

The CHOICE Humanitarian Village Based Model

What it is. How it works. Why it works. How we measure the progress.

Self-Development – What it is

From its beginning in 1983, CHOICE Humanitarian has sought to develop models that promote the community as the basic building block for self-reliance and self-development. The key to all sustainable progress and self-development lies in the capacity of the leadership to guide and inspire their communities to embrace their own future.
