FAMILYTREERN.ORG

Dear Members of our Family Tree Relief Nursery Family,

Since the beginning of the Coronavirus (COVID-19) emergency, our team of directors has been making decisions to keep our families, staff, and community safe and healthy. Our mission is to partner with families to keep children safe and keep families together. We thank you for choosing us as a resource for your family.

It with a heavy heart that we must follow the guidance of our Governor and extend the closure of our children's classes and respite care until April 30th. Our time with you and your children in the classroom is one part of how we accomplish our goals together.

We understand that this time can be stressful and confusing, and we fully intend to continue our established supports for families across all of our programming:

- Delivery of food, diapers, and hygiene items will continue. Please contact your children's teacher or family support staff for these items as you need them.
- Outreach will continue via phone calls - please reach out to your children's teacher or family support staff as needed for emotional support or guidance.

As we continually adapt to a new normal, we are preparing unique ways to support you, please visit our social media and website for new content:

- Videos will be posted of our teachers in the classroom reading books and participating in circle time that you can watch with your children.
- Informative videos will be posted for you to view. These will be ideas for activities as well as information traditionally accessed through our parenting classes.

Please let your children know our teachers are thinking of them, and we can't wait to have them back in class.

As always, this is a partnership. If you have any suggestions for additional support or content we can provide, please let us know.

Stay healthy and safe,

Renee Smith, Executive Director
