Dear

I am increasingly alarmed at the damage Brexit is doing to the UK, and I am writing to ask you to muster your courage and throw your weight behind a People's Vote. Vote Leave have been found guilty of breaking electoral law, undermining the legitimacy of the referendum result. The painless Brexit promised during the campaign is both undeliverable and the biggest lie of all.

FOLD HERE

The architects of Brexit are fleeing the fallout and moving money offshore - options not open to the vast majority of your constituents. This is not a safe basis on which to proceed and I am therefore asking you to ensure that we get to make a decision on Brexit based on "informed consent".

Given the crisis unfolding in our country, with doctors, nurses, scientists, carers, and engineers all leaving, please, tell me honestly how Brexit will benefit the UK and end austerity? How will it benefit our NHS? And how will it benefit me?

As one of your constituents, I urge you to do everything you can to stop Brexit, including adding your name to the campaign for a People's Vote. If you support No Deal or any form of Brexit, I will never vote for you or your party again, and will encourage others to do the same.

Yours sincerely
