

June 22, 2016

As Colorado Springs Forward has reached out to the community to prepare for the June 29th Utilities Governance vote, we have found many organizations need the meeting postponed to have time to fully understand the options and draft a formal position.

Please [call or email City Council](#) today and request this meeting be postponed for 30 days until July.

Here's an [excellent editorial from the Gazette](#) making an effective argument for an all-appointed Board, which Colorado Springs Forward also supports.

Thank you for helping to move our city Forward!

Lynette Crow-Iverson
Chairwoman of CSF Board of Directors

Additional Information

- Significant changes were recently made to the Utilities Governance proposal by Council members—the public needs more than one month to digest and respond to those changes.
- Several key stakeholders (constituents of City Council) have scheduling conflicts and respectfully seek additional time.
- A recent town hall meeting revealed diverse public opinion, and the public needs time to look more closely at the complexities before Council makes such an important vote.
