

HOW TO SLOW THE SPREAD:

DEMAND PAID SICK DAYS. SIGN THE PETITION:

decentworkandhealth.org/paidsickdays

Paid sick days save lives. That's why we're calling on provincial and federal governments across Canada to legislate paid sick days as part of employment standards. **Will you sign the petition and join our call?**

A recent report by Canada's Chief Medical Officer of Health Dr. Tam names paid sick leave as important to protecting worker and community health. Without paid sick days, it's impossible for workers to follow public health guidelines and stay home when ill. **Paid sick days empower workers to protect themselves and the public.**

Canada lags behind. We are in the bottom quarter of countries worldwide that don't guarantee paid leave on the first day of illness. As a result, the majority of working Canadians - 58% - don't have access to a single paid sick day. That number jumps to 70% for low-wage workers, who are disproportionately women, people of colour, and workers with disabilities.

Add your voice to the growing tide of people demanding paid sick days for all workers, including temporary workers and migrant workers. As Dr. Tam writes, "No one is protected until everyone is protected."
