

2018 CLIMATE ELECTION SF Bay Area Action Group STARTS NOW!

CLIMATE
ELECTION
2018

What if the growing massive wave of interest in the 2018 elections could coalesce around climate, science, and truth?

A group of climate activists has started work to **Make 2018 a Climate Election**. See our nonpartisan, unifying **Call to Action for a Climate Election** with a single goal, event, and step at ClimateElection.org

Now we're forming a **Bay Area Climate Election Action Group** (NOT a new organization) to show how this campaign can look locally and pave the way for national efforts. In mid-January, 350BayArea endorsed this campaign. We're starting to ask for volunteers from chapters of Climate Reality, Sierra Club, Green Action for Health

and Environmental Justice, Citizens' Climate Lobby and other local groups.

We're looking for climate activists to join our Meetup group. Creatives? Help on messages, slogans, tweets, buttons, and t-shirts. Organizers? Reach out for volunteers and endorsements. Tech? Work on applications.

And maybe you know someone to can step up as half-time Project Director for 9 months.

This concrete first example will help us get endorsements of the ClimateElection from 80+ targeted organizations and leaders. And our packages can be picked up, localized, and used by anyone in the country.

Join at ClimateElection.org. Thanks! 1/28/18
