

## Physical Therapist (Motion Analysis Center)

Shriners Hospitals for Children (SHC) in Greenville, South Carolina has a full-time, split- position, opening for a Physical Therapist in our Motion Analysis Center (MAC) and Rehabilitation Services. As a Rehab Physical Therapist, responsibilities include evaluation and therapy services, including direct patient care, patient/family education and transition of care, in an efficient, age-appropriate, and culturally sensitive manner. In alignment with the standards of practice of the professional organization, the PT would provide comprehensive, compliant, and safe clinical care, while demonstrating the philosophy of family centered care, with the assessment and treatment of inpatients and outpatients including infants, toddlers, school age, and adolescent. In the MAC, the PT is an integral part of a highly trained, multidisciplinary team that combines clinical and biomechanical expertise to assess children and adolescents with neurological and orthopaedic conditions. MAC responsibilities will include the clinical collection, analysis, interpretation, and communication of gait analysis data for treatment decision-making. Previous experience in quantitative motion analysis is strongly preferred
