

- How do you most effectively target?
  - Screening within targeted systems?
  - Look at HMIS/inflow data to target specific zip codes? Sub-populations?
- What outcome measures should we look at?
  - Housing stabilization?
  - Reduction in inflow? Or maybe initially, effective interventions will lead to increases in inflow?
- What are effective strategies to bring in other system leaders?
  - Communications/messaging?
  - Incentives/policies?
- How do you learn and adapt? What are ways to build in mechanisms to learn?
  - How do you adapt, stop, or expand?
- How can funders also support strategies that address structural barriers? How do we help shine a light on how racial inequities are produced and maintained?
