To whom it may concern,  
There are no Latinos in the present preliminary mak-up of the Panel and this is very disconcerting given that our state population is 50% Latino. Unless this is rectified you leave yourselves open to lawsuits and, more importantly, puts into serious question the veracity of the Panel and its outcome.

Given the current climate where social and political equity is of paramount importance we urge you to pay close attention to the racial makeup of the group.

Sincerely,

Xavier Flores
