## **Councilmember Englander Introduces Motion for RecycLA Exit Plan**

Councilmember Mitchell Englander introduced legislation today to establish a process for the City to exit the troubled Exclusive Waste Franchise otherwise known as RecycLA. The motion was seconded by Councilmember Paul Krekorian.

"RecycLA is failing to deliver the basic city service of reliable trash pickup," said Councilmember Mitchell Englander. "The waste haulers have had more than enough opportunity to work out the difficulties of the transition yet our constituents remain overcharged and underserved. There comes a time when we must recognize that the fault lies not with the service providers but with the program itself. Rather than persist in error, it's time for the City to clean up this mess."

"From the mountain of complaints and trash piling up across the city, it has become all too clear that the waste haulers are not holding up their end of the bargain with the city," said Councilmember Paul Krekorian, chair of the Budget and Finance Committee. "We expect a higher level of performance from them across the board. This motion today puts the haulers on notice that we're ready to do whatever it takes to hold them accountable and ensure a higher level of service for customers."

RecycLA was purportedly established in order to move towards the City's Zero Waste Goals, improve air quality, and reduce traffic congestion. However, the program's implementation has brought disastrous challenges and shortcomings.

In the six months since the initial rollout, City Council offices have been inundated with phone calls and complaints from property managers, business owners, and residents all with concerns regarding the failures of the RecycLA program. Common complaints include confusion and frustration regarding new fees, overcharging and inaccurate billing, frequent and repeated missed pickups, and poor customer service from waste haulers. Missed collections have led to substantial health risks and citations from the LA County Department of Health. Moreover, many residents have complained of their rates skyrocketing up to 400% more than previous rates. There are currently 28,000 service complaints. For perspective, there are 80,000 accounts citywide.

The motion filed today instructs the City Attorney to report back to Council regarding the actions necessary to exit the Exclusive Waste Franchise.

## MOTION

RecycLA was purportedly established in order to move towards the City's Zero Waste Goals, improve air quality and reduce traffic congestion. However, the program's implementation has brought disastrous challenges and shortcomings.

Over the past six months since the initial rollout, City Council offices have been inundated with phone calls and complaints from property managers, business owners and residents all with concerns regarding the failures of the RecycLA program. Common complaints include confusion and frustration regarding new fees, over-charging and inaccurate billing, frequent and repeated missed waste collections, and poor customer services from waste haulers. Missed waste collections have led to substantial health risks and citations from the LA County Department of Health. Moreover, many residents have complained of their rates skyrocketing up to 400% more than previous rates. There are currently more than 28,000 service complaints. For perspective, there are 80,000 accounts, citywide.

Los Angeles businesses and residents deserve a more dependable and cost effective waste collection service.

I THEREFORE MOVE that the City Council request the City Attorney to report back regarding the actions necessary to exit the Exclusive Waste Franchise.
