

BC Election 2020 Candidates Survey

The Climate Crisis threatens our children and grandchildren's quality of life now and into the future. We need to be assured our next MLA will treat the climate emergency as the crisis it is and take real action.

To earn our vote, we want to know the extent to which you agree or disagree with the statements which follow.

Nicola Spurling **BC Green Party, Coquitlam-Maillardville**

1. Fossil fuel subsidies and approval of fracking, LNG, and other oil and gas developments is a credible plan in achieving net-zero carbon by 2050.

Strongly Disagree

2. BC must improve its respect for Indigenous rights and adherence to UNDRIP through shared decision-making.

Strongly Agree

3. The government should fund the transition to renewable energy, such as solar power, in all buildings and homes in BC, especially in Northern communities.

Strongly Agree

4. The Climate Crisis should be treated with the same level of urgency as the public health crisis of Covid-19 .

Strongly Agree

5. BC's old growth forests are a critical component of meeting BC's climate targets and should be protected.

Strongly Agree

6. Is there anything else you'd like to say? (140 words or less)

I have been incredibly disappointed with the BC NDP and BC Liberals' lack of commitment to addressing the climate emergency. I am fully committed to taking tangible action, as indicated in my responses to your questions.
