

## What the 'E' in ESG Really Means – Green Fraud

ESG is the hottest trend in investing, but who is really driving this trend? This briefing is part 1 of an exclusive 3-part series on ESG investments. In these briefings you will learn what E-S-and G investing really stands for and the agenda behind it.

This week we will focus on the 'E' of ESG investments and what Environment really means. We all want clean air, water, and energy, but you might be surprised to learn that in many areas, ESG investments may actually be hurting the environment.

“The 'E' in ESG stands for Environment, but really means eliminate fossil fuels per the New Green Deal.” –Kevin Freeman

To give us a deeper dive on what E (Environmental) in ESG really means, we brought Marc Morano, publisher of **Climate Depot**, into the Economic War Room. **Marc exposes** the real agenda and fraud of the Green New Deal on his website, newsletters and books. He is also the author of a new book, **Green Fraud, Why the Green New Deal is Even Worse Than You Think.**

**Warning:** The elites are using ESG to drive their anti-American pro-socialist agenda and your money, livelihood and way of life are being attacked. It's time to fight back with LSV investing.

**Your Mission:** Your mission this week has three objectives.

1. To be prepared for potential energy shortages within your household.
2. To stand against the Green New Deal hidden within ESG investments.
3. Invest in Liberty Security and Values (LSV) and ensure your financial advisor understands the ESG threat.

“It's time follow the Real Science, not the (politicized) scientific institutions.” –Marc Morano

Ep. 5-165 (OSINT) Open-Sourced Intelligence Report. This briefing includes conversations with Kevin Freeman and Marc Morano. MARC MORANO is a former senior staff member of the Senate Environment and Public Works Committee, publisher of CFACT's award-winning [ClimateDepot.com](http://ClimateDepot.com) (a news and information service he founded in 2009), author of *The Politically Incorrect Guide to Climate Change*, and producer of *Climate Hustle (2016)* and *Climate Hustle 2: Rise of the Climate Monarchy (2020)*. Morano is the author of the 2021 book, [Green Fraud: Why the Green New Deal Is Even Worse than You Think](#)

The late Rush Limbaugh shared that “Morano’s probably single-handedly, in a civilian sense, the guy (other than me, of course) doing a better job of ringing the bells alarming people of what’s going on here.” Sean Hannity, shares that Marc Morano’s latest book is “A must-read book that shows how the Green New Deal is dangerous, impractical, misguided, and guaranteed to fail with disastrous results for the American people.”

### 1. ESG and Climate Change – The Next Government Mandate Crisis.

Environmentalists are on a potential path to destroy lives vs. saving lives.

“ESG is the buzzword on Wall Street, it’s the hottest trend in investing. And at its core is the belief that elites, scientists, politicians, academics all know what’s best for us, what life should be like. They want our investments. They want the money that we have in the unwashed masses for their use to finance their Utopian visions. And that’s what ESG really is all about.” –Kevin Freeman

#### Warnings from Climate Alarmists.

They tell us all the time we’re under serious threat. Before COVID, the big bads were climate change, racism, and sexism. So the elites created an investment strategy called ESG. The E stands for environment, the S’s social, and the G is governance.

The actual definition of **ESG**:

**E** really stands for Eliminate fossil fuels per the Green New Deal.

**S** is for Social Justice/Critical Race Theory.

**G** is a gender agenda with quotas. In this case company boards are required to have so many from various backgrounds, whether it’s LGBTQ, minorities, women, or whatever they require that boards be composed of. They want members allocated on a quota basis.

“We recognize while some ESG investors are very sincere, there are many others who are blatant hypocrites. They’re pushing ESG, claiming it makes for a better world. And yet at the same time, they’re selling out to China.” –Kevin Freeman

**The Reality of Those Pushing ESG is This:**

Those pushing ESG are also shoving money into Communist China, which is terrible for ESG, and in regard to **Environment**, the Chinese communists are the worst polluters on the planet.

As for **Social**, they repress their population with Social Credit Scores and even Forced Human Organ Harvesting.

As for **Governance**, every company in China or doing business in China is told that their job is to serve the Chinese Communist Party, not the shareholders. Those pushing ESG are also shoving money into communist China, which is terrible for ESG, and the Chinese communists are the worst polluters on the planet.

Is there anything on the above that makes you want to invest and support the ESG and Chinese Communist as defined above?

**ALERT: Instead of ESG, we much prefer LSV. LSV investments stand for Liberty, Security, and Values. Your investments should be aligned with your values.**

**Here’s the question: What’s in your portfolio?**

**Do you use Fossil Fuels? Now they are saying You are Killing the Planet?**

We hear a lot about climate change. It’s been called the greatest national security threat on the planet. You know, “It’s global warming.”

The idea is that “We humans with our fancy lifestyles and our gasoline-powered automobiles are killing the planet. We burn fossil fuels and that’s making it warmer and warmer. We’re so bad that we’re almost at a point of no return. If we don’t change right now, we’re all doomed.” That’s the message we’re being told.

**Thank you AOC!** - The very smart and the very helpful elites like Alexandria Ocasio-Cortez have decided we need a Green New Deal.

“They know what’s best and will force government mandates and take over your retirement plan to save us all.

Yes, you’ll pay more in taxes.  
Yes, you’ll have fewer choices.

But if we trust them, we might just survive. And for that, we should be forever thankful.

Why do we need to do this? Because the science is settled, just as it is settled with the coronavirus and gender issues? **Oh, we have to trust the science they tell us.**

-Kevin Freeman

**The problem with the Elites Green New Deal and their science is threefold:**

- 1. The people pushing the Green New Deal all seem to benefit financially.**
- 2. There are many reputable scientists who make a pretty strong case against climate panic.**
3. Even if the Green New Deal proponents were honorable and the science were settled, neither of which are true, **the solutions don’t make any sense.**

**WARNING: In some cases, if we adopt their GREEN NEW DEAL solutions, they will be destined to destroy our lives rather than to save them.**

**Case Study: Censorship and what happens if you disagree with their paid and funded scientist.**

**We spoke with Marc Morano, to find out how he earned his reputation.**

Those that are big on climate change describe Marc as “the number one climate denier on the planet.”

**Marc was labeled** based on a study in the journal *Nature*.

- › It was peer reviewed, and accordingly you don't challenge peer reviews.
- › In it they said Marc was the number one most cited climate skeptic in the world and in the media!

**How the “climate denier” intimidation process works:**

It's a form of intimidation, what the climate change activist are trying to do is to build lists that they come out with to use against those with different opinions and the scientific data they do not want to address.

- › Once they know who they want to discredit, they go to big-tech and the social media giants and suggest censorship.
- › The idea is this is “Hey, Google, hey, YouTube. Hey, Facebook, these are the people you should be censoring.”
- › The Biden administration has now stated this openly. Now, we have censorship hitting opposing thoughts and science hard on Facebook.
- › YouTube just announced they're going to be demonetizing and restricting climate deniers.

**2. ESG, Climate Change, and Green Fraud.**

Approximately 50 Scientists Bullied and Purged for Their Analysis.

**A look at what really happens if we follow the science and what we learn from science about climate change.**

“You can follow the science, just not the scientific institutions.” -Marc Morano

**Now even the lead scientists from NASA have been corrupted and politicized.**

- › Global warming scientists have been arrested a half a dozen times.
- › Two lead scientists have come out and said, “White supremacy is causing climate change.”
- › So these institutions have all been corrupted (including NASA).

**Key Insight:** Follow the Money and be alert at how these science organizations are funded.

When you look at the funding, the intimidation, the bullying at the EPA right now, it becomes clear it is less about science and more about the funding and the political agenda.

- › **Nearly 50 scientists, were just purged because they don't agree with Joe Biden's climate Green New Deal agenda.**
- › What this means - **Next year or six months from now, we're going to hear about all the scientists at the EPA. It will be 100% consensus.**
- › When you purge people who don't agree, then you have 100% consensus and that's what they're doing.

“So in essence, you should trust science. But I would not trust the organizations that are telling you what science is. Don't trust the media or the United Nations World Health Organization, which has declared climate the number one public health threat.” -Marc Morano

**You need to trust the data and you need to trust the Earth's geologic history, and you need to trust your own eyes.** If you look at all the data, even in United Nations reports, the underlying data is shocking.

In their own reports they go through and they tell you there's low confidence in the analysis and includes these statements:

- » There was No increase in floods.
- » No Increase in hurricanes.
- » No increase in storms, tornadoes, and wildfires.

They admit all this in the fine print. **The idea that man-made climate change is causing extreme weather is not supported in the underlying U.N. report.**

"They have a summary for policymakers, they come up with all these scary statements, predictions they have, and each line is agreed to. But if you look at the Earth's history, we're in the coldest 10% geologically speaking. We probably have cooled since the Roman warming period of about zero A.D. we've cooled or about the same as the medieval warming period from about 1000 A.D." –Marc Morano

And yes, we have warmed at the end of the Little Ice Age in 1850.\*

\*The Little Ice Age: A period of regional cooling, particularly pronounced in the North Atlantic Region, that occurred after the Medieval Warm Period. (Wikipedia)

**We have been warm since the 1970s, when they were worried about global cooling.**

Marc dedicates a whole chapter in his book detailing that **the solutions to man-made global cooling (in the 1970s) were the same today for global warming.**

- » They pushed treaties denying sovereignty.
- » They attacked capitalism using regulations.
- » They said it was a national security threat.

If we got colder, they said bad weather was caused by global cooling. It is just the same message points regardless of the data.

### 3. Climate Change Mandates are Designed to End the Social Order as We Know It.

Why Climate Alarmist are Wrong and the push toward Marxism.

#### Remember, Global Cooling Used to be the big Threat.

There was a genuine fear of global cooling. The planet was going to have too much population and the cooling was going to keep us from getting food and all the other things we need to live.

#### It started with the outrageous claims and the history of global cooling.

They're wrong because it's not carbon dioxide that is the control knob of the climate. Even the World Meteorological Society, all of these groups in the 1970s and 80s admitted this.

- » It wasn't until 1988 that the United Nations climate panel was formed.
- » It became a self-interested lobbying organization. In other words, if it failed to find a catastrophe, it failed to have a reason to exist.
- » Essentially, it's not one factor like CO<sub>2</sub>, it's hundreds of factors that interplay.
- » Even climate activists and part of the UN admitted this 15 years ago.
  - You could find this climate temperature is an emergent of hundreds of factors that include the tilt of the Earth's axis, water vapor, methane, the sun, clouds, ocean cycles. It's not one factor.
- » When you look at that as well as the geologic history of the Earth, know that we've had ice ages with many times higher CO<sub>2</sub>.

#### CO<sub>2</sub> is not really the threat it is made out to be.

**There's nothing in today's weather, the current temperature or climate-related where you can look at CO<sub>2</sub> and say, well, if CO<sub>2</sub> is causing a warming of the climate. You can't distinguish CO<sub>2</sub>'s effect from natural variability.**

"That's where I came in when I worked at the U.S. Senate Environment and Public Works. I'm not a scientist, but I worked with scientists. I was the voice of the scientist. As the communication director, I ended up with over a thousand scientists dissenting, including many with the United Nations who said, 'This is nonsense. I can no longer go along with it.'" –Marc Morano

- » Many of them openly said you could have a doubling or tripling of the level of CO<sub>2</sub> we have today, and the temperature of the Earth wouldn't notice it.
- » This idea is just a scare.
- » Going back to the 1960s, they've had overpopulation, resource scarcity, deforestation, climate change.

**Again, no matter what the perceived threat is, they're all the same solution.**

- » Bigger government.
- » More regulations.
- » It is all pushing to a socialist type of Utopian vision.

Climate is the latest environmental scare.

**NOTE:** If you look at the actual climate data, hurricanes, floods, tornadoes, none of those are increasing on time scales. Our temperature hottest year claims are a fraud. They're within hundreds or tenths of a degree, which is within the margin of error of the temperature record.

"So when they claim this, they're just making stuff up. Actually, in my book, I have them admitting this kind of stuff. They admit that these are meaningless stats, but they say it because the media likes it, and the activists like to state, 'the hottest year on record.' It's nonsense, and they admit it." –Marc Morano

**ALERT:** This is intended political speech with the intention of creating a certain push towards scientific lobbying, changing science to get your goal. That's all they're doing. **They're using science to lobby for Marxism.**

#### **4. How COVID Became the Big Game Changer Elites Were Seeking!**

In March 2020. Everything changed. Climate activists were openly jealous when COVID came along because all the solutions for COVID are what the climate activists have wanted for decades.

- » A Chinese style, economic repression.
- » A social credit system.
- » The lockdowns and lower economic growth.

In many ways COVID gave the climate change activists exactly what they wanted. This was an incredible thing and that's where we are today with mandates.

In a COVID world, climate activists are getting the agenda they always dreamed about.

## 5. The Unintended Environmental Consequences of Electric Cars

Grid shutdowns, China Rare Earth Minerals, and loss of American sovereignty.

**It looks like electric cars are here to stay and will likely be mandated. What that could really mean.**

**Next, the goal is to eliminate private ownership of cars.**

"Here's the insidious thing they're not just trying to stop the internal combustion engine vehicle and go to electric. There are proposals from international energy agencies, UK-funded reports, United States Climate agencies, all to eliminate private car ownership and give the public a roving fleet of electric rental cars. So it just goes beyond that. Just remember that's their stated policy goal. But you look a little deeper at some of the reports what's happening in academia? It's truly scary stuff where they want to go with cars." –Marc Morano

**While the electric car is amazing in the technology, our electric grid is about to be overwhelmed.**

They're doing this under the auspices of a climate emergency, and all they're going to end up doing is overwhelming our electric grid, recharging all these cars we already have.

- » Already this year, California is telling people not to recharge their electric cars all at once because it's going to shut down the grid.

- » We have reports coming out of Australia of the same thing that it's already causing grid failures from the mandates and the increased use of these electric cars.

**The real problem- America is giving their economic power away to our adversaries. We are conceding our oil and gas production for reliance on China.**

**The Power of America's Energy Independence is being GIVEN AWAY:**

- » With electric cars when you look at how they are made and the material needed, we are trading economic worlds.
  - Where the United States is or was the world's largest oil and gas producer as of 2019 pre-pandemic, and the world's largest consumer.
  - We have more energy production than consumption, and we had more energy exports than imports for first time since Harry Truman was president. That's what you do when you have a full energy policy!
  - But what we're doing with electric car mandates is we're trading all of that in for reliance on Chinese rare earth mining, which supplies 90 percent of the rare earth mining using Uyghur slaves in China and child labor to get Cobalt from Africa.

**"We are turning our energy independence, which we achieved for the first time since Harry Truman was president, into dependence on China." -Marc Morano**

**CAUTION: The US grid, which is coal-powered and nuclear powered and so forth, can't handle surge of energy need for electric vehicles.** What happens if we switch to wind and solar? We saw this in Texas. In "Snowmageddon," Texas failed the citizens and almost destroyed the grid. The grid cannot stay up unless it has constant power capabilities. You put too much wind and solar and those go down, you're in serious trouble.

## Case Study - Rare Earth Minerals NOT Allowed to be Mined in the US

The Biden administration isn't allowing us to mine the minerals we need in the US. Marc Morano went to China which did rare earth mining for the metal used in catalytic converters. At the same time, an American mine was shut down. 27 federal agencies shut it down over endangered species concerns.

His group then interviewed the Chinese company doing rare earth mining in China. Their spokesman laughed and said, "We don't have the same kind of environmental restrictions here."

That's the problem with electric cars. We're giving up American sovereignty and we're going to be relying on hostile regimes, to put it politely about China.

With electric cars, rare earth minerals are a key driver.

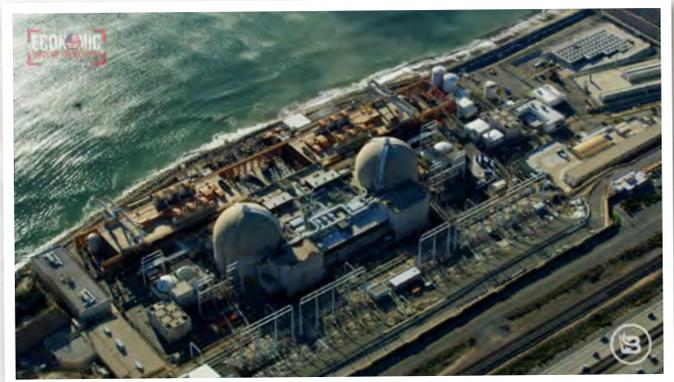

**What's in your portfolio question?** Think about the above example as it relates to ESG investments. What about the E, in ESG makes your money being invested in China better than the US? China does not have the same kind of environmental restrictions, there are human rights atrocities, and their stated goal of communism. Yet many investment groups and funds are funneling your money to China instead of investing in America.

## 6. Electric Cars - Higher Energy Prices and Future Shortages

**The power plant infrastructure we currently have will not be able to create the electric demand being created from mandated electric cars.**

"They haven't built power plants in years, and they have to go through all this environmental process. This is what I'm concerned about:

We're creating a solution to a problem that doesn't exist, that will create a very real problem that will exist.

And when it does, the only way to solve it will be more big government. In essence, this is crisis after crisis after crisis to suck out our liberty and put the elites in control. Now we see a grid collapse in California. We saw problems in Texas if the grid goes down. I've had experts in here on the electric grid, they said. If the grid goes down and you can't get it up for a year, 90 percent of the population could die, and we would be back living in the 1800s." -Kevin Freeman

**If you force electric car mandates without expanding the nongreen solar/wind part of your grid, what's going to happen is an energy disaster.**

### **A look at energy issues in California and in Texas.**

California has the highest electricity prices in the country and they're facing shortages.

- » Blackouts are coming there. They are literally in the process of shutting down all their fossil fuels.
- » They're doing all the virtue-signaling on all the so-called renewable energies, aka unreliable energy, solar or wind.
- » They are just doubling down on their bet.

The grid issues in Texas. The Texas grid outage with the big cold snap was a multi-factor issue.

- » First of all, you had an energy grid that was mismanaged, but the biggest part of it was they were unprepared for the cold.
- » Ironically with all their press releases bragging about the wind power in Texas. They didn't actually get anything weatherized.
  - With the grid down people said, "Oh, wow, well, it affected, you know, the fossil fuels as well." But that was not the real issue.
- » If you look at a breakdown of what happened in Texas, wind/solar did the absolute worst. All the other energy fossil fuels did far superior.

In other words, if you had more wind (as a percentage of the grid), you would have had a bigger disaster in Texas.

**The future of Energy - Look at California, Texas and Europe, and be prepared.**

"These are glimpses of our future and our future is very simple. Our future might be coming in the winter of 2021 and 2022. We are watching Europe, we're watching China. All these other countries face this energy crisis of high prices and coming shortages. And it might be coming to the United States very soon, and we're about to find out what it's like to live through the 1970s or worse again now." -Marc Morano

**We are creating our own problems. A human-caused energy problem.**

"It's not carbon dioxide. It's the fact that we're putting these mandates and not allowing the free market to work or we are canceling pipelines. This is preventing us from developing our own energy. Look at the Biden energy policy, look at the high gas prices, and everything else. There is no doubt that's a problem." -Kevin Freeman

**7. Energy Solutions - There is a bright clean energy future...if executed correctly.**

An electric fleet likely works and that is where the market is headed, but we need to develop new power plants and alternative solutions.

If we will allow technology to work and the free markets to work, we can come up with answers.

**A. Space - A potential solar solution**

In previous briefings, General Stephen Kwast, who was an advocate for the Space Force, has talked about how, if you have space, you can actually put solar panels there and beam power to Earth using the Nikola Tesla technology. He says it's all there. It's all real.

**At Issue:** The problem is that the progressive far left doesn't want us to militarize space. And so, what if we set those things up and the Chinese just shoot them out of space?

**B. Other new energy solutions will be developed but we cannot make the mistake of getting out of fossil fuels before these are ready.**

We have four percent of U.S. energy production that is roughly is solar and wind combined. Around 80 plus percent, is fossil fuels.

If you go back decades, it was the same mix globally. Nothing has changed as it relates to the energy mix.

**At Issue:** Climate policy makers want to ban energy that's proven itself to work and mandate energy that's just not ready.

"I'm not saying, 'Oh, solar is never going to work.' No, but I'm saying we can't mandate something until it's ready. And then you mentioned, of course, that there are other tech things that can happen. They may not want them for political reasons, you know, such as the militarization of space." -Marc Morano

Note: We should not be against solar/wind, especially solar. The technological potential is spectacular and huge. The issue is not to mandate things until they are ready.

**C. The Biden Energy Policy – A Self-Created Crisis that is actually hurting the climate and individuals.**

**Biden came in day one, shut down pipelines, shut down mining, and went after fracking. It is death by a thousand cuts that started an energy crisis.**

**The results:**

- » Gas prices went through the roof and now all energy prices are climbing.
- » Six months later the Biden administration is begging OPEC to increase oil production.

- » Russian oil imports are at an 11 year high.
- » We now have a huge increase in Chinese rare earth mining.

Climate activists say that climate change is a national security threat.

**At Issue:** The climate policy being implemented is not even benefiting the planet. It is causing more harm as we shift energy to dirty fuels around the world.

"If you believe excess CO<sub>2</sub> contributions, we're seeing them ramp up in China and India, and instead of getting good clean fossil fuels here in the United States, we're getting dirty fuels from around the world. So it really is. It's hypocritical and it really is self-serving. It's evil. I don't know a better word for it." -Kevin Freeman

## 8. America's own Energy Policy is now a US National Security Threat!

Making it even worse, The Biden policies are creating more global emissions.

Marc Morano Explains:

"I have the research and included it in my book *Green Fraud*. The more the West, Europe and America, the industrialized West, put climate policy, carbon taxes, anything on our industry. All that does is increase global emissions.

All it does is offshore energy from countries like Venezuela, Middle East, China, India, Asian, where the environmental standards aren't as high. Mining more in Africa and China.

We want domestic energy. We have the highest environmental standards. We have the cleanest air in the world. We are the United States. We didn't wait. We left the U.N. Paris Agreement for a few years. **We had the biggest reductions in carbon dioxide reduction than any of the signatories of the U.N. Paris Agreement. We led the world in it. [But we did it with natural gas that Biden wants to shut down.]**

If we actually face the climate crisis/climate emergency we would:

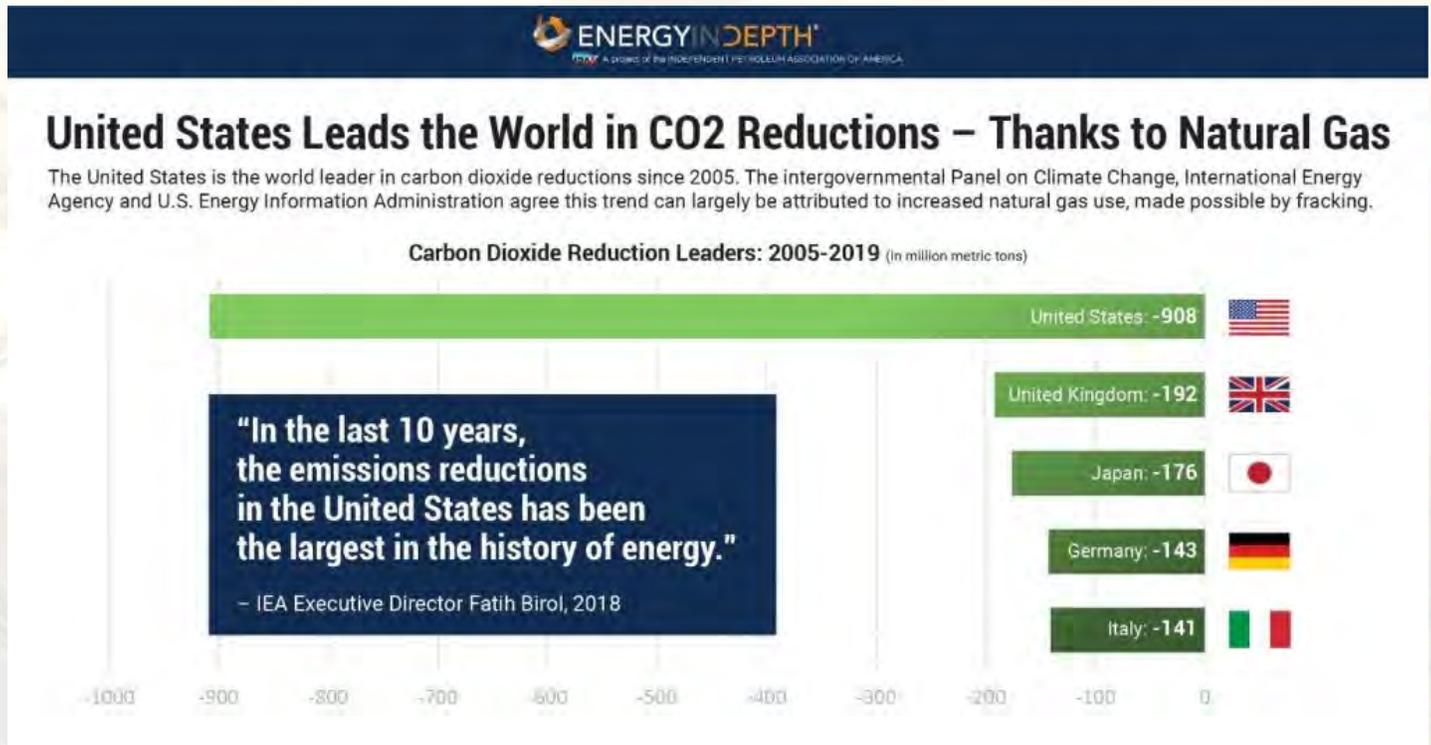

- » Do the opposite of what the Green New Deal proposes.
- » Do the opposite of what the U.N. proposes.

You would want to embrace wealth, prosperity, innovation, technology. That's the way forward and you can get yourself out of just about anything. The last thing you want to do is create shortages, chaos, blackouts, and economic depression. That's where you get real human suffering and real human catastrophe." –Marc Morano

Biden Nominee Hopes Oil and Natural Gas Industry Goes "Bankrupt" -

Look at the chart below and compare the US in CO<sub>2</sub> reductions to the US.

<https://www.energyindepth.org/biden-nominee-hopes-oil-and-natural-gas-industry-goes-bankrupt/?154>

## Why You Should Care:

- › We all want clean air, water, energy, and a healthy environment.
- › Climate Change mandates are designed to end society as we know it.
- › There is an agenda around the Green New Deal and it is more about an ideology, Marxism and control, than it is around climate.
- › There is rush to eliminate all fossil fuels before we have proven new technologies that improve lives.
- › Our current infrastructure cannot support the electric car mandates coming and the potential secondary effects.
- › Higher energy prices and brownouts could be coming soon.
- › Some Climate activist are almost jealous of COVID, what does that mean?
- › Scientists that do not agree with the current green agenda are being purged. It is not about the science; it is politicized institutions.
- › Corporations that are not ESG compliant or in lockstep with the ESG agenda are being penalized. We've got to apply pressure the other direction. One of the ways to do that is through the NSIC where we will be training 10,000 financial advisors and weaponizing \$1 trillion in capital around Liberty, Security, and Values (LSV) instead of Environmental, Social, Governance (ESG).

---

## Action Steps:

1. Check out <https://www.climatedepot.com> to learn more about fraud in the Green New Deal.
2. Read and share Marc Morano's new book Green Fraud, Why the Green New Deal is Even Worse Than You Think. [https://www.amazon.com/Green-Fraud-Deal-Worse-Think/dp/1684510856/ref=sr\\_1\\_1?dchild=1&keywords=green+fraud+morano&qid=1608301142&s=books&sr=1-1](https://www.amazon.com/Green-Fraud-Deal-Worse-Think/dp/1684510856/ref=sr_1_1?dchild=1&keywords=green+fraud+morano&qid=1608301142&s=books&sr=1-1)
3. Contact your congressional representatives and let them know you oppose the Build Back Better/Green New Deal socialist agenda.
4. Embrace wealth, prosperity, innovation, technology, and free markets. Real solutions to a clean world and improved lives exist. The NSIC will be working with financial advisors across the country to lead in this area.

5. This is part one of a three-part series on (E) Environmental – Eliminate Fossil Fuels. Be sure to watch for our next shows on (S) Social Justice/Critical Race Theory, and (G) Governance (Gender/Race quotas).
6. If you have a financial advisor, make sure they have your values and interest at heart. Make sure they really understand what ESG investments mean for our future. Suggest that they become part of the NSIC institute and nominate them to participate in our online certification.
7. Check out <https://stopcorporatetyranny.org/> to learn more about the weaponization of corporations against your values.

**ATTENTION: Remember if you have not contacted your financial advisor, it is time to make it happen now.**

8. Weaponize your money toward principles that support Liberty, Security, and Values (LSV). You control your giving, spending, and investing. Nominate your financial advisor to attend our Founders' class coming soon.
  - **Investing.** We suggest you get a like-minded financial advisor. We've done surveys and a clear majority of investors want an advisor who matches with their political and cultural beliefs. Unfortunately, Wall Street is pushing for you to just take what they offer in order to force a leftist agenda on you.
    - o "If your advisor isn't willing to match your investments with your values, send them to us for training and education. If they won't do that, I can promise you that there are lots of other advisors looking for new clients."  
-Kevin Freeman

**9. It is time to fight the economic war we are facing. Nominate your financial at [EconomicWarRoom.com/advisor](https://EconomicWarRoom.com/advisor) and let them know that you think this would be a great opportunity for them. Classes are launching and our list is growing fast.**

**10. Also, if you have not already done so, please consider the following:**

Be sure to sign up for our free weekly Economic Battle Plans™ at [www.EconomicWarRoom.com](https://www.EconomicWarRoom.com)

- If you are following Economic War Room you will be on the leading edge as it relates to global threats, geopolitical analysis, and how you can weaponize your money to strengthen America. Your money, livelihood, and way of life are at risk and these tools are designed to mobilize America to protect their economic liberty.

# ECONOMIC BATTLE PLAN™

GREEN FRAUD **5.165**  
CLEARED FOR RELEASE 11/18/2021  
{ECONOMIC BATTLE PLAN™ POINTS: 89}

In the **Economic War Room®**, we encourage Americans to be the “small ships that make the difference.” You cannot solely rely on the government or the president to solve America’s problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty. [The small ships are based on Churchill’s Operation Dynamo that rescued the British Expeditionary Forces in the Miracle of Dunkirk.

**We need more Economic Patriots on the team!** Consider what you can do now to help strengthen America or even help someone in need. Keep in touch with your congressional representatives. Choose from the list or set your own goals:

- ✓ At our [Economic War Room®](#) website, sign up to [BlazeTV](#) or [LiftableTV](#) for our complete weekly shows. Please use our code (**ECON**) from that link for a discount and FREE trial.
- ✓ Follow, like, comment, and share on [FB](#) and [Twitter](#). Look for short video segments on [FB](#) and [Rumble](#) and make sure. We recognize these tools may be compromised at times, but if they are not filtered, they are the major platforms available to reach out to the public. [Know that alternatives to the social platforms listed above are under EWR consideration.]
- ✓ Check out XOTV (<https://xotv.me/channels/233-economic-war-room>), a new free speech video platform that Economic War Room is proud to partner with. Access is FREE but consider making a donation to EWR on that website to help with Economic War Room’s research and production costs.
- ✓ You are welcome to share this Economic Battle Plan™ and our short video segments with friends on [FB](#) or [YouTube](#). We set up the Economic War Room® to be your resource for information, preparation, and mobilization.
- ✓ Do this now! Have a financial action plan based on multiple geopolitical scenarios developed now. Advanced preparation is key. Trying to figure what to do when an economic event happens is usually too late.

## Shareable Quote:

**“E - really stands for Eliminate fossil fuels per the Green New Deal.”**

**-Kevin D. Freeman, CFA**
