

INTERNET SUBSIDY

The National Executive has approved financial support of up to \$25 per month for your Local to have internet access. They based their decision on a number of factors such as:

1. Immediate access between Local members and their union representatives or elected officers – independent of the departmental system for purposes of security.
2. A means of Local research and gradual reduction of mailed material upon request of the Local.
3. Providing help to Locals to financially afford email and web page access.

Requirements

- Locals must be in good standing.
- Locals must provide an email address outside of the workplace.
- Locals must provide proof of payment, a copy of this form along with the January and July invoices showing the internet charge to receive payment of up to \$25 per month.
- Locals must be responsible to disseminate the information.
- Locals will reimburse, by the monthly check-off, should it stop the internet service prior to the end of the period for which it is paid.
