

Is your community organisation struggling with rising electricity costs?

The Green Hubs Energy Efficiency Program can help!

Book an energy efficiency presentation and help your community organisation become a Green Hub.

Australian Government
Department of Industry

**Conservation
Council SA**

Free Advice

One of our trained presenters will visit your organisation and run through the most cost effective and practical ways to reduce its energy consumption, including simple behaviour changes, retrofitting options, energy efficient appliances and equipment, and common energy myths. A free energy efficiency checklist is also available.

Become a Green Hub

After the presentation assist your community organisation to become more energy efficient by applying to become a Green Hub. Green Hubs receive a free energy audit from a qualified expert. We will also provide support to help you implement the auditor's recommendations.

Your hub will then become an example to other organisations of how to reduce energy costs and contribute to environmental sustainability.

'Henley Football Club has benefited greatly from Green Hubs. The support of the program has made it easier to engage with donors, has increased our energy efficiency and saved money'. Mark King, Henley Football Club.
