

*Connecticut*  
**Roundtable on  
Climate & Jobs**

**Restructuring CT's Utilities  
for the Clean Energy Future  
Monday, November 16, 2015**

**7:00 – 9:00pm** (hearty snack available at 6:30pm)  
**Machinists Union Hall – 357 Main St, East Hartford**

The new “Clean Energy Future” report from Labor Network for Sustainability shows that the US and CT can meet our climate goals, save money *and* create more jobs. But we need to change the ways we produce and use energy.

Join us for a dialogue about transforming utilities for a Clean Energy Future:

- How should utilities be owned, governed and regulated?
- How do we transition to more distributed (i.e. local) generation to increase resiliency and local control?
- What sort of pricing structure would support the expansion of renewables rather than fossil fuels?
- How do we ensure a just transition that protects the livelihoods and union rights of all workers?
