

HERE'S THE TOP PLAN FOR A BETTER NEW ZEALAND.

1. HOUSING MARKET REFORM.

Housing: it's one of the most pressing issues facing our economy. TOP's Tax Policy will restore housing affordability over the long term. In the meantime we must improve the rights of renters and increase the supply of social housing.

2. ENVIRONMENT FRONT AND CENTRE.

For too long, New Zealand's environment has been exploited to create private profits and social losses. Major polluters must face the true cost of their business models, and water must be priced.

3. \$200 A WEEK FOR 18 - 23.

We have to do better for the next generation of New Zealanders. As our population ages and Governments refuse to deal with the cost of superannuation, giving our young people the best start possible is more important than ever.

4. LEGALISE IT. REGULATE IT. TAX IT.

We're missing out on millions in business, jobs, tax revenue, medical, innovation, and other opportunities. The science is in. Legalising cannabis is the best policy approach. Legalise it, regulate it, and tax it. It's that simple.

5. A 33% TAX CUT.

TOP's tax policy fundamentally changes our tax emphasis from income, onto assets. This will create a much fairer system, with the wealthiest paying more, and the majority of wage and salary earners getting a tax cut of 33%.

6. FRESH WATER FAIRNESS.

Polluters and commercial water users have escaped the true costs of their business models for years. Governments have surrendered to vested interests and at the price of sustainability. It's time for change.

7. SMALL BUSINESS GROWTH.

Small businesses are the real backbone of the New Zealand economy. TOP's tax and other reforms will give small businesses the support they deserve.

8. LEARNING FOR LIFE.

New Zealand has to meet the challenges of the 21st century. We need to invest a lot more in early childhood, reduce assessment, achieve better outcomes through inter-school cooperation, and improve the standing and pay of teachers.

9. REAL CLIMATE ACTION.

Our planet is on fire. TOP will help fix it by building the greenest economy in the world. We already have many of the pieces we need, including agricultural, scientific, and technological innovation and leadership.

10. SMARTER IMMIGRATION POLICY.

The TOP test for migrants is, will you improve our standard of living? If the answer is yes, you're welcome. If not, then thanks but no thanks. TOP will make it quicker and simpler for truly skilled people to live and work here.

11. THE DEMOCRACY RESET.

Almost 700,000 people didn't vote in 2017. We must restore public faith and participation in our democracy, or risk losing it. TOP wants to see a written Constitution to protect the New Zealand way of life.

12. ALCOHOL REGULATION REFORM.

New Zealand's alcohol hang over is at least \$6 billion. TOP supports raising the off-license purchase age to 20, and increasing the excise tax by 10%, raising more than \$300 million for alcohol addiction, youth, and other support services.

13. JUSTICE MEANS JUSTICE.

Per capita, New Zealand has the second highest incarceration rates in the Western world. Every year we lock up more people, but the evidence says prison is one of the significant causes of crime. It's time for a new approach.

14. POSITIVE HEALTH POLICY.

Our current health system is the ambulance at the bottom of the cliff. TOP wants an independent organisation like Pharmac across the whole health system to ensure funding goes to the greatest benefit.

15. GENETICS FOR GOOD.

TOP's wants to allow scientists to use gene editing techniques, where no new genetic material is introduced, to help solve environmental, social, and economic problems.

16. UBI FOR FAMILIES.

Once world-leading. New Zealand's welfare system is now dysfunctional and broken, creating perverse incentives, generational welfare dependency, and other failed outcomes. The evidence says a Universal Basic Income is a better way.

NEW ZEALAND, IT'S TIME FOR FUNDAMENTAL CHANGE.

In the last 20 years, New Zealand's OECD ranking has barely changed.

Think we're doing well? In 2019, 10% of the population controls 60% of the wealth. Polluters are trashing our environment. Around 290,000 Kiwi kids live in poverty. We are experiencing a methamphetamine epidemic.

THE LIST GOES ON.

How has this happened? Basically, because of the policy choices made by successive Labour and National Governments. Our main parties have failed to deliver on our economic and social promise.

From housing to health, the environment to education, climate to cannabis, if we are going to overcome the challenges of the 21st century, New

Zealand must implement fundamental change.

If you're reading this, the chances are you want to see a better New Zealand. That means doing things differently, starting with how we vote.

The election in 2020 will be one of the most important in our history. It's time to Vote Different.

70% OF NEW ZEALANDERS NEVER CHANGE THEIR VOTE IN THEIR LIFETIME.

TO CHANGE NEW ZEALAND, WE NEED YOUR HELP.

If you agree with this TOP plan for New Zealand, why not join the party? It's only \$20. We always need money, too. We're fighting big politics and big money. For us, even a small donation

goes a long way. You can also help by volunteering! To find out more about TOP, our policies, or how you can help make a better New Zealand, visit
