

#Agua4All Community Rally and Celebration

Please join The California Endowment, Rural Community Assistance Corporation, Community Water Center and our many local partners at a community rally Tuesday, April 5, at El Camino Real Elementary School to celebrate the installation of 71 water stations and 88 point-of-use filters in South Kern County in response to the safe drinking water challenges facing our community and our state.

Speakers will highlight the progress our communities have made to improve access to safe drinking water in our schools and neighborhoods through The California Endowment's #Agua4All program.

Together we will remind local and state leaders that despite the progress we have made, much more work remains to be done. According to California EPA, more than 500 California Communities lack access to safe drinking water, creating health risks and economic burdens that have been shown to disproportionately impact low-income and Latino communities. It is imperative that we continue working toward interim and lasting solutions in our communities.

Tues., April 5, 2016

• 5:00–7:00 pm •

El Camino Real Elementary School
911 El Camino Real, Arvin, CA
