

ALERT: The integrity of the 2020 election could be at risk!

Economic War Room releases further findings from a cyber-forensic investigation on election fraud and compromised electronic voting machines. This is an extension and important update from our battleplans from Episodes 20, 21, and 70.

Background Briefing:

We have said it before, the likelihood of full-scale, organized election fraud is no longer just a possibility. It's a REALITY. This is not a partisan issue. It's an AMERICAN issue.

Hillary Clinton recently announced, "Joe Biden should not concede under any circumstances because I think this is going to drag out," Clinton warned. She goes on to say, "even a small margin of votes can have major consequences." <https://www.politico.com/news/2020/08/25/hillary-clinton-joe-biden-election-advice-401641>

In New Jersey, Mail in Ballots raise serious questions about election integrity with New Jersey recently rejecting 1 in 5 ballots as fraud. https://www.realclearpolitics.com/articles/2020/06/26/1_in_5_ballots_rejected_as_fraud_is_charged_in_nj_mail-in_election_143551.html

With the November 2020 presidential race, election fraud is a top concern. Economic War Room has been looking into this for the last two years and brings more breaking news as it relates to vulnerabilities and how your vote can easily be compromised.

Think your vote is safe if the voting machine is not connected to the internet? Think again! In this week's briefing Russ Ramsland provides more documentation on the election fraud process and how it works.

This is an updated report that highlights major security issues recently identified as we approach the 2020 presidential election.

Given the new insights uncovered in this week's briefing, election theft concerns are valid, and action needs to be taken immediately to secure our election!

Your Mission: Electoral theft is an economic weapon! Your mission is to stay alert and educated as it relates to Election Fraud and to ensure your vote counts the best way possible.

Election Fraud – Forget the voting machine, all data is uploaded to the central tabulation server where election fraud is easy.

FOR FURTHER INFORMATION BE SURE TO VIEW THESE ELECTION FRAUD EPISODES:

1. Due to the alarming nature of this report, we have provided the entire show of Ep 70 on voting fraud for all to see it at XOTV.me. View it here for free - [CLICK HERE](#).
2. Previous Short Videos by topic have also been posted to YouTube - [CLICK HERE](#).

(OSINT) –Open Sourced Intelligence Briefing- Electoral Theft Actual Case Study and Analysis: Economic War Room with Kevin Freeman. Kevin invited Russ Ramsland who has been studying this problem to update their findings as it relates the integrity of today's electronic voting machine.

1. Ramsland's research documents behind the scenes data related to Election Fraud at the tabulation server and how easily data can be altered:

Incompetence or purposeful - The election professionals appear to have already rigged the system to make it easy to retabulate the vote counts they need.

“We’re not talking about bogus voter rolls. We’re not talking about bogus voters. We’re not even talking about polling station equipment being hacked. That’s all voter fraud. **Today we’re talking about what happens once it gets to the central tabulation server. We are saying that it is now downloaded someplace else with remote computing capability.**” –Russ Ramsland

Ramsland's team first observed how absentee votes were handled in a Dallas County Election:

A. They Looked into the Logs and How Absentee Votes and Early Voting Data Was Entered:

- They were tabulated.
- They would print a report.
- Then the votes were reset to zero and reloaded from a new place.

WARNING: THE ONLY REASON TO DO THIS PROCESS WOULD BE TO CHANGE THE VOTES

This was documented in the logs:

“We saw early voting, which, by the way, they played with for 4 days, early voting was over on a Friday. The election was on the following Tuesday over that entire weekend. **They were downloading, printing these results, changing them and reloading.**” –Russ Ramsland

ALERT: Absentee and mail-in votes are easier to manipulate:

“Then on Election Day itself, we saw a whole range of precincts actually get changed. It’s a little harder on Election Day because you’re having to do it in real time on Election Day because they’re going to report it that night.

The next step was to have a credible cyber team map out the Dallas voting system. Remember, we are told “none of this is supposedly connected to the internet.”

B. There was No Air Gap - A Dallas County Election Completely Linked to the Internet?

“And what you’re seeing here are all the connections for Dallascountyvotes.org. And if you look at this thing, you see that this thing is connected to IP addresses all over the place and how anyone in their right mind can say that this is air gapped and not connected to the Internet is just ludicrous.”

C. A Wider Look Across the Nation and Even Globally

→ The team went on to look at other voting machine companies globally and found keys to get into the system left everywhere. [See the video here.](#)

“We found that the public facing websites were so vulnerable that we could see the admin names and the passwords for all the critical information files. And it was right there in the open.” –Russ Ramsland

→ They could see voter registration lists word wide by precinct. Twenty-seven million voter files in Florida alone could be accessed.

→ There was personal information and voting information exposed on the internet.

“We saw previous vote uploads. We saw all the source code. So, if we wanted to, we could have gone in and injected our source code and redirected stuff anywhere we wanted into their source code.” –Russ Ramsland

NOTE: THE CYBER TEAM DID NOT TOUCH THE INFORMATION BUT COULD HAVE GONE IN AND INJECTED THEIR OWN SOURCE CODE.

“In fact, they can manipulate the data and could have you in a primary election. They can have you voting in the Democrat or Republican side if they wanted it.” –Russ Ramsland

D. Next the Cyber team went to the servers at the Amazon World Services - AWS database where election data is stored.

→ There were four databases worldwide and they saw all the ballots.

→ They observed all counting and tallying functions.

→ They could go in and see who you voted for and it could be changed to anybody they wanted to.

→ They could collect data on each person and who they voted for violating privacy rights.

[CLICK HERE TO WATCH VIDEO EXCERPT AND SEE DOCUMENTATION](#)

“The bottom line is, if these “good cyber guys” could make any candidate win or lose, then so can the bad guys.” –Russ Ramsland

2. Hacking Was Not Needed - Intrusion Software was Literally Turned Off.

"The alarm system was turned off before unlocking the door, No one had to provide a password. No one had to let you in. You could coordinate with any email or report that you wanted to and manipulate the vote. There was no accounting. **So, the question we came up with was, why is this so easy?"** –Russ Ramsland

[CLICK HERE TO WATCH VIDEO EXCERPT AND SEE DOCUMENTATION](#)

WHY WAS THE ELECTION SYSTEM SO EASY TO GET INTO?

Exhibit: Oracle Executive Confirms "access to an entire voter data base without hacking"

"The Cyber team took and downloaded everything that was wide open in an Oracle database at a county level and on the screen you'll see here, Oracle database shows missing security. And I'm sorry about the little yellow thing up in the top right corner that actually covers the home address of the Oracle executive we went to see in Washington, D.C. blurred out.

And he looked at it and he started to thumb through it, and he goes, 'oh, my God, you've downloaded the entire database. You've got access to absolutely everything without hacking.' Then he turned it over to this front page again. Now I direct you to this front page, I asked him, how do you know that the intruder tracking software is on or off?

He says, well, this is all turned off. And then he thought, **'This is all turned off, the default position is for it to be on. I think this is something somebody did purposefully.'**

I asked, how do you know?

He said, 'look at that very first paragraph on the first page, if anything have been turned on, you would have seen it listed after that. **If it's not listed, it's not on.** So you should see a whole list of things right after that first paragraph that will indicate the security and intruder tracking pieces that are turned on.'"

"What I'm telling you today and what we're going to demonstrate is that unseen and undetected (because all the security and the intruder tracking was turned off), people can go in and intercept this.

They can direct the data to a remote location and change it and then reinject it back in." –Russ Ramsland

AT ISSUE:

- A. All votes are online, and they used the same security code to open the doors to every voter database. Default settings for the intrusion software were not even turned on and we expect this was purposeful.**

The result? It is easy to change votes and your vote is not secret. It is like having the master key and being able to open every house across the country. What could go wrong?

[CLICK HERE TO WATCH VIDEO EXCERPT AND SEE DOCUMENTATION](#)

- B. A voting analytics company that has a history of election fraud and does election analytics and forecasting on early voting and how many early votes they need.**

Why are they downloading and uploading data into from public databases? Evidence and timestamps suggest possible malicious activity against the integrity of our elections.

“One of the things that we realized is when we looked at all of the problems in the Dallas log, we saw literally, I think 1,800 instances where it would say there was a time-stamp mismatch in this data and the program. And what that means is somebody has come in with a machine that’s not supposed to be in the loop, that doesn’t sync up and has put a file in.” –Russ Ramsland

[CLICK HERE TO WATCH VIDEO EXCERPT AND SEE DOCUMENTATION](#)

- C. ALERT - Watch the entire [Episode 103 here](#) to see the actual examples and exhibits in full context.**

Why You Should Care?

- [Economic Battle Plan™ 70](#) provided extensive documentation of the potential for election fraud and we suggested paper ballots. Paper ballots are no longer a possible solution; therefore, action needs to be taken now to ensure a fair 2020 election.
- This battle plan provides more documentation of election fraud risk (with evidence that it has actually been executed) related to inconsistent time stamps and voter log data manipulation.
- Look at the reporting, the political statements and the push for mail-in voting. The documentation above shows mail-in ballots are more easily manipulated.
- We are already being set up for a contested election in the 2020 election race and the process has begun to destroy trust in our elections.
- Our sources indicate the Democrat party already has lawyers ready in key battleground states to contest the results and try to ensure wins for their candidates.
- We were not able to achieve enough momentum from [EBP 70](#) to get a technical fix to the electronic voting system, and this is a critical election. Be Alert.
- We are in the ultimate economic war as 2020 will have dramatic impact on pocketbook issues and economic liberties.

In the Economic War Room®, we encourage Americans to be the “small ships that make the difference.” You cannot solely rely on the government or the president to solve your problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty.

“One of the items it shows... (are) the emails for the poll workers. That means 7000 poll workers in different areas of Florida have all of their information compromised. So, if we have poll-worker databases, we know who’s going to work the polls. What do you think would happen if a foreign intel service then decides to go to those poll workers and compromise them to control them?” –Jekyll, “White-Hat” Hacker

In the Economic War Room, we encourage Americans to be the “small ships that make the difference.” You cannot solely rely on the government or the president to solve your problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty.

Action Steps:

Share this battle plan with your friends.

1. The potential for election fraud on a national scale is real. We encourage you to read this and our other election and voter fraud battleplans. Watch the entire episode of [EP 70](#) as it includes actual video footage of a “white-hat” hacker explaining the ability to access our supposedly secure US voting system. This was done without a hack, in open source, through public access software.
2. **If it is possible, vote in person instead of mail in and absentee ballots. If you cannot get to the polls, ensure you can vote through absentee voting.**
3. Contact your representatives and send this battle plan, plus EBP [70](#), [20](#), and [21](#) to them. Ask them to ensure there is true integrity in our election system.
4. Go to www.economicwarroom.com/myvote for other critical information.
5. We called for this before, but a vigorous investigation, exposure and correction would be a monumental republic-restoring process. AG William Barr needs to get on this!
6. At this point in the election, it appears our only alternative for 2020 is to have constitutional lawyers in the key polling centers who understand the weakness in our current election system and who can watch and stop the fraud and illegal voting tabulations.

ECONOMIC BATTLE PLAN™

ELECTION INTEGRITY IS AT RISK **3.103**

CLEARED FOR RELEASE 09/03/2020 (ECONOMIC BATTLE PLAN™ POINTS: 100)

7. Be educated and understand the real risks of election fraud and election integrity. THIS IS LIKELY TO BE AN ONGOING TOPIC ACROSS AMERICA. WE WANT YOU TO HAVE THE FACTS. Go to Economicwarroom.com and sign up for our [Economic Battle Plans™](#). Get up to speed with our previous episodes and battle plans on this topic. Review Economic War Room's Episode 20 ([Battle Plan 20](#)) on "Election Integrity", and Episode 21 on "Election Fraud" ([Battle Plan 21](#)).
8. **Send this battle plan to friends and ask them to sign up for our weekly updates (www.economicwarroom.com). Be sure to catch the data and links below for more documentation. We want you to have access to key information to make your own intelligent decisions.**
9. Weaponize your money toward impact investing that strengthens America.

We need more Economic Patriots on the team! Consider what you can do now to help strengthen America or even help someone in need. Keep in touch with your congressional representatives. Choose from the list or set your own goals:

- ✓ Get others to sign up on our website (<https://www.economicwarroom.com>) and review our free weekly Economic Battle Plans™. Each of these will address critical solutions to the threats highlighted in this briefing.
- ✓ At our [Economic War Room®](#) website, sign up to TheBlaze for our complete weekly shows. Please use our code (**ECOM**) from that link for a discount and FREE trial.
- ✓ Follow, like, comment, and share on [FB](#) and [Twitter](#). Look for short video segments on [FB](#) and make sure those are shared. We recognize these tools may be compromised at times, but if they are not filtered, they are the major platforms available to reach out to the public. [Know that alternatives to the social platforms listed above are under EWR consideration.]
- ✓ Check out XOTV (<https://xotv.me/channels/233-economic-war-room>), a new free speech video platform that Economic War Room is proud to partner with. Access is FREE but consider making a donation to EWR on that website to help with Economic War Room's research and production costs.
- ✓ You are welcome to share this battle plan and our short video segments with friends on [FB](#) or [YouTube](#). We set up the Economic War Room® to be your resource for information, preparation, and mobilization.

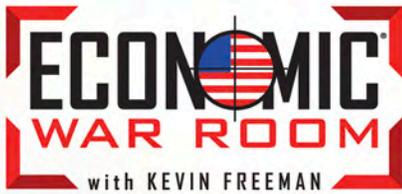

- ✓ Do this now! Have a financial action plan based on multiple geopolitical scenarios developed now. Advanced preparation is key. Trying to figure what to do when an economic event happens is usually too late.
- ✓ Talk with your financial advisor as it relates to your savings/investments. Ensure your advisor understand the potential impact economic/geo-political scenarios could have on your portfolio. LOOK FOR ECONOMIC WAR ROOM'S ADVISOR AND INVESTOR ONLINE TRAINING COURSES COMING SOON.

Shareable Quote:

**“It’s not the people who vote that count, it’s the
people who count the votes.”**

–Attributed to Joseph Stalin
