

We are a group of companies and CEOs from the natural products industry working collaboratively within and across our companies to take bold action to reverse climate change. We are asking you to join us by making a public commitment to climate action.

[Make your commitment to climate action public.](#)

Nearly [400 companies](#) across our industry have joined this movement so far, and we hope you will be the next in line.

Through the Climate Collaborative, we are joining forces to create pathways to action, connecting companies to resources and working together to create solutions. We shine a light on success stories and recognize companies for their great climate work which in turn inspires more companies to act.

We're turning-up the heat to challenge our peers, including you, to up their climate game, because we recognize that climate change is here now, and we need to act together to reverse it.

Blazing a new path is not easy. But the effects of climate change are more visible than ever before, and already affecting our companies, their supply chains, and the communities in which they operate.

While climate change is one of the biggest risks ever to face humankind, it's also one of our greatest opportunities. Solving the climate crisis will make our businesses stronger and our communities and families safer. It will unleash a new wave of innovation and improve our quality of life.

We are an industry of innovators. Our consumers expect us to lead, and we have the opportunity to go farther together to reverse climate change than any of us have gone before. Collaborating to create scale and momentum, we can drive the change that must happen to create a stronger more resilient industry--and a better future for all.

Working together we will.

[Join us and make your commitment to action.](#)
