MTA wants to begin building the Crenshaw-to-LAX Rail Line down the middle of Crenshaw Blvd in 2014

The Problem:

- 225-ton trains traveling 35 mph down the middle of Crenshaw Blvd from 48th to 59th Street
- Crossing streets every 2 ½ mins during rush hour
- Safety hazard to major schools (View Park Prep & Crenshaw H.S.), day cares and senior centers
- 4-5 long yrs of *disruptive* street-level construction
- Over half the business' parking spaces (308) **GONE!**
- Increased traffic congestion & closed-off streets
- No more tree-lined median!
- Tall *prison-like fences* dividing Crenshaw!

The Solution:

- **Build it Underground on Crenshaw Blvd**
