

# HOW TO PLANT A NATIVE TREE

Clear an area for planting no smaller than 1 metre wide and remove weeds

2

Loosen the soil...dig, dig...is the soil damp?

3

Dig a hole for the plant (same size and depth as the pot it's in)

5

Measure the hole by putting the pot in, does it fit nicely?

Take the plant out of the pot gently, support it as you gently tap it out.

# HOW TO PLANT A NATIVE TREE

1

Gently press down around the plant

6

Put the plant into the hole and fill in

9

Mulch to 10cm thick, leaving 2cm clear around the stem

8

Create a wide bowl greater than 1metre wide around the plant

10

Give it a good drink
