

COMMUNITY ENERGY RETAILER PROJECT

A Local Community Energy Retailer

The community energy retailer will be community owned and operated, giving the local community control over its energy future.

What is it? The community energy retailer is planned as a community owned and managed business, selling electricity to local customers. It will also allow households with solar – or a solar and battery system – to trade electricity with one another.

Why?

The community energy retailer will:

- + Support local renewable energy projects
- + Return profits in the community
- + Provide a clean energy alternative to the big power companies
- + Create local jobs
- + Allow for energy trading between households.

When? The community energy retailer is hoping to launch in the second half of 2018 or early 2019.

Are you interested?

Filling out this form will not oblige you to join the retailer when it launches. We will use the data to contact you before the retailer launches.

Would you join a local community energy retailer if it offered a comparable price to your current electricity provider? Yes / No
