

### **Economic War Room - Election Fraud II - Electoral Theft Status Update:**

*Fair elections and freedom go hand in hand. We are now learning about illegal voter registrations identified across the country. While results are still being validated, up to 95,000 in Texas and 11,000 in Pennsylvania are possible non-U. S. citizens registered to vote. In addition, there are 37 states with potential integrity issues with voter machines.*

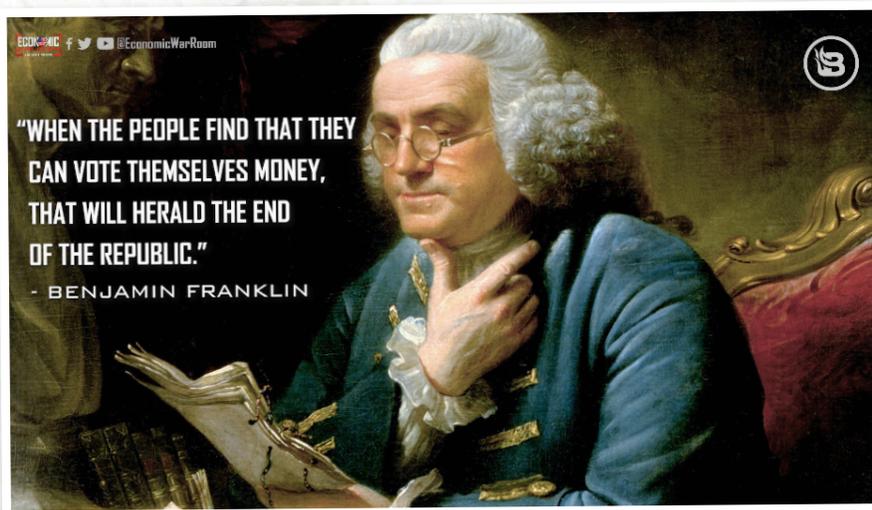

**There is an economic war against you! With the recent far-left radical socialist agendas rising in America, imagine the risks of stolen elections stealing your money in the process.**

**“America has 3.5 million more voters than eligible adult citizens.” -Dallas Morning News**

### **Your Mission:**

To recognize that electoral theft is an economic weapon! Upon completion of this assignment, you will have a topline understanding of the tactics being waged against you. Your mission is to stay alert and educated as it relates to Election Fraud. Second, we must stand together for election integrity. This may require a return to numbered paper ballots with an audit process to ensure fair elections.

[This mission is part II of election fraud and is focused on electoral theft at the ballot box and in the counting rooms. Part I, EP 20, was focused on the dirty tricks of election fraud.]

PAGE 1

## (OSINT) - Open Sourced Intelligence Briefing

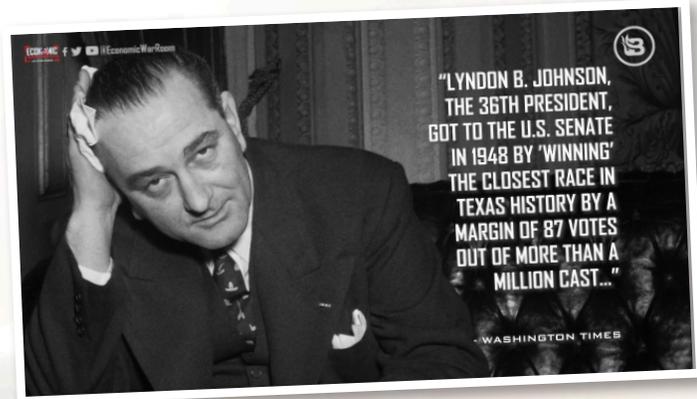

Kevin Freeman - Election Fraud Dirty Trick highlights:

### Tactic and Examples:

**Cheating an election is not new, the tactics used by Lyndon B Johnson to win his Senate seat are well documented.**

Lyndon Johnson's Senate election rigging was even documented in the New York Times by author Robert Caro:

"It has been alleged for years that Johnson captured his Senate seat through fraud, but Mr. Caro goes into great detail to tell how the future President overcame a 20,000-vote deficit to achieve his famous 87-vote victory in the 1948 Democratic runoff primary against a former Governor, Coke Stevenson. A South Texas political boss, George Parr, had manufactured thousands of votes, Mr. Caro found. Johnson died in 1973, Stevenson and Parr in 1975."

**The Problem:** With new technology and lack of accountability there is significant risk to the democracy. Corruption can be easily scaled and election results skewed in favor of one group's agenda, not the people.

### Three (3) Major Electoral Theft Tactics that Compromise Fair Elections:

Your freedom and money are at risk through these tactics:

1. Voting machines can be easily hacked
2. Manipulated elections and voting results
3. Illegal Voters

#### 1. **Voting Machines Can Be Hacked:** Interview with white hat hacker - code name Jekyll.

- » At the 2018 DEF CON Hacking Conference, it was common knowledge how easy it is to break today's shoddy technology voting machines
- » It is so easy to hack a voting machine, that the experienced hacker community did not want to be a part of the competition. Voting machine hacking it is so easy it has been a joke for over a decade.

- » During 2018 Black Hat Convention, an area called voter village was set up for hackers to attempt to hack. The hacker community made a mockery of it and brought in kids to hack the system.
- » One 11-year-old kid hacked a voter machine in less than 30 seconds. Others even younger were able to hack the system as well.
- » To hack a voting machine, you do not even have to be in the room, you can sit outside in your car and do it.
- » When it comes to electronic devices, there is little integrity in the system.
- » It seems like corruption because those running the systems have not updated the software. Some systems are using a version of Windows 2000 that has not been updated in a decade or longer.
- » This type of flagrant neglect is asking for machines to be compromised. Is it on purpose?
- » We must ensure that voting machine companies follow up with NIST standards. Each system needs to be checked and certified to meet government standards. Our military does this on a daily basis, but there does not seem to be a willingness to do this with our election machines.

**2. Elections and Voting Results are manipulated – Case Study**

**Sharron Angle vs Harry Reid in 2010, indicates blatant fraud?:**

Vs.

Real Clear Politics

**The Closing Poll data:**

"Angle has managed to pull into a fairly steady four-point lead here, with some pollsters seeing an even larger lead among those who have already voted. Either candidate could win here, but Angle is the favorite going into the closing weekend." 10/29/10 RCP

[https://www.realclearpolitics.com/epolls/2010/senate/nv/nevada\\_senate\\_angle\\_vs\\_reid-1517.html](https://www.realclearpolitics.com/epolls/2010/senate/nv/nevada_senate_angle_vs_reid-1517.html)

All exit polls indicated Angle was winning. The polling data had her up 3 to 8 points.

**The Weekend Results:**

Despite final polls and that day's exit polls showing Sharron Angle the winner, Harry Reid ended up declared the winner by 5.6 points. This was approximately a 9-point swing from the poll results, something unimaginable to the Nevada pollsters.

**At Issue:**

The rest of the Democrat ballot also consistently swung vote totals from the polls by over 9%. The margin consistency across the platform is suggestive of voting machine manipulation.

**Additional Background:**

- » Ten minutes after the polls closed, Sharron was told she lost the election. How is that possible when exit polls showed her winning?
- » Serious reports that illegal aliens were coerced to vote.
- » A mysterious power outage happened in Henderson, the largest Republican city in Nevada. Electronic voting machines, regardless of internal battery claims, may have been reset. Were votes erased, were voters turned away, or tallies altered during the hour blackout?
- » Eyewitness accounts suggested that people were bussed in from other states to vote. GettyImages
- » The election swung by 9.3% in every race U.S. Senate, U.S. Congress, Governor, etc. down to the Democrat judicial candidate, to change by the same margin in every race is a statistical impossibility.

- » Angle through her attorney, Cleta Mitchell, took the election to the Democrat attorney general and the Nevada secretary of state. Even though she was the candidate, she was told she had “no standing.” They were not going to look at it.
- » The Obama Justice Department was led by AG Eric Holder. He refused to investigate.
- » Justice delayed is justice denied. In 2014 Angle took the case to the new Nevada Attorney General and Secretary of State, both Republicans. They did not view it politically correct to address using statute of limitation and not being able to change the election as possible excuses.
- » In a 2012 tour, Sharron Angle traveled the country and consistently asked people if they felt that elections are fair and honest. Multiple examples of tampering with ballot harvesting, and voting machines were uncovered. This is a growing trend.

Following the Collection Deck is Sharron's Action Plan.

---

**“I count everything but cheating.”** -Nevada Pollster after announcement of Reid winning election

---

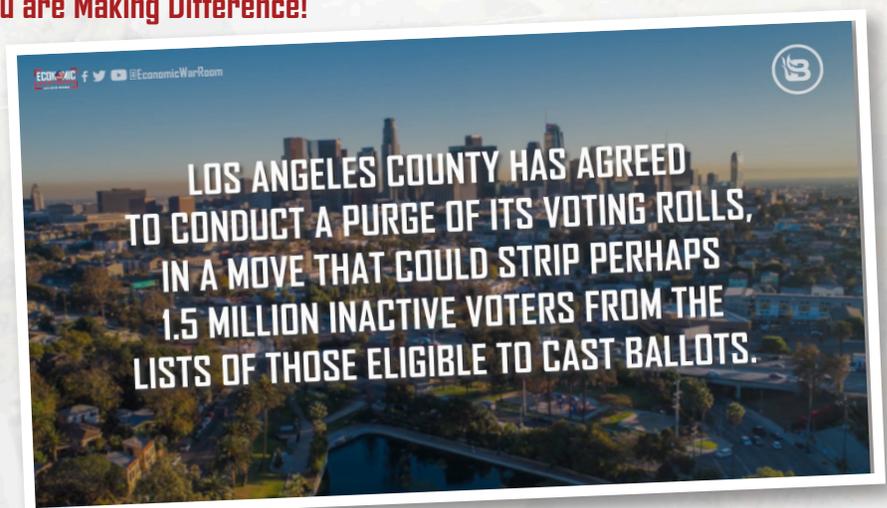

**3. Illegal Votes:** There is Evidence of Illegal voting across America. Interview with Adam Kraft, CEO, Allied Special Operations Group (ASOG). ASOG recently concluded an integrity analysis of the 2018 midterm elections and found the following:

- » There are 37 states with problems at the machine level, the server level, and/or the companies/contracts that deal with the election.
- » There are no disclosure requirements of the relationships between voting machine companies and political operatives.
- » It was reported that 600 voters in Broward county who voted in the mid-term election were age 104 or older.
- » Other countries see the risk with voting machines. One country is now moving back to paper ballots due to the risks of the electronic spectrum and central counting.
- » Voting machine companies need to disclose who their owners are. Are there George Soros connections? Hard to tell with all the shell companies involved.
- » Are those who service and operate the voting machines subject to foreign influence? Some may have dual citizenship and might be compromised.
- » Our country has a huge problem, and that means the world has a huge problem.

In 2014, professors from Old Dominion University and George Mason University produced a report estimating that about 6.4 percent of noncitizens voted in the 2008 presidential election and that 2.2 percent voted in the 2010 midterm election. -Watchdog.org | Bethany Blankley | Nov 12, 2018

**Good News: Economic Patriots like You are Making Difference!**

This was drive by a grass roots organization, The Election Integrity Project of California. They spent time auditing the voter rolls to ensure a fair election. Armed with data, Judicial Watch worked with the group to sue the county and have the inactive voters removed from voting rolls.

## Why You Should Care:

1. What happens in one corrupt state election can impact all of America. What looks like a corrupt Senate election in Minnesota resulted in Obamacare. Al Franken was elected by a margin of 312 votes after a nine-month dispute. Some ballots were allegedly found in the trunk of a car. There were over 1,000 votes that were later found to be illegal.
2. Voting-machine companies can be foreign based or have large investors from other countries. This could be a national security threat.
3. Ask yourself why voting machines use hackable, old software? Why don't they meet NTIS standards? Is it incompetence, or part of an agenda?
4. Fair elections and freedom go hand in hand. Without election integrity, a national election could be thrown into chaos that destroys the United States.
5. There should be a full-scale, non-partisan federal voter fraud investigation to ensure that integrity is in place. To date, this topic has been ignored and pushed to the side. It is not politically correct to question voter integrity, unless the wrong candidate wins.
6. Non-citizens are voting. "Many states do not have a requirement to certify citizenship.... limited systems in place to prevent unlawful voting are either non-existent or so weak they are useless." – Tom Fitton, Judicial Watch

## Economic Patriot Action Plan

As an economic patriot, you can make a difference.

**Step 1: We need paper ballots that are numbered.** This creates a paper trail and the ability to audit and recount when needed. Manipulated voting machines provide limited accountability. Make sure your Congressional Representative and Senators understand the threats that voting machines can pose to a fair election.

**Step 2:** If vulnerable voting machines cannot be eliminated immediately, then **NTIS standards need to be put in place** to minimize fraud and hacking attempts.

**Step 3: Get involved politically.** We need poll watchers (trained volunteer to sit at the polls and make sure people are voting fairly). Also, we must ensure that honest people observe the counting process to make sure it is accurate.

**Step 4: We need to clean the rolls,** like the group just did in California. Gather like-minded neighbors and start working through this with your representatives, and through county and state platforms.

**Step 5: You need to get involved,** so that good candidates win by large margins and ensure cheating is minimized.

**Step 6: Share this Economic Battle Plan™** and our short video segments with friends. We set up the Economic War Room to be your go-to resource for information, preparation, and mobilization.

- »» A. Get others to sign up and review our weekly [Economic War Room Economic Battle Plans™](#). Each of these will address critical solutions to the threats highlighted on this briefing.
- »» B. Subscribe to our weekly Economic War Room show on TheBlaze at [EconomicWarRoom.com](#).
- »» C. Follow, like, comment and share on [Facebook](#) and [Twitter](#). [We recognize these tools may be compromised at times, but when they are not filtered, they can be major platforms available to reach out to the public.]

**Step 7: Pray for America.**

***Thank you for accepting this mission.  
Together, we will make a difference!***

**SHAREABLE THOUGHT:**  
"Fair elections and Freedom go hand in hand."

## APPENDIX

### **America's Election System is Scandalous and Sloppy, Spotlighting the Need for Election Integrity.** By Sharron Angle

Manipulating or defrauding voters is an American tradition. Voters are a fragile group, at best. The accepted statistic is that fifty percent of those who are eligible to vote actually register. Of those who register, only fifty percent will cast a ballot. In other words, only about twenty-five percent of eligible voters actually vote. This is largely because voters are cynical about the value of their vote and they're disenchanted with the integrity of those running for election. When would-be voters are aware of deliberate voting fraud that robs them of their vote, they throw up their hands in disgust and refuse to participate. This only strengthens the percentage of fraudulent participation in most elections which is accepted as three percent of the vote but in some areas it is over ten percent.

In 2006, I went to court to defend Nevadans' right to vote. The voting machines calculate votes accurately to ninety-eight percent. Any candidate who loses or wins a race by less than a two percent margin is in a statistical tie. There is no way to prove the accuracy of the vote. Even though Nevada has a printed, paper ballot in the machine, it is merely a voter audit and not the official ballot. In the 2006 Congressional primary, I lost the election by 421 votes. This was half a percent of the votes cast.

The polling place irregularities reported in the newspapers scandalized the electorate. I received dozens of phone calls with complaints from people who were turned away at polls that did not open on time, who were denied their right to vote because machines were not ready, or who had experienced machinery malfunctions while they were voting such changing their vote from me to my opponent.

I went to court for three reasons:

- 1) To make the paper ballot the official ballot;
- 2) To demand a new ballot in Washoe County (Reno, NV is the county seat) for the irregular voting process that included polls not opening until 10 a.m. instead of 7 a.m.;
- 3) Because people were refused the right to vote when a) voting machines were not operational, b) paper ballots jammed in the voting machines, and c) paper ballots did not print and these voters were uncertain whether their vote was recorded. In one instance, a polling place was moved the night before voting, perhaps by a janitor, but not by an official from the Registrar's Office.

In court, the registrar admitted he could not verify that even the judge's vote registered in the machine or was counted in the election! The judge dismissed the case, asserting that he had no jurisdiction, and I had no money for an appeal in a higher court.

In Nevada's 2010 U.S. Senate general election between Senate Majority Leader Harry Reid and me, several factual irregularities occurred, as covered by a blogger:

**First, there is the fact that Sharron Angle was ahead – and gaining steam – in all major polls** before the election, and that comparable polling data accurately predicted race outcomes in analogous races.<sup>i</sup>

Paul Joseph Watson of Prison Planet further explains, at [\*Dark Politricks\*](#):

Four separate Rasmussen polls prior to the election had Angle ahead. Two weeks before Super Tuesday, she held a fifty percent to forty-seven percent lead over Reid. One week prior to voting, on October 26, her lead was extended to four points, with Angle at forty-nine percent and Reid at forty-five percent.

To have a nine point swing, from Angle enjoying a four point lead just a week before the election, to Reid winning the seat by a clear five points, is highly suspicious...Nine points is not within the margin of error for polls, especially those conducted by Rasmussen, which is considered to be one of if not the most credible polling agency.<sup>ii</sup>

**Then there were [reports](#)<sup>iii</sup> of voting machines that were automatically checking Harry Reid's name**, the same voting machines that were serviced by pro-Harry Reid, pro-Democrat [Service Employees International Union](#)<sup>iv</sup> members. These voting machines have received undeserved (or deserved, depending on one's perspective) [support from Harry Reid](#),<sup>v</sup> even though they are the same "100 percent unverifiable, error-prone, hackable, illegally-certified, electronic voting systems the state forces all voters to use at the polling place." The voting machine [issues were observed in Clark County](#),<sup>vi</sup> "where three quarters of Nevada's residents live, and where Senate Majority Leader Harry Reid's son Rory is a county commissioner.(The County Commissioners certify elections and employ the registrar of voters.) **Then, as reported in [The Washington Examiner](#)**<sup>vii</sup>, **there were casinos, like Harrah's and [MGM](#)**<sup>viii</sup> (remember this, my friends, next time you are in Nevada), **who engaged in extraordinary measures** to get their employees to vote, as instructed by a Harry Reid staffer: who 'told Harrah's it needed to "put a headlock" on its supervisors 'to get them to follow through.'" Further, 'This plea was distributed to senior executives throughout the company by a Harrah's vice president, Marybel Batjer. Batjer demanded that those executives "do whatever we need to do to get the supervisors to know that there is NOTHING more important than to get employees out to vote. Waking up to a defeat of Harry Reid Nov 3rd will be devastating for our industry's future.'"

Harrah's did just that, getting headcounts and insisting that supervisors explain why their employees had not yet voted. They also coordinated with employee unions to get buses and shuttles to take the employees to the polls.

This was not a situation where a corporation was simply encouraging its employees to go to the polls and vote for their candidate of choice—Harrah's was telling its employees how important it was to elect Reid, setting up a whole system to coerce its employees to vote, even recording of who had not voted. [It was reported](#)<sup>ix</sup> that the casino voting effort was done in conjunction with Culinary Local 226, a heavy Reid supporter that represents about 60,000 casino workers. Sharron Angle lost by [40,669 votes](#).<sup>x</sup>

**Finally, there is the illegal immigrant issue.** From an [alert](#)<sup>xi</sup> issued by Americans for Legal Immigration PAC:

It is a felony for any non-citizen to vote in a US election and while the scale of involvement is unknown, it could be very substantial in some areas including North Carolina, Nevada, Colorado, and Washington State. In many of these areas, Democratic candidates campaigned and appealed to illegal aliens, and deployed illegals to bring out similar voters.

My attorney, Cleta Mitchell, filed the case with the Department of Justice and Nevada's Attorney General and Secretary of State. All of these officials were Democrats. We were denied standing for our case even though it was well-documented in the press. When the Republicans took all of these offices in 2014 I took my case to them. I was told that they would not take the case because they thought it had passed the statute of limitation. Even though it may not change the outcome of an election, exposing it may be a deterrent to future perpetrators and with no exposure of wrongdoing, the press and the political elite continue to claim that there is no such thing as election corruption. When

anomalies continue unchallenged and unchecked, they calcify into the system and become harder to detect.

**THE SOLUTION:** There are ways to correct election fraud but they require grassroots citizens action. Lawmakers have proven (because of self-interest), they cannot be depended upon to make the necessary changes or to follow-up by enforcing those changes. Here is a five-step plan to take by the integrity of our vote.

- 1) Clean up the voter rolls:
  - a) Build an Election Integrity team.
  - b) Educate the public. I have made a documentary that reveals the truth about election corruption, *Not On My Watch*.
  - c) Voter Roll Audit: Use team to electronically audit state voter rolls and encourage purging of lists
  - d) Precinct captains to maintain accurate voter registration lists.
- 2) Change the law: Our election laws often make our own government unwitting participants in election corruption. The following laws should be changed.
  - a) Decertify electronic voting machines: Demand a voter marked paper ballot that can be seen by officials in a hand count. Tallies of paper ballots may be done by machine unless there is a challenge.
  - b) Voter ID and proof of citizenship: Voters must produce identification before being given a ballot and citizenship must be required upon registration to vote in all elections. Demand a purple inked finger for those who have voted to discourage multiple voting.
  - c) No Automatic Voter Registration (AVR): AVR should not be allowed for individuals when applying for a driver's license or state identification card. This violates the National Voter Registration Act (NVRA) by not requiring voters to provide proof of eligibility such as citizenship. This is especially troublesome in states that offer driver's licenses to illegal aliens.
  - d) No same day registration: Voters Qualifications need to be verified before the vote is cast. There is no way to track and remove an illegally cast ballot.
  - e) No Early Voting: Early voting encourages duplicate voting at multiple voting stations often for weeks or months before election day and by-passes the local precinct where voters are often known by election officials.
  - f) Limited Mail-in Voting: Federal law requires all states have some form of absentee or mail-in voting. This mail-in voting should be limited to a number of valid excuses based on age, absentee status or an inability to vote on Election Day. Mail-in ballots should not be opened until after the close of the polls on election day so ineligible voters can be removed before the ballots are counted. The abuse of mail-in ballots leads to the latest Ballot Harvesting which brings carloads of "misplaced or delayed in the mail" mail-in ballots to the polls after election day.
  - g) Primaries should not be replaced by run-offs which allow the top two vote getters in a "primary" regardless of party affiliation to run-off in the general election. There should be no ranked-choice elimination should be used. The winner of a primary regardless of percentage should proceed to the general and the winner of the general wins the election again regardless of the percentage of the vote being less than 50%.
  - h) Redistricting should remain with state legislatures rather than a non-elected commission for accountability to voters.
- 3) Vote the Bums out: Elections have consequences.

- a) Keep track of voting records at all levels. Especially follow votes on election law.
  - b) Provide voters with guides and hold regular precinct informational meetings.
  - c) Engage voters at a grassroots level by knocking doors, phone calls, social media.
- 4) Enforce the laws already in place:
- a) Understand and educate your group on election law. Each state is a little different.
  - b) Justice delayed is justice denied. Be vocal when laws are not being followed.
  - c) Maintain an active fundraising effort so you can go to court, challenge the voter lists, produce educational materials and forums.
- 5) Get Involved:
- a) Be an election watcher: Citizens watching the process from start to finish with their phone cameras and recorders at the ready can not only document irregularities as they occur, they can identify the criminals for prosecution. Just their presence will also remind fraudsters that someone is watching.
  - b) Be ready to file lawsuits and testify in court.
  - c) Be encouraged by the words of Winston Churchill when he visited the Harrow School on October 29, 1941, he said, "This is the lesson: Never give in. Never give in. Never, never, never, never—in nothing, great or small, large or petty—never give in, except to convictions of honor and good sense. Never yield to force. Never yield to the apparently overwhelming might of the enemy."
