Opportunities to make a difference:

Register voters: Contact Dana Hickey, dana.hickey@aol.com

Food for Thought - Thinking Points:

Climate disruption is greater threat than any domestic or international terrorist action to our freedoms - Climate disruption is increased weather extremes and human costs resulting from significant, unseen, and rampant releases of greenhouse gasses. Climate disruption severely impacts large geographic areas and a growing number of the world's citizens. This growth is caused from the increased recovery and use of dirty energy resources for powering our resource limited world. Climate disruption will accelerate further as corporations take advantage of melting ice to pillage other dirty energy resources. We demand freedom from Climate disruption.

Alternative Word/Phrase:

Climate patriots fight for freedom from climate disruption, i.e. Tim DeChristopher, Bidder 70, <http://www.timdechristopher.org>
