

PA PAC Questionnaire for Congress - 2018

Please return this completed form along with your resume or a brief biographical statement describing your education, work history, community service, and prior political experience as soon as possible, but by March 9, at the latest.

You may e-mail your responses to Tom Miller at tom-miller1@nc.rr.com or you may send a printed copy of your responses to Durham PA-PAC c/o Tom Miller, 1110 Virginia Avenue, Durham, NC 27705

Please note that following the March 9 deadline, the Durham People's Alliance PAC may publish your responses to this questionnaire and your resume.

Thank you for completing this questionnaire and your willingness to serve the people of Durham.

Candidate's name: Perry Whitlock District 4

Address: PO Box 294, Garner NC 27529

E-mail Address:

perry_whitlock@bellsouth.net

Phone: (919)-744-5957

When responding to this questionnaire, type your answers in italics, bold, or a different font to distinguish your answers from the questions. Please do not use colors. You may explain your answer to every question, but please be concise. If possible, limit your answer to each question to no more than 350 words. If you use words or ideas from another person, please attribute your source.

Why You Are Running

1. What are the three most important issues facing North Carolina and the nation? What are your top priorities in addressing those issues?

I. Toxicity of Group Identity. Point it out, and hope the individuals sees it for what it is.

II. MSM sophistry. NC Constitution Art I Sec. 13, provides authoritarian recourse.

III. PC culture. Stand for what you believe in, vs the artistry of social science.

The Economy and Federal Spending

2. What do you see as the primary sources of our current economic problems? What measures should Congress use to address them? What are some of the possible negative consequences of your proposed solutions?

I. The same issue in on the web page of David Price, and sounds complacent.

II. Get out of regulating small businesses.

III. For those in power, in could mean lose of control, and we see what information has done for control. Though certainly we are dealing with trade offs, solutions are so rare.

3. Are you in favor of reducing government spending in any specific areas? If so, please list your top three specific areas and explain your reasons. Are you in favor of increasing government spending in any specific areas? If so, please list your top three specific areas and explain your reasons.

I. Across the board, we have no free markets due to social group intervention.

II. NO!

III. Group interference causes consumer prices to rise, ACA is an example.

4. What changes, if any, do you support with safety net programs (Social Security, Affordable Care Act, Medicare, Medicaid, Veterans programs, etc.)?

We already have a resource based food system, we share with the world. How many more steps would cognitive resources yield to expand such a system? Now that we have an overabundance of an intangible natural resource, harvest.

Industrial Engineers' creed~ "There is always a better way"

5. Are you concerned about the affordability of a college education in the U.S.? If so, what role can the federal government play in addressing your concerns?

I. Old technology holds back progress, adapt. Ever watch/read The Librarian, Warehouse 13, or Dr. Who? The infinite storage area, IMO, represents the 'infinite' knowledge that has been afforded us through modern instant communication.

II. Groups tend to exploit public concerns, at the expense of morality. Paraphrased from memory 'Often the morality of a decision, is inverse in proportion to the number of people making said decision' AUK (William Durant?)

6. Do you support an increase to national minimum wage? What additional measures would you support, if any, to address income inequality in the U.S.?

If it can compete with the international minimum wage, of ZERO, then sure, otherwise we suffer a disadvantage in the free market. 'Long term relationships are reciprocal.' ~Axiom

7. What is your position concerning the future of the federal Consumer Financial Protection Bureau?

Like much of the alphabet soup, it's function has been counter to it's title's claims. Patriot act anyone?

The Congress

8. Public approval of Congress is at an historic low. In what ways has your party contributed to this problem? What measures or reforms, procedural or otherwise, do you believe would promote a more functional legislative branch?

I. The Libertarian party has helped reduce the influence and lock out of ballot access to the individual. The 'bi-partisan' political group is well coordinated and financed. Without the benevolence of the Libertarian party, no individual could practically stand for our natural rights, without compromising morality for support.

II. Vote on single issues for the merit. Excessive bill length, and many abridgment policies, can make comprehension difficult, a sophist dream. If voting on more than one issue, you have caused BOTH issues to be compromised by someone's standard.

Foreign Policy, Immigration, and Refugees

9. What are the top priorities for U.S. foreign policy?

IMO, resource acquisition. Currently being taken by force, making more problems to clean up, due to the conditions of all long term relationships being violated. The Overton window shifts when new information becomes accepted. What current policy is based on is still in the unthinkable range for many groups who's plebs conform for ideological sanctuary.

"If a nation expects to be ignorant and free, in a state of civilization, it expects what never was and never will be....."

It is error alone which needs the support of government. Truth can stand by itself."~Thomas Jefferson

"Politics: A strife of interests masquerading as a contest of principles. The conduct of public affairs for private advantage."

Ambrose Bierce

10. How would you reform U.S. immigration policy? Since agreement on immigration reform has proved difficult to obtain, what measures should be taken in the meantime that would improve the lives of undocumented immigrants? Is the Immigration and Customs Enforcement (ICE) agency performing as it should?

Health screening, mental support, as not having a group tends to be highly stressful

*'We draw better conclusions from our extreme **contrast** than from our close comparisons'~ Jordan B. Peterson paraphrased w/ bold perception aid*

There is no country without a border, that's my line of delineation.

They still have natural rights, which should be observed, but they are INDIVIDUALS and knew the challenges that face them. Overcoming such high adversity will prove their character and other individuals will respect their tenacity. The intimidation of acceptance comes from cultural belief structures that fall as statistical outliers in a modern, western, civilization. Not having an education makes for high risk safety hazard in a tech based society. Bhopul India, Union Carbide, December 1984.

11. What if any effect should person's country of national origin have on their ability to enter and remain in the United States.

*In real terms, it has no effect. The individual will go where he/she pleases. If they 'prove their salt', they will 'raise the tide'. If they become a problem, groups will form against them. Transportation gets cheaper by the day,
Legally, It's dependent on the person's formal group training. Objective training helps.*

Public Security and Criminal Justice

12. What measures, if any, do you support for reducing the number of incarcerated Americans?

Enforce the fourth amendment. Serve time AND a permanent record is excessive punishment from an employment POV. Maybe a zero line? For the reformed, of course.

13. What action, if any, should the federal government take to decrease gun violence in the U.S.?
Would you support a federal ban on assault rifles?

Reduce state agents high threat low threshold standard, SWATing. No LE high velocity true assault rifles in high congestion areas, such as hotel corridors(Shaver). When six members of a heavily armed group confront an individual in the desert, holding only a knife, killing the man is not justified, AZ. Modern technology won't play favorites. Any call for "someone has a gun, and I don't feel comfortable" starts by identification, individuals have a NATURAL RIGHT to face their accuser. Otherwise, people have the incentive to lie, no accountability. Lead by example, increase non-lethal hardware. The insecure will develop new means to incapacitate, whether or not they will be non-lethal, remains to be seen. This would help curb a public paid group, involved in 1in7 firearms related deaths. No statistical ref, due to the limited access of data ie 'we don't keep those numbers'.

Elections, Civil Rights, and the Supreme Court

14. What are your concerns, if any, with the state of campaign finance in U.S. elections? What measures should Congress take to address your concerns?

15. What can be done to protect U. S. elections from interference?

16. What action should Congress take with regard to the Voting Rights Act following the Supreme Court's *Shelby v. Holder* decision?

17. How would you characterize the Black Lives Matter movement? What policy solutions would you support, if any, to address concerns raised by the Black Lives Matter movement?

18. What policies, if any, do you think are important for protecting the rights of the LGBTQ community?

Bill of Rights protects ALL individuals.

19. What are the two worst and two best decisions made by the U.S. Supreme Court since 2010?
*Worst IMO: Citizens United vs FEC 558 U.S., In reference to the individual.
Best IMO: Matal VS Tam, 582 U.S. 2017 ie The Slants, DC vs Heller, dated*

Health and the Environment

20. Do you support universal healthcare for Americans?

“Insurance - an ingenious modern game of chance in which the player is permitted to enjoy the comfortable conviction that he is beating the man who keeps the table.”~ Ambrose Bierce

“Actually lowering the cost of insurance would be accomplished by such things as making it harder for lawyers to win frivolous lawsuits against insurance companies.

The march of science and technology does not imply growing intellectual complexity in the lives of most people. It often means the opposite.

Freedom has cost too much blood and agony to be relinquished at the cheap price of rhetoric.

It is amazing that people who think we cannot afford to pay for doctors, hospitals, and medication somehow think that we can afford to pay for doctors, hospitals, medication and a government bureaucracy to administer it.

The most fundamental fact about the ideas of the political left is that they do not work. Therefore we should not be surprised to find the left concentrated in institutions where ideas do not have to work in order to survive.”

Thomas Sowell

21. Do you believe that Planned Parenthood should receive federal support?

Is it being used to cull the population of inmates, allow for more migrants, control a group or individual? Political positions have an underlying agenda. Prenatal should be a priority in any case. Even if a fetus overcomes all the adversity of birth, we still want the child to have a healthy start, to keep a health community.

22. Do you believe that global warming is real and caused by humans? Is it a problem for human life on earth? If so, what actions should Congress take to mitigate the effects of global warming?

I comprehend that weather forecasting, prior to the mid 80's, was very inaccurate. Until, an English 'meteorologist' started using the solar cycle, making a difference. It is claimed, using the solar cycle makes the Farmers' Almanac reliable.

Life will adapt, on Earth.

When humans think they are smarter than mother nature, that's when we will be doing the greater harm. Until you can control the solar cycle, you're 'playing with fire.'

Concerning You

23. For whom did you vote in the 2012 and 2016 presidential general elections?

Supported Ron Paul as an individual at the local poll in the 2012 primary, and filled in NOTA (none of the above) in the general. Trump, both. Due Process is needed.

Thank you and please remember to provide us with your resume or biographical statement.

What's the easiest thing in the world to do?

I've lived in Garner all my life, with the short term exception of college. Member of the 1987 State championship football team, of Garner Senior High School. Started WTCC in 1989, earning a machinist diploma, studied tool & die making, while taking Mechanical, Industrial, and Manufacturing Engineering. Completed an AAS in Automation Robotics, transferring credits to East Carolina University, in the summer 1998. Was allowed to participate on the ECU cheer squad, until I started commuting from Raleigh three times a week, and had to leave the very nice group of people who inspire high spirits. Partnership stunting was so, awesome. Performing gymnastics skills provoked love for a sport that is so easy to admire. Learned to SCUBA, and freedive in basic gear down to 60'(breath holding). Just under seven hours PIC in my aviation log, from 2001. Finally left the ECU group around 2005, holding a Bachelor of Science in Industrial Technology. Glenn Whitlock was a great father, and excellent mentor. I would not be what I am today, without the ethical and moral standards he instilled. His passing in 2008 was a great change. Sarah Whitlock was a very supportive mother, who worked at Wake Med for 30 years, her life centered around the church. Getting her nice house circa 2010, she enjoyed it for about six years before a brain tumor took her home in a matter of 71 days. My primary motivation, is to continue learning, and helping others comprehend for themselves. Let's deal in objective facts, like repeatable science, and reduce the compromise of group opinion.

'Scerry Perry' Whitlock
