

Protect her from harm.

Here are the facts about the Ayotte proposal to deny DREAMers the refundable Child Tax Credit:

- It would harm children who grew up in the United States and consider America home
- It would harm the youngest DREAMers, the very population both parties have sought to protect
- It would take an average of \$1,800 out of the pockets of low-income families that pay their taxes
- It would drive more children into poverty at a time when child poverty is already at the highest level in decades

The facts are clear. **A vote for this proposal is a vote to harm children.**
