

CT Roundtable on Climate and Jobs

A – The “Clean Energy Future” scenario: achieve 80% x 2050 climate goal, net increase in jobs (~6700 more than “business as usual”), lower energy and transportation costs

B – Maximize cost savings, regardless of impact on # of jobs or greenhouse gas emissions

C – Prioritize saving money while creating large # of jobs, but don’t worry about climate goals (e.g. cost savings could come from increasing # of low-wage fossil fuel jobs)

D – Maximize emissions reduction, regardless of the cost or impact on jobs

E – **Where are you?**
