Congress: Stop taking money from Elbit Systems and companies that profit from repression & war crimes.

CODEPINK

Elbit Systems is the Israeli military's top weapons manufacturer, responsible for war crimes and oppression in Palestine and surveillance and repression on the U.S.-Mexico border. Elbit produces UAV military drones, surveillance systems, and provides parts and maintenance for Israel's Lockheed Martin F-35 fighter jet which used to slaughter civilians in Gaza. Elbit also contracts with the U.S. Department of Homeland Security for towers, radars and drones along the border, the same technology used in Israel's illegal apartheid wall.

We the undersigned call on Congress to reject campaign contributions from Elbit Systems and to commit to refusing campaign contributions from all military contractors and companies that profit from war and repression.
