

A DIFFERENT PERSPECTIVE

Awakening the American Quest for Freedom

Understanding the Fight Against Totalitarianism

By Dee Valdez Pepper

Stand Together! Get Involved! Banish Fear! These battle cries filled the rooms countless times during the Reawaken America Tour. The power and camaraderie of 2,500 Patriots gathered for a call to arms was electric! Friday and Saturday, September 24th and 25th in Colorado Springs, conservative Americans came from all over the southwestern and west coast states to be moved by the likes of General Flynn, an American hero; Doctors Simone Gold and Stella Immanuel, America's Front Line Doctors and former Presidential Candidate, Alan Keyes. The event was filled with courageous speakers who were inspiring and committed to telling the truth about what is going on in our country.

Joe Oltmann, former tech CEO, reminded us that we must fight for election integrity. Oltmann shared the results from the Arizona election audit. He is the forensic computer genius who audited the election returns on the rigged Dominion voting machines and

broke the code. Oltmann called on men to be more involved in the movement. He reminded us that "the only thing that matters is what YOU do. Not big tech. Not mainstream media." Joe reminded us, "What's right is rarely popular and what's popular is rarely right."

Leigh Dundas, the Human Rights Attorney who stopped digital passports in Orange County, CA is a fierce warrior. She reminded us, "You can't defeat what you don't recognize." Dundas implored that we must understand and share the five steps of the Totalitarian Takeover with others.

Totalitarian Takeover Playbook
Whip society into frenzy over nothing

Blame a group for being responsible

Use media to disenfranchise and brainwash

Mark you for easy identification

Commit atrocities that are unthinkable

Attorney, Thomas Renz, exposed the corruption of Dr. Fauci and the FDA through data collected from US Medicare recipients. Renz also has collected information from COVID Pfizer Whistleblowers. His data filled PowerPoint is designed to share with everyone we know. Renz said, "When the FDA told us that no one died, they lied. And they knew they were lying." He shared that he has "the screenshots, the algorithm use to analyze the data and everything else." Renz shared the statistics of success and failure of treatments with Remdesivir and Ivermectin. In addition, he showed that "according to the NIH, Ivermectin is an investigatory drug for COVID." Renz reminded us that the courts are

slow but the court of public opinion is faster.

America's Front Line Doctor, Dr. Stella Immanuel, and several other physicians shared preventative protocols and treatments for COVID and the Delta Variant. All said we must suppress fear as it weakens our immune system. Extensive details are on Rumble on the Thrivetime Show and www.TimeToFreeAmerica.com.

Solidarity was demonstrated during the most emotional aspect of the weekend when an offering was taken for the legal fees for Artur Palowski, Canadian Pastor. Palowski refused to close his church during the last year

and a half and faces the possibility of 6 years in prison for doing so. Despite being offered asylum in the US, Palowski, was returning to Canada so he could suffer with his countrymen. Palowski, originally from Communist Poland, knew he would be arrested at the airport when he returned. The offering turned into a tear filled event filled with cash donations and prayer. I'll never forget the feeling of togetherness and compassion for a modern day Dietrich Bonhoeffer. Palowski said God told him to "tell the Great American Eagle that it's time to rise up and start flapping it's wings."

The event made it clear we have a

fight in our country against government tyranny. We need to wake up as citizens to the reality of a growing government that is working to rule over us and not represent us. We need to stand up and take action to take our country back and preserve the freedom represented by the Great American Eagle.
