

Special Report: A Bi-Partisan View on Voting Machine Vulnerabilities

On November 12, the Cybersecurity and Infrastructure Agency released an official statement from the US Government that has been echoed across the nation by the mainstream media. It said:

“The November 3rd election was the
most secure in American history.”

At first look, that seems pretty definitive. And yet, the evidence does not appear to support their optimism. This special report we take a bi-partisan look at Voting Machine Vulnerabilities.

Your Mission: To understand the risks of electronic voting machines and to help ensure fair elections for America.

Note: #SocialPatience is needed as we go through the legal process of understanding the 2020 election results and the integrity of America’s voting system.

Ep. 3-115 (OSINT) Open-Sourced Special Report. This is a Special Election Fraud Report with Kevin Freeman from the Economic War Room.

1. The most secure election in history: Really?

We opened with a statement from the Federal Agency charged with ensuring the security of our elections. Initially, it was encouraging to see their declaration that our election was “the most secure in American history,” in spite of all the concerns raised by the Trump campaign.

If you are a regular visitor in the Economic War Room, though, you know we have reason to be suspicious. We have had multiple experts come into the War Room and demonstrate just how vulnerable our electronic voting systems really are.

CASE STUDY – ELECTION THEFT ISSUES RECORDED AND GIVEN TO AUTHORITIES IN 2019. At Issue today is exactly what we discussed almost 2 years ago.

Russ Ramsland (Election Fraud Expert) and a White Hat Hacker code named Jeckyll.

Watch a short clip from Jeckyll and Russ Ramsland (or watch the whole episode):

https://youtu.be/k4UKHAX_0Xw [starts at 25:42 and run to 29:04]

Note: What is so significant about this is that it was recorded in 2019, well before any of the things we have seen recently.

At the time, the economy was roaring, and most analysts believed that President Trump had a really good chance at a big reelection victory. Even George Soros admitted he would likely win in a landslide if the economy stayed strong (this was before the pandemic hit). Yet we were pointing out the risks of our electronic voting machines.

2. IT IS INTERESTING THAT OTHERS WERE WORRIED ABOUT ELECTRONIC VOTING AS WELL. IN FACT, at the time, this was a bi-partisan concern.

Look at this quote from [Medium.com](https://medium.com) (this is by no means conservative or even Republican publication):

America's Electronic Voting System is Corrupted to the Core - [full article](#)

Jennifer Cohn Sep 7, 2019

"We can't fix that which we don't understand. The dark underbelly of America's staggeringly insecure voting system is no exception. Without knowledge of the following facts, the American public is at grave risk of being scammed by pretend fixes to a system that is corrupted to the core.

PAGE 2

Just two vendors – Election Systems & Software, LLC (ES&S) and Dominion Voting – account for [eighty percent](#) of US election equipment. Thus, corrupt insiders or foreign hackers could wreak havoc on elections throughout the United States by infiltrating either of these vendors.”

“ES&S and Dominion are both owned by private equity, which means we don’t know who funds and controls them. And what little we do know is concerning.”

Or consider this from Breitbart:

Top Democrats Raised Concerns about Dominion Voting Technology in 2019.

<https://www.breitbart.com/2020-election/2020/11/13/top-democrats-raised-concerns-about-dominion-voting-technology-in-2019/>

3. Democratic Leaders who are now wanting to rush to a President Elect decision prior to official certification used to be concerned.

Democrat leaders, including Sens. Elizabeth Warren (MA), Amy Klobuchar (MN), and Ron Wyden (OR), wrote a letter in December 2019 to the private equity firms controlling the United States’ three leading election technology companies, expressing concern in the letter about the election technology industry’s **“vulnerabilities”** and **“lack of transparency.”**

Even the New York Times has a 2018 video that shows a Michigan professor hacking a voting machine to prove how easy it is. Then there is the 2016 video that shows the same thing from a Princeton professor who hacked a Dominion machine. Then there is PBS story that nailed it big time, especially in relation to Georgia. <https://www.pbs.org/newshour/show/in-georgia-primary-election-chaos-highlights-a-voting-system-deeply-flawed>.

4. The point is this. Claims made by the Trump Campaign lawyers are not incredible, unusual, or out of bounds.

“Any reasonable person who watched the ballot totals being reported knows that something very strange happened.” –Kevin Freeman

- Any fair person who looks at the bi-partisan warnings from before the election knows that there are reasonable grounds to demand an investigation.
- The media is rushing to a conclusion that does not match the facts. The “Office of President-Elect” is premature at best.
- In fact, there is a tremendous HBO documentary that covers just how an election might be stolen. That documentary appears almost prophetic when compared to what we saw this year.

- To show how **this is a bipartisan issue**, you should check out an article written by Mike Waller where he details the Jimmy Carter standards for election integrity. It’s shocking how many of those standards have been violated in the contested states like Michigan and Pennsylvania and even Georgia.

<https://amgreatness.com/2020/11/17/how-jimmy-carter-can-help-trump-get-a-clean-vote-count/>

5. Even if all the standards for voting and audits and recounts had been followed (and of course they were not), we still have the machine vulnerabilities that are at the crux of the Trump case.

- The media will lie to you, just like the Cybersecurity and Infrastructure Agency did when they declared this election the most “secure” in history. **Only later did we learn that their report was written by the election machine companies themselves.** The very ones who put our democratic system at risk.

- It's not just our hacker that believes this. As mentioned earlier, HBO has an incredible Documentary that proves all of it. If you watch it, you will see how foolish the Cybersecurity Agency claim truly is.
- This documentary exposes Dominion Systems and ES&S in a big way. Most of the contested states are served by these two companies. We believe that this vulnerability explains the very unusual things we say in the wee hours of the morning after election night. And, if you add in the very suspect activity of election officials, it becomes easy to understand that this is a clear case of attempted election theft.

Exhibit – HBO Documentary Focuses on Voter Machine Vulnerability

A look at the trailer for the *Kill Chain* documentary. It is one of the definitive pieces on voter machine vulnerability ever produced and features expert Harri Hursti.

- <https://www.amazon.com/Kill-Chain-Cyber-Americas-Elections/dp/B0866GTGDJ>
- This documentary explains how fragile our system really is and warns we could lose it all if we don't protect the integrity of elections.
- This is very prophetic and also foreboding.

It proves that the machines we used in the 2020 election are vulnerable and demonstrate that the strange things we saw are evidence of manipulation.

GET THE DOCUMENTARY KILL CHAIN AND WATCH IT ALL BUT BE SURE TO WATCH THESE TIME CODES:

- I. **Start with Jake Stauffer, a cyber analyst from the Air Force, who clearly found how vulnerable all the systems really are despite all the assurances from the voting machine companies. He found both Dominion and ES&S completely at risk.**

(This starts at 34:35 and runs to 37:52).

Kill Chain also exposes the myth that voting machines do not connect to the Internet. That's the answer all the officials and James Comey claim.

To see that the machines are connected... (start at 41:18 and run to 44:15)

- II. **Kill Chain** even breaks open a common voting machine, the type you are used to using, to prove just how easy they are to hack.

You can watch them do the hack (starting at 45:34 and running to 49:05).

- III. It's also important to note that any decent hacker knows exactly how to compromise voting machines. They even show footage from a Hacker Conference.

Hacker Conference (start at 52:50 and run to 56:50)

- IV. **Kill Chain** and Harri Hursti "nailed it." And not just a little bit. **They also knew to focus on Georgia where both the count and the recount are incredibly suspect. We were warned about Georgia and we saw exactly what they predicted play out just as they told us it would.**

(Start at 1:09:59 and run to 1:11:30)

ALERT: You can't say Georgia wasn't warned!

The **BOTTOM LINE** is that this is all very credible. Denying that election fraud happened, as the media and Biden camp are doing, is ridiculous. And the bi-partisan experts told us in advance that Georgia could be hacked and that a recount wouldn't show it.

"Keep all of this in mind the next time that you hear that there is no evidence of fraud or that the 2020 election was the most secure in history. These are outright lies." -Kevin Freeman

Why You Should Care:

- America's democracy is at risk and now is the time to stand for our republic and for your voice to be heard.
- Consider this as 1775 for America all over again. Instead of fighting the British, America is up against globalists, Marxists, crony capitalism, and electronic voting machines. Election Integrity must be in place now or you may never get another fair vote again. Your vote should be counted. **EVERY LEGAL VOTE** should be counted!
- Election fraud could literally be wiping your vote away.
- Americans want free and fair elections!

Action Steps:

- Hold the line, demonstrate social patience, and do not fall to the media narratives of the election being over until we are assured every legal vote is counted. America needs to know there is integrity in our voting systems and machines.
- You heard it from us in the Economic War Room before. If you have not seen them, you can see these episodes at www.EconomicWarRoom.com/myvote.
- And don't forget that we have built a website www.eveylegalvote.com that can keep you updated on election fraud, new information, how the election is being impacted, and how you can take action. Be sure to click the **Take Action** where we make it easy to make your voice know in less than 60 seconds!

- ✓ Talk with your financial advisor as it relates to your savings/investments. Ensure your advisor understand the potential impact economic/geo-political scenarios could have on your portfolio. LOOK FOR ECONOMIC WAR ROOM'S ADVISOR AND INVESTOR ONLINE TRAINING COURSES COMING SOON.

Shareable Quote:

“What we are seeing play out is perhaps the most intense Economic Warfare you will see. That’s because the battle for control of America is largely about the money. If we lose integrity in our elections, we will lose America.”
