

## **WARNING: YOU ARE THE TARGET OF THE CURRENT ECONOMIC WAR?**

In the past, wars were primarily focused on military targets. Today, the target is YOU, your money, your livelihood, and even your way of life. Real enemies are manipulating, undermining, stealing, and hacking. This is 21st century warfare designed to take down America. As a nation, we have never before faced such unique and credible threats to our very way of life.

**Your Mission:** To understand and recognize the threats our adversaries/enemies are developing and implementing to attack America. Your livelihood, your money, and your way of life are being targeted. There is a marathon strategy in place to take down America, and it is important you understand the threats, know how to prepare, and how to fight back. **This is a new kind of war where you are the target, but it is also a war in which you can make a difference.**

**CYBER**

**Market  
Attacks**

**Social  
Chaos**

**Socialism**

**Radical  
Islam**

PAGE 1

This is just one of several strategic plans to take down the United States. But this one outlines a number of tactics to achieve the objective and it's important to understand each of them and how they can impact you personally and us collectively.

Modern economic warfare can best be stated as follows:

**"What we see as a marketplace, our enemies view as a battle space."<sup>TM</sup>**

The *Economic War Room* brings to you the same high level of briefings as Kevin Freeman gave (and received) in the Pentagon, and with the 3-letter agencies such as FBI, CIA, and DIA. The difference is we will identify for you action steps you can use to **protect your money, livelihood and way of life.**

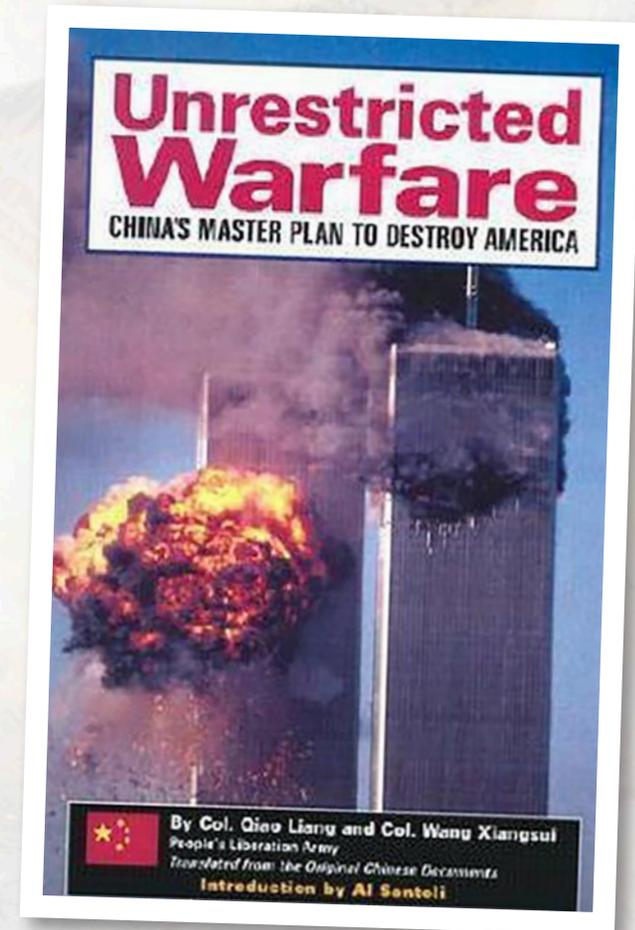

---

\*Note: Parts of this briefing are based on a warfare strategy obtained from China. The document has been translated into English but unfortunately many politicians and those in the Intelligence Community remain unaware of its existence. Kevin Freeman documented key details in a report he developed for the Pentagon.

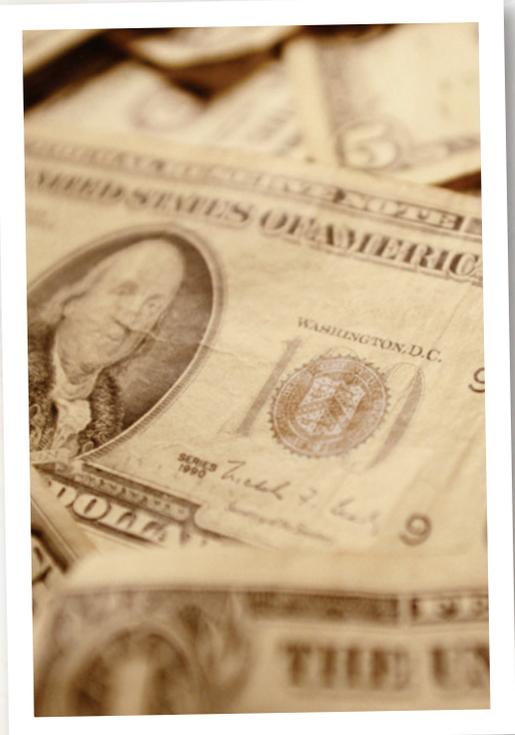

**(OSINT) - Open Sourced Intelligence Briefing - Kevin Freeman**

- A. Worried about the stock market? Home prices? Your bank account? Energy costs? Your online identity? Technology? Each of these and dozens of other critical pressure points have been identified in order to **target your money, your livelihood and your way of life.**
- B. The Chinese actually wrote this in a playbook, and it was published by their military under the translated title **Unrestricted Warfare**. Our Intelligence Community obtained and translated a copy. This is the Bible of sorts for Economic Warfare. And the **endgame is to dispirit America and force a collapse without enduring a military exchange.** And, it is quite effective.
- C. Russia, North Korea, Iran, terrorists, radical groups, criminal cartels, and Jihadists are **all** using these strategies in various forms.
- D. Many nations and lots of groups are intent on undermining us to the brink of collapse. This has been going on for decades but it is **accelerating** right now.

**(OSINT)– Open Sourced Intelligence Briefing - Kevin Freeman**  
**THREE REASONS YOU ARE BEING TARGETED**

1. **America's (Your) Money** is under assault: Our enemies know that if they can take down American prosperity, they can take down America."Financial Warfare is warfare in which a country is subjugated without a drop of blood being spilled."
2. **America's (Your) Livelihood** is under assault: Americans are so resilient, meaning we know how to bounce back from tough times, it is not enough to attack our wealth. Strategically, our enemies know that they must also attack our capacity to earn new wealth.
3. **America's (Your) Way of Life** under assault: The third strategy is the most complex and may even be the most dangerous. Have you noticed that little by little the America you grew up with is eroding? The way of life you enjoyed and planned for your children and grandchildren has radically shifted. Even what you are allowed to think and say has morphed into a collective correctness that can stifle creativity, opportunity, and general well being. Make no mistake. Much of this is planned and perpetrated as a strategy to undermine America. The goal is to so greatly divide us that we no longer recognize the America we once loved.

## UNDERSTANDING THE TACTICS BEING DEVELOPED - A MULTI PHASED ECONOMIC ATTACK THAT DRIVE POLITICAL CHANGE

A. First, "muster large amounts of capital."What this tells us is that money is the weapon.

B. Second, "launch a sneak attack against the enemy nation's financial markets."Use financial capital, to enter and subvert banking and stock markets. Also, to manipulate the value of a targeted currency.

"Causing a single man-made stock market crash ...is a new concept weapon."-Unrestricted Warfare

» The Chinese identified the main protagonist in this type of warfare not as a statesman or military strategist; rather said it would be George Soros."

» Financial Warfare is to "first amass a great deal of capital."If George Soros could break the Bank of England with a couple billion dollars, what could the Chinese do with trillions of dollars? And, don't forget that there are some estimates that Vladimir Putin is worth \$200 billion and is considered the world's richest man. <https://www.voanews.com/a/terrible-crimes-made-putin-world-richest-person-financier-tells-senators/3961955.html>

GettyImages

- » There are great pools of capital prepared for **financial warfare** all around the world.

July 17, 2014

"Russian hackers managed to slip a 'digital bomb' into the NASDAQ -- one with the potential to sabotage the stock market's computers and wreak havoc on the U. S. economy."

Voice of Russia Headline:

Russia's Secret Weapon, crashing the U.S. Economy and the U.S. stock market.

- » What Happens in a Stock Market Crash?

First, if you own stocks, **you lose money**. Lots of it. If its really bad, the second-order effects will be even worse. Your pension fund could collapse.

Your insurance company might lose the ability to pay claims.

You could lose your job. The Great Depression of the 1930s started with a stock market crash.

C. Third, Economic Warfare doesn't end with a financial crisis. The next step in the playbook is a force-multiplier-a massive network attack on the whole system and critical infrastructure.

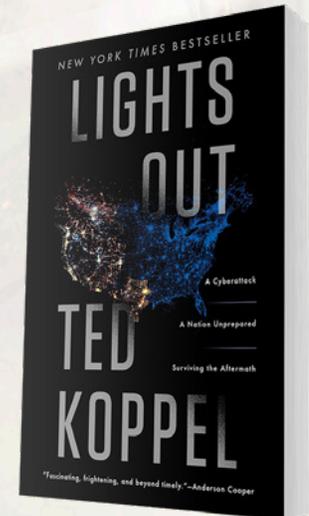

- » **Cyber attacks on top of market attacks.** This could be infrastructure sabotage, power grid attacks, malware, ID theft, denial of service at banks.

"It's incredibly complex, but there is no question that the Chinese have successfully hacked into at least one of our power grids. The Russians have done so also. The Iranians, the North Koreans and possibly individual [hackers] are on the verge of being able to do so, if they haven't done it already." -Ted Koppel Salon Magazine

- » **EMP- Electro Magnetic Pulse** - GOOGLE TRANSLATE FROM 2013 Chinese Defense Article: Electromagnetic pulse bombs or weapons is the Chinese ace According to Hong Kong, "Asia-Pacific Defense" magazine, the PLA's most powerful weapon is EW electromagnetic pulse bomb, and that **this technology is very mature.**

- » Whether from Cyber or EMP or simply physical attacks, a breakdown in the electric grid becomes **a nation-ending event.** Congressional testimony suggested that if the grid were down a full year, up to 90% of Americans would die. Those dependent on medicines or medical care would be at the greatest risks. Beyond that, most Americans do not get water or food or any form of energy without a working electric grid. The chaos would be totally devastating. And yet this **"kill shot"** could be achieved without a traditional military attack.

D. Fourth, create U. S. political upheaval. Cause the Enemy Nation to fall into social panic, street riots and political crisis. You should not be surprised when you learn that there are foreign efforts to divide us. Or, when you hear that foreign entities such as Russia and China have been busy fostering divisiveness with Facebook posts or paying people on both sides to riot and protest. All of this is Economic Warfare and you are the target.

"However, by using the combination method, a completely different scenario and game can occur: if the attacking side secretly (or quietly) musters large amounts of capital without the enemy nation being aware of this at all and launches a sneak attack against its financial markets, then after causing a financial crisis, buries a computer virus and hacker detachment in the opponent's computer system in advance, while at the same time carrying out a network attack against the enemy so that the civilian electricity network, traffic dispatching network, financial transaction network, telephone communications network, and mass media network are completely paralyzed, this will cause the enemy nation to fall into social panic, street riots, and a political crisis."

-Unrestricted Warfare

**NOT ONLY DO WE HAVE SERIOUS EXTERNAL THREATS, AMERICA ALSO HAS IT'S OWN DOMESTIC THREATS AS WELL, LET'S LOOK AT THE TOP 3:**

1. **Identity Politics:** We are not just facing foreign enemies. There are domestic enemies as well. Partisan identity politics create winners and losers, heroes and villains, instead of us working together. You are being pigeonholed by both sides, labeled either a hater or a victim.
2. **Crony Capitalism and Greed:** We have also allowed greed and crony capitalism to take over our basic institutions.

- » So the bank you trust to secure your savings is now playing fast and loose with your money.
- » Complex financial derivatives you've never heard of (and experts struggle to understand) put your financial future at risk. The Top 5 US banks have \$157 trillion in derivatives, more than twice the size of the world's economy. Warren Buffett calls derivatives financial WMDs. <https://www.ft.com/content/201bce0c-289b-11e8-b27e-cc62a39d57a0>

3. **A U.S. financial DEBT TRAP of our own making.** We owe trillions of dollars to our enemies because we want things now and our politicians don't have the courage to say no. We have traded freedom for stuff and the political class is all too eager to buy our votes with your money. Our kids will suffer.

"Our U. S. Debt is the greatest national security threat. . ." -Dan Coates, National Intelligence Director

- » China views our debt as their weapon and has called for the U.S. dollar to no longer be the world's reserve currency.
- » Who holds our debt? The #1 category is foreign governments and the **largest is China.**

## Why You Should Care:

1. **There is still time** to make a difference, but we need to be educated and mobilize our efforts to protect America, western civilization and your future.
2. As Americans, you probably have money in the bank. You may own some stocks, bonds, or real estate. You may have a pension account or rely on social security funds. All of **these are targets** of those who wish to do us harm. Economic War Room developed the war room for you, understand threats and help counter it for yourself and America.
3. The briefing above includes strategies that China, Russia, North Korea and Iran are all developing to **take down America**. Sadly many of our politicians are blind to these events and it is time to mobilize our efforts.
  - When talking with Congress about these threats, the EWR team is often asked two questions. **How many people (votes) do you represent and how much money?**

4. The Chinese regime currently fears Trump's Administration and his national security team. At the same time, they believe Trump may lose power from U.S. progressive politicians and are hoping his administration is weakened so they can continue with their 100-year strategy. [source] Michael Pillsbury/Mark Levin Interview
  5. 40 to 50 percent of Americans care about America being the global superpower. Other progressives believe perhaps that social justice could be better served with a country like China leading. Are you ready to give the economic super power status to other adversaries to see how they can do?
  6. Recent war games show that the U. S is vulnerable to China and other adversaries who are working to take down America. Even in a kinetic war, if the Chinese attack our nerve centers and satellites in space, our military could lose.
  7. While America still is the superpower, poor economic teaching and geopolitics are influencing the next generation, creating risk to US economic freedom and liberty.
-

## Economic Patriot Action Plan

"We built the Economic War Room for you, there's no program designed to protect you. Governments have War Rooms but until now nothing like this was ever available for individuals."

Get Prepared for a War Footing. Become an Economic War Room Patriot. We built the Economic War Room to be your "go to" location. This is where you get the information and strategies needed to protect yourself, your family, your community, and your nation from growing threats. "If you want peace, prepare for war."

**Step 1:** Share this battle plan and get others to subscribe:

- » Get others to sign up review our weekly [Economic War Room battle plans](#) on our website. Each of these will address critical solutions to the threats highlighted on this briefing.
- » Subscribe to our weekly *Economic War Room* show on TheBlaze at [www.economicwarroom.com](http://www.economicwarroom.com)
- » Follow, like, comment and share on [Facebook](#) and [Twitter](#).

**Step 2:** Join us in recognizing the threat and preparing a strategy, we can encourage one another and work together to for VICTORY in this global economic war.

- » Begin to mobilize your values, your votes, and YOUR MONEY.
- » We are in an economic war and it is time to "weaponize your money" toward investments that strengthen America, our national security and economic infrastructure.
- » Look for more information coming soon about being a EWR Victory Patriot founding member.  
**YOU CAN MAKE A DIFFERENCE!**

*Thank you for accepting this mission.  
Together, we will make a difference!*

---

**SHAREABLE THOUGHT:** China's official news agency has called for the creation of a "de-Americanised" world.
