NORTH CAROLINA

(MUST READ "INTEL SUMMARY" ATTACHMENT FOR FULL PICTURE)

Trump – 2,758,775 (49.93%)

Biden – 2,684,292 (48.59%)

Red - Obvious Rigging

Yellow - Likely/Minor Rigging

Green - Clean

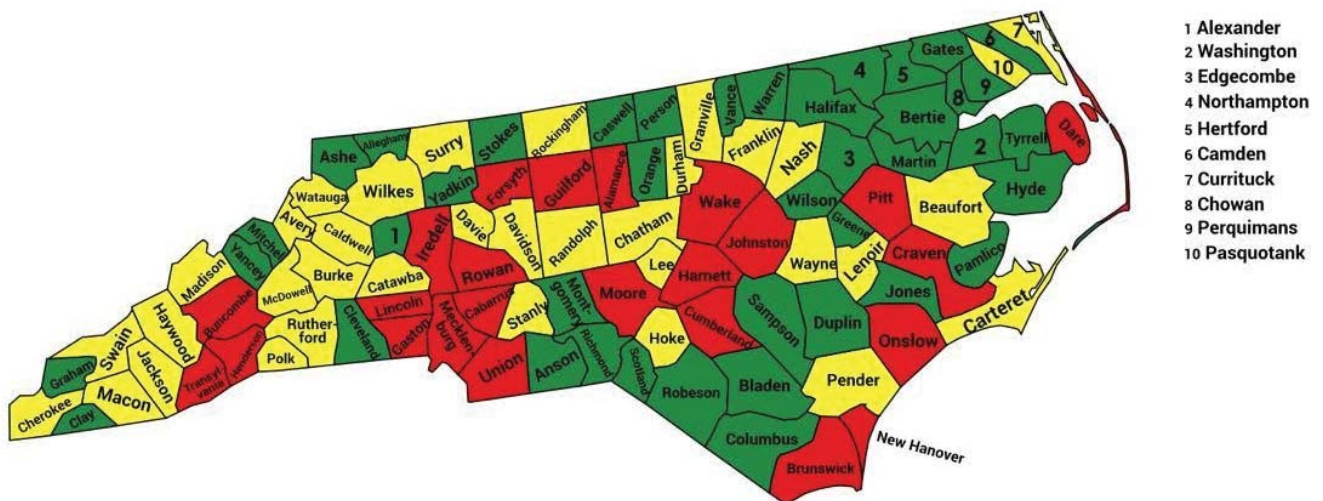

North Carolina drifted another 4% toward Republican registration, but mysteriously, Trump gained a massive 396,000 votes, while Biden gained 495,000 votes, with two previous elections showing 35k (2012) and 11k (2016) vote gains as state moved right.

My estimates suggest minimum of 257k excess Biden votes, slightly more than Roy Cooper's margin of victory.

If accurate, Trump's margin in NC would have been 6.3%, or 52.3% to 46.0%, which is in keeping with the registration trend of the past two decades.

READ THE INTEL SUMMARY FOR THE REST OF THE DETAILS

Best targets for audits: Johnston, Union, Iredell, New Hanover, Lincoln, Onslow, Brunswick, Gaston

**NORTH CAROLINA
INTEL SUMMARY FOR AUDIT
SETH KESHEL**

Ideal Audit Targets: Johnston, Union, Iredell, New Hanover, Lincoln, Onslow, Gaston, Brunswick (Red counties)

Background: 93 of 100 counties trended GOP in registration over the past 4 years, as Rs ate up another 4.0% off of the Democrat registration plurality. Romney reversed NC back into a red state, not because GOP made gains with the ancestral Democrat working class voting base, but because Dems began losing ground they haven't recovered, relegating them to Raleigh-Durham, Charlotte, and Asheville in terms of any actual voting power. GOP cut four points of registration for Ds from 2012-16 and that saw Trump double the margin of victory (nearly). This cycle, another 4 points came off Dem registration advantage (they've actually lost net new voters in the state since 2016), but Trump barely held it when reg. trends (+ new net vote gains) suggested a victory margin over 5 points.

Key Findings: Once again, those who engineered NC and FL botched it. They left the northeast, longtime Dem counties to run freely and Trump improved in almost all of them. There is some minor rigging in the Appalachian west, which is massive Trump country, but most of the machinery is taking place in the major metros and the surrounding suburbs, as well as some of the larger coastal counties like New Hanover.

*Cooper appears to have used the massive fraud to be re-elected

*Blue Counties Durham (minor) and Orange (clean) are not far outside norms.

-Mecklenburg (Charlotte) and Wake appear to be 35 and 30k heavy respectively.

-Bad Republican counties:

Johnston – Reg moved 4% to GOP (GOP 6 to 1 in new Reg ratio), major margin loss

Union – Reg moved 1.4% to GOP (GOP 10 to 1 in new Reg ratio), major margin loss

Iredell – Reg moved 4.5% to GOP (Dems -2k, GOP +6k in net new regs), major margin loss

New Hanover – Reg moved 1.9% to GOP (Dems -2k, GOP +1.2k in net new regs), margin loss

Lincoln – Reg moved 9.8% to GOP (Dems MINUS 2k, GOP +5k in net new Regs), margin loss

Onslow – Reg moved 7.3% to GOP (Dems MINUS 3k, GOP +6.5k in net new Regs), margin loss

Excess Biden vote estimates:

*Alamance – 7k

*Brunswick - 8k

*Buncombe – 12k

*Cabarrus – 8k

*Cumberland – 10k

*Forsyth – 10k

*Gaston – 8k

*Guilford – 10k

*Henderson – 6k

*Iredell – 7k

*Johnson – 10k

*Mecklenburg – 35k

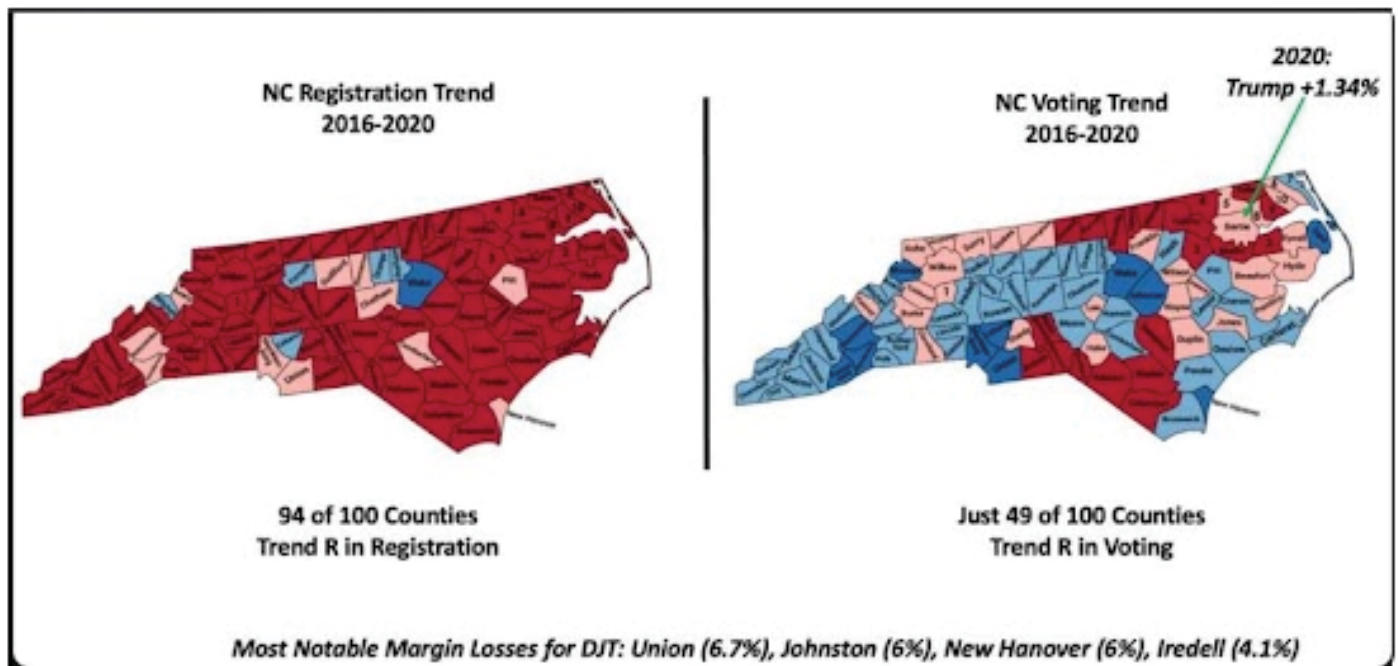

*New Hanover – 12k

*Onslow – 6k

*Wake – 30k

01 YANCEY	5	4	5	4	6	3	8	4	1%	208	-8.67%

Warmup for NC release tomorrow.

On the left we have a registration trend. From 2016-20, 94 of 100 counties became more Republican in registration percentage than they were in 2016, when Trump won by 3.7%. The darker shades are 4% or more for the party indicated.

On the right - not RESULTS, but TREND in the election. 51 of 100 counties were more Democrat than in 2016 (indicated by blue). The map on the right should look nearly identical to the one on the left, meaning almost every county should have voted more Republican, just as NC has matched registration trend for decades.

GOP cut over 4% statewide off Dem registration edge. Trump should have been plus 5-8% in NC, not 1.3%.
