

**What issues should be addressed when it comes to fighting debt and climate crises jointly?**

demands		issues to understand better (research)		issues to discuss further		issues to campaign about		Advocacy focus		Issues that need training	
+	100 bn target of climate finance is not enough - should be based on the needs of the countries in the global south		Debt sustainability assessment - how to incorporate climate vulnerabilities		Debt for climate / nature swaps		Debt Cancellation / unconditional debt relief		State contingent clauses (hurricane clauses)	+	Integrating climate vulnerabilities into debt sustainability assessments (DSA) and vice-versa
+	Scale up of grant-based climate finance needed		sector-specific analysis of non-debt instruments of intl. climate finance (as a basis to engage with / propose to provider countries)		IMF comprehensive surveillance review with a high climate element - both finance for climate adaptation and transition should be included in article IV - how to implement? Attention to financing needs	+	Debt relief for Loss and damage in case of an extreme event		Funding for loss and damage		
	Participatory decision making on addressing debt and climate nexus				Market-based responses to debt and climate crisis, e.g. green bonds, nature performance bonds, risk insurance.	+	Erasing new debt via modalities				
					'Odious debt' linked to countries' debt to IFIs for fossil fuel projects which need to be retired to meet climate goals		Unveiling carbon markets				
					Debt swaps and the oversight measures which will be put in place to ensure that the funds are redirected towards the intended use.		Implementation of adaptation strategies, in an attempt to break the debt cycle
