

GREAT CHEAP FOOD

NO DEAL WTO TRADE DEALS BRING US CHICKEN

Fed with arsenic loaded chicken feed to promote growth and washed in chlorine dioxide, acidified sodium chlorite, trisodium phosphate or peroxyacids but not salmonella free.

US BEEF

US beef is fed synthetic growth hormones in spite of concerns about the high incidence of hormonal cancers. Growth hormone rBGH fed to US cows to increase milk production contains mercury.

US BEEF PIGS AND TURKEYS

US pigs, cows, and turkeys fed ractopamine is linked to increased heart rate and anxiety in humans.

US SALMON

US farmed salmon is fed with synthetic astaxanthin made from petrochemicals, which is banned in Australia and New Zealand.
