I urge you again not to separate us from our coastline. Please keep Long Beach together. Again, thank you for your time and your service on this Commission.

PUBLIC COMMENT MODERATOR: Thank you so much.

Up next will be caller 9744, and up after that will be caller 0073. Caller 9744, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 9744: Hi, thank you, good evening. Thank you for taking comments. My name is Ann Moore (ph.). I live in the city of Hesperia. I wanted to thank you for hearing from our community today.

I also want to thank you for keeping San Bernardino County/High Desert mostly whole at the assembly, senate, and congressional level. Although, I will be honest, I'm not thrilled to see us grouped with L.A. County at the senate level. A lot of folks who live up here have felt that, over the years, we're the redheaded stepchild whenever we get lumped in with L.A. County. This has happened a lot over the years, and usually they split up us -- split us up as well. So I wanted to call and urge
the Commission to not repeat history, and keep us
together and separate us from the Antelope Valley. Thank
you so much for your time, and have a good evening.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now, we will have caller 0073, and up next
after that will be caller 7994. Caller 0073, if you will
please follow the prompts to unmute at this time. The
floor is yours.

CALLER 0073: Hi, commissioners. My name is Mike Ai
with Equality California, the nation's largest statewide
LGBTQ+ civil rights organization. I'm calling to ask the
LGBTQ+ community's interest in the Coachella Valley be
kept together.

LGBTQ+ community of interest in the Coachella Valley
is large, vibrant, united both physically by the urban
and geographic landscape of the Coachella Valley, and
culturally by the flourishing number of LGBTQ+ businesses
and organizations in the valley that are frequented by
members of our community. They also have a clear,
consistent history of electing candidates of choice, both
LGBTQ+ leaders and allies who are responsive to the
community at the federal, state, and local levels.

We recognize that there are VA -- VRA issues that
keep the entire valley from being united, but we ask the
Commission do everything possible to keep the valley
together. We think this visualization does a good job of teaching -- keeping the Coachella together, but it also notably has a 7.85 percent deviation as a result of the -- as a result of pulling in the large spots of San Bernardino County to the north.

As you look to reduce the geographic and population size of this visualization, we urge you to remove areas of -- from the north rather than splitting the Coachella Valley any further than it already is. It is paramount that our LGBTQ+ communities can be kept together. Thank you so much.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 7994, and up next after that will be caller 0793. Caller 7994, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 7994: My name is Tom Edmonds, E-D-M-O-N-D-S, and I'm calling regarding the Central Valley. We did not want to be part of -- I live in Bakersfield, and we don't want to be part of Fresno. It's two hours from where we are, and in certain times of the year we have tule fog that would make it extremely dangerous for the representatives to cover the region. Two hours driving in tule fog on Highway 99 is not a fun thing.

And the cities are totally different. The only
thing we have in common with Fresno is that we're both agricultural regions; so we don't need to have our representations skewed. Thank you very much for your work, and I appreciate the consideration. Thank you very much. Have a good night.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 0793, and up next after that will be caller 7296. Caller 7 -- caller 0793, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 0793: Good evening, commissioners. My name is Kimberly (ph.), and I live in Pinon Hills; it's a rural community in the San Bernardino County High Desert where I refer to it as where the Mojave meets the mountains.

So currently, our Assembly member is from Antelope Valley, while our neighbors in Phelan have a Victor Valley Assembly member. I really wanted to thank you for keeping us in San Bernardino County in the new assembly and congressional maps. While Pinon Hills on the county border, we really don't share anything with Antelope Valley. I appreciate that we will have the same Assembly member with our neighbors moving forward since we're so similar.

We don't ever go to the Antelope Valley. Our only
way to get there is by driving on Highway 138, which is a
two-lane road; it's very dangerous; lots of deaths, lots
of accidents. My neighbors and I all travel into
Hesperia and Victorville when we need anything we can't
get in town, and it just doesn't make sense to have a
representative so far to the west in Antelope Valley. So
I appreciate you recognizing this in these maps.

Please continue the good work of keeping our
community in San Bernardino County and not in L.A. Thank
you for your time.

PUBLIC COMMENT MODERATOR: Thank you so much.
And right now we have caller 7296, and up next after
that will be caller 4205. Caller 7296, if you will
please follow the prompts to unmute at this time by
pressing star 6. The floor is yours.

CALLER 7296: Good evening. This is Deanna Kitamura
with Asian Americans Advancing Justice - Asian Law
Caucus, and also with the AAPI and AMEMSA State
Redistricting Commission. Thank you for making a lot of
good changes.

In the South Bay, I've mentioned before that there's
a long, existing Japanese American COI in South Gardena
that goes down through Torrance. I heard one
commissioner this evening give instructions to separate
all of Gardena from Torrance at the assembly level.
Please do not do that. It is also split at the senate level. An easy fix is to cut Gardena just above Marine. We worked out this split with The Black Hub.

Next, I want to go to the San Gabriel Valley. There are a lot of issues with how the Asian American COI in East San Ga -- San Gabriel Valley is treated. I appreciate hearing commissioners trying to keep the COI whole and fixing it so that it's not with March Air Force Base in Temescal Valley in Riverside County. I want to point out that at the senate level, the COI -- COI is drawn in with cities in South Orange County. While East SUB (ph.) has some similarities with Chino Hills and maybe with some North OC cities, it does not have similarities with South OC.

The API COI in West San Gabriel Valley in the senate visualization -- visualization is drawn in a gateway city's district. The API COI in West San Gabriel Valley should be in a West San Gabriel-Valley based district.

For metro L.A., my colleague has sent shape files for all the Asian American neighborhoods as defined by community members. The community's definition of Koreatown is cut in all three visualizations. The Chinatown's community's definition of Chinatown is cut in the assembly visualization.

I heard commissioners ask about the Punjabi and
Hmong COIs in Fresno. They are split. My colleague will be sending you shape files for those COIs and more details later. Thank you so much. Bye.

PUBLIC COMMENT MODERATOR: Thank you.

And right now we have caller 4205, and up next after that will be caller 8013. Caller 4205, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 4205: Thank you, commissioners. The petition for exception of Eagle Rock. Eagle Rock is and it's unified with the rest of the congressional district. Echo Park and Silver Lake very common interest in operations and serve community of interest on. (Audio interference). Again, I repeat, Eagle Rock. Thank you so much, and have a good evening.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 8013, and up next after that will be caller 8226. Caller 8013, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 8013: Yeah, hello, I'm from -- I'm from Stockton; I've lived here about fifteen years. And I want everybody to know Stockton has to be kept whole. I
don't like these comments about Stockton not being whole.
We've been cut up too much over the years, it's time for
our community of Stockton -- we're a big city, we need to
be stay -- we need to be kept together. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.
Right now we have caller 8226, and up next after
that will be caller 8499. Caller 8226, if you will
please follow the prompts to unmute at this time by
pressing star 6. The floor is yours.

CALLER 8226: Hi, I'm a thirteen-year resident of
what I think is the best that California has to offer, a
city with diversity, culture, and grittiness; that's
Oakland, California. I'm a former teacher in Oakland, a
board member on nonprofits, and a volunteer in my
neighborhood. And I'm calling to draw your attention to
two visualizations tonight: the East Bay and Oakland.

You know, sometimes the loudest voices are the ones
that tell you to change things, but I'd like to thank the
leaders in the Commission who have listened to Oaklanders
who have -- who have actually supported these great
visual -- visualizations. There are a few key components
that I appreciate. First of all, you've kept together
the bay waterfront and the 8 -- 80 and 880 corridors,
which are very important. Second, our each -- our East
Bay regional parks are what bring us together as East
Bayers. What we don't have much in common with is those who are across bridges and through tunnels.

We -- we like to keep our East Bay and Oakland community together. Ten years ago the -- the Commission did a great job of -- of setting up this community of interest, and I want to support that going forward.

Thank you for your service.

PUBLIC COMMENT MODERATOR: Thank you so much.

Right now we have caller 8499, and up next after that will be caller 5428. Caller 8499, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 8499: Hi. Yeah, our cultural communities of interest in Kern and Fresno counties are not (indiscernible) and cannot be well represented in the same district. That is all. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 5428, and up next after that will be caller 0816. Caller 5428, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours. Caller 5428, can you hear me? Might want to double-check and make sure that your phone is not on mute as you are unmuted in the meeting. Now you are muted. Caller 5428, if you will again follow the prompts to unmute by pressing star 6.
There you are. The floor is yours.

CALLER 5428: All right, finally. Thank you, commissioners, for spending your night with all of us.

As -- I want to speak to VCD_NORTHCONT. As a forty -- as forty-five-year residents of Concord, we've seen at least four versions of this congressional map. I'm calling to thank you for this version, this visualization; it contains the energy sector in the Bay Area: five refineries, and the communities most impacted by that industry. As this industry transitions to greener production, it's important for the citizens and the representatives to guide them. To have one congressman who picks up the refinery in Benecia and represents the whole industry gives us a member of congress who's familiar with the jobs and the community members that hold them. Thank you for keeping this important sector of our economy whole.

PUBLIC COMMENT MODERATOR: Thank you so much.

Right now we have caller 0816, and up next after that will be caller 4397. Caller 0816, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 0816: Hi. Thank you, commissioners. My name is Susan, and I'm calling from Long Beach. I'd like to join others who have reached out to the
Commission today and express my frustration with the most recent maps that have been released of visuals in Long Beach congressional district.

For this entire redistricting process, my community and I have been incredibly consistent about asking this Commission to keep us together. We think that this is a reasonable request for a city of our size, and it is supported by businesses, residents, and community groups of every kind across Long Beach. This is why it felt, frankly, baffling to see this visualization as it is run aligned right down the middle of our city. This border makes no sense for our neighborhoods or residents. And more importantly, it deprives us of our wish to be kept whole.

I also have no memory of anyone on this Commission requesting we be split in half. In fact, most of you have spoken in support of keeping Long Beach together; something I want to thank you for. Please restore the Long Beach maps to the way you had them previously visualized, with our city whole. Please do not support visualizations that split the Long Beach. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 4397, and up next after that will be caller 329 -- 3290. Caller 4397, if you will please follow the prompts to unmute at this time by
pressing star 6. The floor is yours.

CALLER 4397: Hello. I want to thank you for the opportunity to share my thoughts. I'm a lifelong resident of the city of Clovis in Fresno County, and I was surprised to see that the current visualization has one representative covering an area that spans from beneath Kern County all the way up to Oakhurst. That's a large geographical area prohibit an effective representation in my community of interest.

One member of congress has not represented Bakersfield and Fresno and Clovis in over fifty years because Fresno and Clovis have distinct issues and situations that are very different from those in Bakersfield and Kern County. Clovis is two and a half hours away from Bakersfield, and it would be very difficult for citizens in our area to get to their representative if it was all the way in Bakersfield. And I think that Clovis and Fresno should be drawn into a district with communities that are more similar to us, like maybe parts of Madera County. Drawing more compact districts that don't span hundreds of miles is something that I would request that the Commission could do, and it should be done.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 3290, and up next
after that will be caller 5600. Caller 3290, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 3290: Good evening, commissioners. My name's Samantha Mehlinger. I'm calling in from Long Beach where I've been a lifelong resident, and I'm calling to oppose the congressional maps that were up for discussion this evening.

My community and I have been following this process very closely throughout, and many of us have called over the months to make sure that Long Beach was kept together, and we would really like to respectfully ask that the Commission not support the maps that would break us into multiple districts. We've been consistent in expressing this desire and concern, and we probably have -- have the largest community engagement of any city in the state. On top of this, we don't remember a single commissioner giving any direction to split us in half, so we were all pretty shocked to see those maps today. And I've just appreciated hearing so many of my fellow community members speaking about the similar concerns, and -- I'm -- I'm glad that you've listened to us up until this point, but we really think keeping Long Beach together is a reasonable request, and that it's universally supported across our community. It unites
residents from every neighborhood in our city, our
business community, nonprofits, civil rights groups, and
other community-based organizations. Most of us have
called and written in to show that we are united in this
request. We, again, please ask you to please restore the
Long Beach maps to the way that they were before. We
need to be kept together. Thank you for recognizing our
comments from earlier, and please keep our city whole.
Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 5600, and up next after
that will be caller 5658. Caller 5600, please follow the
prompts to unmute at this time by pressing star 6. The
floor is yours.

CALLER 5600: Good evening, commissioners. My name
is Herlinda Chico. I am a long-time Long Beach resident,
and -- and I'm very proud to serve as vice president of
the Long Beach Community College District Board of
Trustees.

I'm calling to express my deep concern with the
fourth round of visualization the 2020 Citizens
Redistricting Commission released earlier this week.
Long Beach City College is one district with two college
campuses. These maps propose -- propose to put each of
our Long Beach Community College campuses in different
congressional districts. With all the great work that we've been doing at the college around equity, justice, and inclusion, this proposal to split our college district will not serve our students well. Our campuses must be kept together in this redistricting process to ensure we can work with our congressional representative to support federal grants that will expand opportunities for student success.

Over the past several months our students, community members, and board members, including myself, have called in to voice our preference for Long Beach to be kept as whole as possible in our state and federal legislative districts. Please do not dismiss our voices. We know our community, and this would be very detrimental to it. Long Beach City College is the fifth largest single college district out of the 116 colleges in the statewide system. We are nationally recognized -- we are a nationally recognized institution of higher education within the California Community Colleges system, and we maintain a hyper local focus and work closely to bring students in from the greater Long Beach area. We rely on your -- our ability to organize with our state and federal partners to fund some of our most important programs, including the Long Beach College Promise, our economic and workforce development programs, and our
career pathway program. I urge --

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 5658, and up next after that will be caller 8885. Caller 5658, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 5658: Hey, good afternoon, commissioners.

My name is Danny; I'm calling in from Long Beach. I just want to say thank you for being so patient and listening to all of us and putting in the effort tonight to review all this and also listen to all of us. So thank you.

With that being said, I do want to express, truthfully, my disappointment in the congressional maps that were released late last night. Our community has been consistently asking to stay together as a city, and we've been encouraged that Commission staff has summarized their feedback as such, and I think we've even heard commissioners support us as well. It seemed to me that we were on the same page, which is why that congressional map that we were looking at this week feels like it really came out of left field. I'm not sure where this came from, but it doesn't represent our community, it doesn't represent Long Beach, so we ask that you please restore the Long Beach maps to the way things were before. It's important that Long Beach is
kept together; it's important to all of us as a
community. Thank you very much for listening.

PUBLIC COMMENT MODERATOR: Thank you so much.
And right now we have caller 8885, and up next after
that will be caller 6688. Caller 8885, if you will
please follow the prompts to unmute at this time by
pressing star 6. The floor is yours.

CALLER 8885: Hi, I just want to thank you guys for
your continued work on these maps. My name is Gavin; I'm
a resident of Fresno, born and raised.

Again, you guys have done a tremendous job,
especially on the assembly maps in the San Joaquin Valley
released this week. They look really good particularly
in the city of Fresno. In these maps, you anchored a VRA
district in the city of Fresno, which is, you know, what
the commissioners urged last week during the overview of
the last visualizations. Unfortunately, the
congressional maps don't reflect the same logic and fail
to -- fail to incorporate the changes that commissioners
recommended.

Now, as the assembly maps reflect, the city of
Fresno should be split into two different congressional
districts with the VRA district anchored in the city of
Fresno; that includes the city of Fresno south of Shaw
and west of that -- west of the 99 in a separate district
that includes Northeast Fresno. This ensures that the
Latino communities of south of Shaw and west of 99 are
represented together in one district.

The current congressional maps split the city of
Fresno into three districts instead of two. This will
dilute the Latino community in Fresno and prevent them
from electing a candidate of their choice. This likely
does not meet the VRA obligations the Commission is
required to follow.

Commissioner Kennedy last week asked for a Fresno-
based VRA district that did not go beyond Fresno, Madera,
and Merced, which was not accomplished in
these congressional maps.

Commissioner Fornaciari asked for a Southwest
Fresno-based VRA seat, which was also not entirely
accomplished in these congressional maps.

Commissioner Sadhwani last week said that the
Commission needs to untie the knot in the Central Valley,
and I think she is absolutely correct.

Again, the Commission should apply the same logic to
the congressional seats as they did with the assembly
seats as it relates to the city of Fresno and the Latino
community. Thank you so much.

PUBLIC COMMENT MODERATOR: Thank you.

And now we have caller 6688, and up next after that
will be caller 8037. Caller 6688, if you will please
follow the prompts to unmute at this time by pressing
star 6. The floor is yours.

CALLER 6688: Thank you. My name is Stacy Fortner,
and I'm calling regarding the Santa Clarita/Antelope
Valley congressional visualization.

The very first caller of the night made some very
patently wrong statements, and I felt like I needed to
correct the record. I'm a member -- or I was a member of
the Groundwater Sustainability Advisory Committee, so I
know where our water goes, and it doesn't go anywhere
near Simi; so we don't share any waterways with Simi.
Our river flows west to Fillmore and then into Ventura,
so it never makes it across the Santa Susana Mountains
and drops into Simi.

Next, we don't have any shared transportation with
Simi because that would mean crossing county lines and
bus systems just don't do that; it just simply doesn't
exist. Most of the Santa Clarita commuters go into Los
Angeles, not Simi. And even to get to Simi, we have to
go through the San Fernando Valley to get on another
freeway to take us to Simi.

The next thing I wanted to mention was the city of
Santa Clarita has spent over 600,000 dollars of taxpayer
money, willfully divine California CVRA, themselves, so
anything that they would have to say about districting should be highly scrutinized because they don't follow it themselves. And -- and why they would send a letter in July supporting one map, and -- and then in October sending another letter supporting another map that includes Simi Valley, should be suspect to political involvement and -- and political pressure from the California GOP.

I would really sincerely hope that you take into consideration that we've made mistakes on these districts in the past, and I would really like to see some corrections made in the future. We have a good map. The maps that we see now are -- they're -- we like the map now. We do not want Simi Valley as part of our district. We share --

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 8037, and up next after that will be caller 7952. Caller 8037, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 8037: Thank you for allowing us to call in today, commissioners. We're eager to provide feedback on your most recent visualizations.

I live in Long Beach, I work in the tourism industry, my name is Courtney Russell. Over the past
several months, my neighbors and I have been calling in, participating in the process, sending visualization feedback to explain why our diverse, inclusive city is a unique community of interest. Seeing today's visualization would split our community in--in two honestly brought great concern. The way the map has been drawn in this visualization sets us back to before the first independent redistricting commission united most of our city.

The current maps have allowed us to make great progress in community building, electing representatives that reflect our experiences and interests, and overall has led to huge improvement for our city, specifically in the tourism and business community. Each year, thousands of people flock to our city to experience the food, the shoreline, the festivals, the events that are hosted all around the city. Our tourism bureau works to promote these attractions not just for the downtown area, but you know, for the whole city of Long Beach.

I'm asking that you please restore the Long Beach maps to the way things were before today's visualization. Our east side and west side communities work closely together to build a strong economy, con--shoreline; they're strengthened by those who come to visit. I appreciate the opportunity to provide my feedback, and I
want to thank you. Have a good evening.

PUBLIC COMMENT MODERATOR: Thank you so much.
And right now we have caller 7952, and up next after that will be caller 3879. Caller 7952, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 7952: Hi, my name is Jennifer Kumiyama, and I'm calling from the city of Long Beach. I want to thank the Commission for the chance to speak today.

I think it's really important for this independent Commission to keep Long Beach together; I saw that in the early draft visualization, but I'm not sure why the one we're looking at changed this week. As someone with a disability, I rely on public transportation to get around, and something that I don't think has been looked enough throughout the redistricting process are the ways that transit impact communities of interest like mine.

Long Beach transit (audio interference) my own city, but also communities in the greater Long Beach area, like Signal Hill, Lakewood, and Bellflower. These are places that we are literally connected to through public transit, and that people like me travel between each day.

As you consider -- as you continue to look at visualizations for our area, please keep Long Beach together. Thank you all again for your hard work and for
listening to community feedback like mine.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 3879, and up next after that will be caller 4062. Caller 3879, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 3879: Good evening, commissioners and staff. My name is Colleen Cecil, and I'm the executive director of Butte County Farm Bureau.

I know the Commission has been inundated with comments online, so I wanted to call in just to highlight a letter that our farm bureau submitted that was also signed by our neighboring farm bureaus in Yuba, Sutter, Colusa, and Tehama counties. The letter lays out several of the reasons why Yuba, Sutter, Butte, Colusa, and Tehama should be mapped together. These counties make up the northern Sacramento Valley.

Our area is essentially a bowl-shaped valley rich in water and agriculture. We're surrounded by mountains to the east and west, and share much more in common with the flatlands than we do with the mountain communities. For the most part, the new maps respect the connections our regions share. We appreciate the Commission listening to our feedback about keeping our rural (indiscernible) counties together. Only the assembly map separates Butte
Counties away from other counties nearby, and we're hoping this can be changed before the maps are final.

Butte County agriculture works hand in hand with Yuba and Sutter. We share the same concerns with water, flood control, land use, and economic development. It's common for Butte County farmers to cross county lines working the land in Yuba or Sutter. Also, Butte County is where Lake Oroville is located. When Stow Lake collapsed in 2017, it was Butte, Yuba, and Sutter counties that were forced to evacuate along the Feather River. Separating our counties would hurt efforts to hold the Department of Water Resources accountable and keep a disaster like this from happening again.

I hope that the commissioners will take the time to read our north state farm bureau letter. The north Sacramento Valley needs to be united and have representation that will prioritize these issues outlined in this letter. Please keep Butte County -- please keep Butte together with other rural (indiscernible) counties like Yuba and Sutter. Thank you for your time this evening, your work, and your consideration.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 4062, and up next after that will be caller 6836. Caller 4062, if you will please follow the prompts to unmute at this time by
pressing star 6. The floor is yours.

CALLER 4062: Thank you for hearing my comment. I live in Clovis, California; my name is Dave. I've been here for about twenty years or so and looking at the -- the mapping of this district, it goes all the way from Madera down to the bottom tip of Kern County. I think the -- the issue I -- I can see with this is these two areas are very different; they have extremely different needs. I mean, the agricultural is a -- a major industry up here in -- in the Fresno area and -- and Tulare. And I know there is agriculture in Kern County as well, but they also have a large energy industry down there dealing with oil and -- and things of that nature, and they also have desert communities.

I feel that the district is going to be so large that it is not going to be adequately represented. Either one of us, the people on the north or the people on the south, will not be served well by how this is drawn out right now, I mean, it's -- it's easily over a hundred miles long. It'd be hard to get a hold of your rep, possibly, it just -- and there's just too many things going on, too many different needs to be able to have one person serve all those needs for both of those areas very well.

I don't even know if we would be able to elect a rep
from our region if this were the case, if this would go into effect. So I can understand the concern from people of both areas -- both from Kern and -- and eastern Fresno County and Tulare. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 6836, and up next after that will be caller 5404.

I'd like to invite the following callers to please press star 9 to raise your hand so that I know that you'd like to give comment this evening. This caller with the last four 0232, caller 0866, caller 4047, caller 4346, caller 4527, caller 4678, caller 5833, and caller 6443, you -- none of you have made comment this evening. If you wish to make comment, please press star 9. This will help me in my job.

CALLER 6836: Hello?

PUBLIC COMMENT MODERATOR: Hello.

CALLER 6836: Hi. Fresno and Kern counties need to be separate districts. Kern County has a heavy agricultural industry with farmers and farmworkers who need to have their voices represented; having Fresno in the same district would dilute that voice. I'm asking
the Commission to take this into account when drawing the
districts in Kern County. My family works in
agriculture, so these issues are close to my heart.
Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 5404, and up next
after that will be caller 7548. Caller 5404, if you will
please follow the prompts to unmute at this time by

CALLER 5404: Hello, my name is Tim Collins. I'm a
lifelong resident of Bakersfield in Kern County, and I
also have concerns about the district reaching all the
way up into Fresno and into Madera even in those cities
in Fresno County. I think there's a lot of differences
in industry and communities here that would not be well
represented with that large of a district. I would urge
the Commission to reconsider those lines. Thanks.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we've got caller 7548, and up next
after that will be caller 4340. Caller 7548, if you will
please follow the prompts to unmute at this time by
pressing star 6. The floor is yours. And one more time,
caller with the last four 7548, if you will please follow
the prompts to unmute by pressing star 6. Caller 7548,
please do not hang up, but you may have a connectivity
issue at this moment in time. I will come back to you.

Right now we will have caller 4340, and up next
after that will be caller 0232. Caller 4340, if you will
please follow the prompts to unmute at this time by
pressing star 6. The floor is yours.

CALLER 4340: Thank you. My name is Kate Laddish,
city of Winters, right along the county line with Solano
County and down the road from Napa. The greater Winters
area is in both the coast range and Central Valley
region, and our community members are in Yolo, Salano,
and the Lake Berryessa region of Napa County.

First, thank you so much to commissioners, line
drawers, and all of the staff for your ongoing work.
This undertaking is both enormous and enormously
important, and I really appreciate you taking public
input on board and incorporating it in your discussions
in the visualizations process.

The Commission has received public input about
keeping Yolo County whole and requests to recognize our
shared communities of interest by grouping Yolo and
Solano together in districts rather than grouping with
Yolo with counties reaching far -- to the far northern
portions of -- of Cen -- the Central Valley. Focusing on
the assembly visualizations for Yolo County, I appreciate
that the Yolo and Solano portions of the Winters area are shown in the same district, and that all of the Yolo County parts of the Winters community are now shown in one district.

However, I'm quite concerned that Yolo County is squeezed into two districts, VAD_SOLANO_1102 and VAD_TEHENAPA_1102. There are four incorporated cities in Yolo County: Winters, Davis, Woodland, and West Sacramento. The current visualizations show all of those cities except Winters in one district together. We're the smallest city of the four, and leaving us out of a district with the other cities doesn't recognize how deeply interconnected our county is. The current visualizations also shave parts of Davis off and the delta portions of our county where Clarksburg is from the rest of the county.

Yolo County is a community of interest and the current assembly visualizations could expand to include all of Yolo County, and that would be a good way of manifesting that. And then I look forward to the next couple days with the senate and congressional lines. And thank you so much for your ongoing work.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 0232, and up next after
that will be caller 0866. Caller 0232, if you will
please follow the prompts to unmute at this time by
pressing star 6. The floor is yours.

CALLER 0232: Hi, my name is Lori Aguillar (ph.),
and I'm a Long Beach community member. I was looking at
the maps that were released today and I'm not sure what
happened with the congressional map. The congressional
map does not represent Long Beach at all. Long Beach is
a big city with many unique neighborhoods, but no matter
where you go in the greater Long Beach area, there's an
element of urban coastalness to us.

We have been consistent in asking to stay as intact
as possible and have probably had the largest community
engagement of any city in the state. Please do not split
us in half. We used to be gerrymandered like that and we
don't want it to happen again. Long Beach needs to be
kept together, and it benefits our businesses, our art
groups, and our communities. Please keep Long Beach
together. Thank you very much for your time.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we will have caller 0866, and up next
after that will be caller 4678. Caller 0866, if you will
please follow the prompts to unmute at this time by
pressing star 6. The floor is yours.

CALLER 0866: Thank you so much. I will make this
very brief. I am from Kings County, and I called, I think it was last week, to talk about the assembly maps, and I want to thank you for listening. Kings County in the -- the latest visualization has been kept full, and we are also with a portion of Tulare County that we would share interests with. I really appreciate the fact that you did listen. We did not need to be put in a -- in a district that went all the way up into Merced. And that -- the map right now, as it stands, with all of Kings County plus the rural parts of Tulare County is probably quite fair. Thank you very much.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 4678, and up next after that will be caller 5833. Caller 4678, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 4678: Hello, my name is Joel Block. I'm a resident of Rossmoor, adjacent to Long Beach. I called several weeks ago. At that time, the visualization showed that Rossmoor and Los Alamitos were going to be in the same congressional district with all of Long Beach. We've been in the same congressional district with Long Beach for the last ten years. I'm surprised to see that the Commission has decided to take us out of a congressional district with Long Beach and put Rossmoor
and Los Alamitos in a gerrymandered district which creates a -- a big arc going through Cypress, Buena Park, Fullerton, Placentia, Yorba Linda, Brea, Anaheim, Villa Park.

What's surprising is that I know there was an opposition to including Rossmoor and Los Alamitos with Long Beach, but the result -- what I see is happening is that you decided to divide up Long Beach and create a gerrymandered district, which is very, very similar to the last district that we were in that was determined by politicians. Your mission is not to be better politicians than the politicians were. The political pressure that is on you now should not change the common sense, the original determination to include all of Long Beach as one district and include Rossmoor and Los Alamitos with them; that's our community of interest.

Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 5833, and up next after that will be caller 4346. Caller 5833, if you will please follow the prompts to unmute at this time by pressing star 6.

MR. CAMPOS: Hello?

PUBLIC COMMENT MODERATOR: The floor is yours.

Hello?
CALLER 5833: Hi, yes, my name is Joel Campos (ph.). I'm from Stanislaus County, Modesto, and as a fellow geographer, I'd just like to say that the mappers are doing an amazing job, and so -- I'm a -- I'm a map nerd, and so I love this stuff. But hey, I want to say a couple things.

First, if you guys could please go back to the congressional assembly districts from October 27th. I've talked to many folks in Stanislaus, those are what we're asking for; these ones that just came out are horrible; and we would just ask if you could do that. We understand that you guys need to do a lot of things in the Fresno area to not split Fresno so many times, but we don't think that affects Stanislaus County, so we don't think you need to change Stanislaus County. So please go back to the October 27th maps, especially -- specifically for congress and assembly.

And specifically, assembly, in the state legislature no one that represents Stanislaus County lives in Stanislaus County, and so we have no representation in the state; they live in San Joaquin or Merced or even Monterrey County in Salinas. So we need representation in the state here in Stanislaus County. So that's why it's important to go back to those assembly maps from October 27th and the congressional districts from that
time.

Also, I'm going to say something crazy that you guys are hearing tonight, but I'm just -- and I might get some flack from a lot of people, but look if (indiscernible) needs population, you know, just go up the watershed, go to the eastern Sierra/Nevada counties. Tuolumne and Calaveras, I'm sure those folks would rather go with Stanislaus County, which is our neighbor than go with Roseville. And I'm sure Mariposa and Madera mountain areas and Fresno mountain areas would rather go to Clovis and Madera and North Fresno than Kern County. So we know we want to keep those mountain counties together --

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we'll have caller 4346, and up next after that will be caller 4527. I'd like to invite caller 4047 and caller 6443 to please press star 9, as you have not spoke this evening.

And caller 7548, if you will please press star 9 so we can retry that connectivity issue.

Caller 4346, if you will please follow the prompts to unmute at this time by pressing star 6. The floor is yours.

CALLER 4346: Hi, good evening. My name is Lisa (ph.), and I have been a Cypress resident nearly my entire adult life. I feel very closely aligned with Long
Beach. Both my daughters live in Long Beach, and I go there often; lately, it's to take care of my grandkids. In fact, I was just there today. Sometimes my son-in-law, who lives in Long Beach but works in Cypress, drives the kids to my house so that my husband and I can watch the kids together there. Even though I raised my family in Cypress, I will go to Long Beach for competitive swimming events.

There -- there's confusion in our city that (indiscernible) started by some group who are telling people that Cypress, Los Alamitos, and Rossmoor will leave Orange County if we are in the same congressional districts as Long Beach. I have told them that that's not true. Cypress, Rossmoor, and Los Alamitos are already in congressional districts with Long Beach. Long Beach and Cypress have always connected in my life. For me, my family, the two cities were connected when I was raising my kids, and now they are still connected as my kids are raising their kids. Please keep these two cities together for real working families. This is how our community actually connects. Thank you.

PUBLIC COMMENT MODERATOR: Thank you so much.

And right now we have caller 4527, and up next after that we will give caller 4047 an opportunity. Caller 4527, if you will please follow the prompts to unmute at
this time by pressing star 6. The floor is yours.

CALLER 4527: (Audio interference) --

PUBLIC COMMENT MODERATOR: Caller 45 -- oh, the floor is yours.

CALLER 4527: Thank you. Good evening, commissioners. First off, my name is Tammy (ph.), and I've lived in Stanislaus County for thirty years. I'd like to thank you, I know it's been a long day, so I will keep mine brief and to the point.

So basically, I feel like you guys have -- have got it right verbally for San Joaquin and -- and Stanislaus. These are great communities of -- of interest and representation. If any cases are made to the assembly maps in these counties, they should be small because you guys got the community of interest right for the most part.

I heard earlier a commissioner say Stockton should be put in Stanislaus, and I just don't think that should happen at all. We don't have communities of interest that are similar. And I also feel that Riverbank and Del Rio -- they're just a big part of -- of Stanislaus, and I just -- they -- they need to be on the map. Other than that, I hope you guys have a great evening, and thank you for listening to me and taking my call.

PUBLIC COMMENT MODERATOR: Thank you so much.
And right now we'll be going to caller 4047, and after that we will be giving caller 6443 an opportunity. Caller 4047, if you will please follow the prompts to unmute at this time by pressing star 6 if you wish to give comment. The floor is yours.

CALLER 4047: Great, thank you so much. I've just listened all day, and I listened last week in the other meetings. My hats off to you folks. I'm learning so much.

The assembly map for our district is VAD_ANTELOPE_1102, and I just want to thank you for it. You have us in the right place. The senate map -- so in the assembly, you have us with our neighbors to the north, in the senate map you have us with our neighbors to the east, and in congressional map you have us with our neighbors to the south, and so I think you've managed (indiscernible) choice really well. So thank you so much for hanging in there. Goodnight.

PUBLIC COMMENT MODERATOR: Thank you so much. At this time we -- we will be going to caller 6443, and we will then be -- after that we would be giving caller 7548 one last opportunity. Caller 6443, if you will please follow the prompts to unmute at this time by pressing star 6 if you wish to give comment this evening. And one last time, caller
6443, as you did not raise your hand, we'd like to just invite you one more time to press star six if you wish to unmute. All right.

At this time, we will go back to caller 7548, as they had -- did have their hand raised earlier and could not seem to unmute. Caller 7548, if you could possibly be able to get through this time, that would be wonderful, by pressing star 6.

I apologize, caller 7548 I am unclear as to other than connectivity. Please reach out to the Commission in the various other ways.

And at this time, Chair, that is everyone in the queue.

CHAIR LE MONS: Thank you, Katie. Thank you for doing a tremendous job.

Also, thank you to all of the callers that have called in this evening with your feedback. We really appreciate it. We'll be continuing to take feedback over the next couple days as well; this worked out great.

Thank you to all the commissioners for hanging in. And you all have a good evening, and we will see everyone -- we'll be recessing until tomorrow at 11 o'clock. Goodnight, everyone.

(Recessed at 8:04 p.m.)
CERTIFICATE OF REPORTER

I do hereby certify that the testimony in the foregoing hearing was taken at the time and place therein stated; that the testimony of said witnesses were reported by me, a certified electronic court reporter and a disinterested person, and was under my supervision thereafter transcribed into typewriting.

And I further certify that I am not of counsel or attorney for either or any of the parties to said hearing nor in any way interested in the outcome of the cause named in said caption.

IN WITNESS WHEREOF, I have hereunto set my hand this 15th day of November 2021.
