

PA PAC Questionnaire for
United States Congress – 2020

Candidate's name: Steve Swenson

Office: United States Senate

Address: 58 Walnut Grove Bunnlevel, North Carolina 28323

Phone: 910-584-7744

Website: <https://SteveSwensonForSenate.org>

1. The three most important issues facing the nation are human rights, accountability and graft. The top priorities addressing these issues are the codifying of Roe v. Wade and passing a Sexual Assault and Torture Act, the \$2T80y African American's Restoration and Appropriations Act., and the repeal of AUMF and passing a National Security Reconciliation and Accountability Act.
2. The President should be removed from office.
3. The current system of federal taxation is unfair. Increasing in scale for those is the ultrahigh income brackets. \$1B bracket should be taxed at 30% until \$10B reached, then at this or higher levels the taxation is increased the highest level at 50%.
4. My position on tariffs and trade is to seek regional cooperative and mutually beneficial commerce flow through trade and to project long visionary agreements that correlate with high employment and economic stability.
5. I am in favor of reducing defense spending and increasing education, federal housing programs, ADA oversight and improvement, and State Department.
6. I am concern of affordability for college education. Tax increase on the ultrahigh brackets will greatly increase revenues to offset and align priorities to make higher institutions of learning accessible to all.
7. I support paper ballots and believe advance in technologies are so complex that the absolute insurance of an untampered computerized ballot is unattainable and the nefarious intervention has, is and will not be deterred and worse, may go undetected when successful.
8. I want Citizens United to be repealed it need be, a constitutional amendment.
9. Congress should readopt all aspects of and pass the People Act of 2019.

10. My immigration stance is no wall! Invest in neighbors bridging to each other with investing in institutions of higher learning, advanced technologies and cultural integration. I believe no non-violent offender who is illegally within the borders of the United States who is not alone (with family members) should not be deported. I absolutely oppose incarceration of children in any way for any means as it relates to border security and immigration.
11. Having been a nurse and a person living with a chronic illness, the focus is slowly moving away from what can be described as pharmacological and intervention care to individualized, nonpharmological and holistic care. Eastern medicine, yoga and preventive physical therapy early in life stage will change rate of illnesses, cost and increase overall health of the nation.
12. The federal government has increased opportunities in high low-income zones across the nation that are in part now being effected by gentrification and predictability in such effects are clear. The investing in these areas experience positive income growth yet causing lower income desperate in housing affordability and availability is addressed through targeted increase federal funding.
13. The distribution of wealth among the people of the United States is a proper concern for government. Capitalism without governance is not government, it is corruption unbridled on the disadvantage economically which is increasingly the largest class of people. This most change.
14. My \$2T80y African American's Restoration and Appropriations Act will immediately and exponentially reduce gun violence across the nation with a vision that is pragmatic and generational.
16. I absolutely support legislation designed to protect gay, lesbian, bisexual, and transgender people from discrimination in housing, employment, public accommodation, and access to government benefits and services.
17. Related to climate change and the impact on all of life is best in the rejoining of and supporting the Paris Accord and continue collaborative efforts with increase urgency.
18. Magna Carta concerns me most about international relations and the human endeavor of all people of the world. We must continue to project and participate in liberal democracies and change the recent sharp turn away from it.
19. My vote in 2916 United States Senate and presidential elections was a Democratic down ballot.
