

Petition Opposing the Enbridge Northern Gateway Pipeline Project in British Columbia

The Enbridge Northern Gateway Pipeline Project will have an irreversible impact on the health of those who live near waterways into which tar sands toxins are released, on wildlife and on our environment.

Should an oil spill occur as a result of the Enbridge Northern Gateway Pipeline Project, taxpayers will be responsible for the cost of the cleanup to the tune of billions of dollars. According to the Living Ocean's Society's report titled *Financial Vulnerability Assessment: Who Would Pay for Oil Tanker Spills Associated with the Northern Gateway Pipeline*, once oil is loaded onto tankers, Enbridge is not responsible for ANY of the costs associated with an oil spill.

We the undersigned citizens of Canada oppose approval of the Northern Gateway Pipeline Project and call on Parliament to create a permanent ban on oil tankers and the pipeline project in order to protect British Columbia's coast.
