

## Five Ways to Prevent Air Pollution

Sometimes it might feel like some topics are too big. God calls us to do good acts regardless of the size. When it comes to air pollution, small acts add up and if you do it together then the benefits add up quickly.

- 1 Don't idle your car at church or school.
- 2 Plant a tree at home, church or a park.
- 3 Use less energy at home and church.  
Change those light bulbs.
- 4 Make sure your tires are fully inflated.
- 5 Contact your elected officials and tell them you support clean energy.
