3 Big Ideas for Child Care

1. AFFORDABLE FEES

Child care fees are like a second mortgage or a second rent payment for families. The solution is to cap child care fees for families and make up the difference with public funding.

2. DECENT WORK

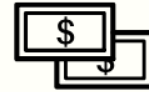

Educators are the key to quality programs for our children. They are professionals with education and skills in early childhood education. They deserve professional pay and decent working conditions.

3. ENOUGH SPACES

Let's set universal access to child care as a long-term goal, so that every family that needs child care can access it. We should expand public and non-profit programs to ensure that every dollar is going to our children, not to corporate pockets.
