Prop 1

Water Bond

Creating Lasting, Sustainable, and Affordable Solutions for Our Communities

Thousands of communities throughout our state still lack safe, clean, and affordable water. Prop 1 plays a vital role in our efforts to implement the Human Right to Water in California.

Fast Facts: Here is How Prop 1 Advances the Human Right to Water

- Proposition 1 provides **\$520 million for safe drinking water and clean water programs** for small, disadvantaged communities. These funds are designed to leverage federal funds and pay for community wastewater programs and drinking water infrastructure.
- Proposition 1 provides **\$900 million for groundwater sustainability projects**. A minimum of 10% of this funding is set aside for severely disadvantaged communities whose median household income is 60% or less of the statewide median household income. **\$80 million** will be used to clean up contaminated groundwater that serves as a source of drinking water.
- At least \$696 million, or **almost 10% of the total bond**, is set aside for disadvantaged or severely disadvantaged communities.

Additional benefits

- Prop 1 provides **vital technical assistance resources** to help communities leverage additional funding. Technical assistance funding is available for project pre-planning, planning, and operation and maintenance costs. Prop 1 also creates a **multi-disciplinary technical assistance** program specifically for small and disadvantaged communities.
- Prop 1 prioritizes projects that coordinate **shared, long-term solutions for multiple communities**. These types of shared regional solutions help prevent chronic contamination by connecting small disadvantaged communities to larger water systems.

Overview of Proposition 1

What is Prop 1?

- Proposition 1 is a \$7.5 billion bond that voters overwhelmingly approved on the November 4th ballot.
- Proposition 1 funds investments in water projects and programs as part of a statewide, comprehensive water plan for California.

How will Prop 1 funds be spent?

Uses of Proposition 1 Bond Funds (in millions)	
Improvements to Groundwater and Surface Water Quality	\$1,420
<ul style="list-style-type: none"> • Prevention and cleanup of groundwater pollution. • Drinking water projects for disadvantaged communities. • Wastewater treatment in small communities. • Local plans and projects to manage groundwater. 	<ul style="list-style-type: none"> \$800 \$260 \$260 \$100
Watershed Protection and Restoration	\$1,495
<ul style="list-style-type: none"> • Watershed restoration and habitat protection in designated areas around the state. • Certain state commitments for environmental restorations. • Restoration programs available to applicants statewide. • Projects to increase water flowing in rivers and streams. 	<ul style="list-style-type: none"> \$515 \$475 \$305 \$200
Water Supply	\$4,235
<ul style="list-style-type: none"> • Dams and groundwater storage—cost share associated with public benefits. • Regional projects to achieve multiple water-related improvements (includes conservation and capturing rainwater). • Water recycling, including desalination. 	<ul style="list-style-type: none"> \$2,700 \$810 \$725
Flood Protection	\$395
<ul style="list-style-type: none"> • Repairs and improvements to levees in the Delta. • Flood protection around the state. 	<ul style="list-style-type: none"> \$295 \$100
Total	\$7,545

Why California Needs Prop 1

- **Over 1 million Californians** cannot drink the water out of their tap because of contamination.¹
- In the Tulare Lake Basin and Salinas Valley, roughly **254,000 people are at risk** of nitrate contamination, and the problem is worsening.² Nitrate contamination is the #1 reason for well closure in California, which can affect all Californians.³
- **The drought is exacerbating drinking water problems** for vulnerable communities, making the problems only more real and desperate. Prop 1 funding will provide lasting solutions so that our communities are more resilient and prepared for future droughts.

Over 9% of the total bond is set aside for disadvantaged or severely disadvantaged communities

CWC is working hard to make sure Prop 1 funds are committed expeditiously and targeted to the communities that most need these resources to create safe drinking water systems for all.
