Center for Motion Analysis
Division of Orthopaedics
Connecticut Children’s

Insurance Coverage of Motion Analysis:
Finding Solutions
Agenda

1) Tour of Center for Motion Analysis (CMA)
2) CMA Mission
3) Impact of Clinical Gait Analysis
4) Current insurance company policies
5) Strategies for improving reimbursement
6) Discussion: Plan for Connecticut Children’s
7) Action Items – last 15 minutes
2. CMA Mission

The Center for Motion Analysis provides comprehensive clinical motion measurement services to a variety of medical specialties for treatment decision-making and evaluation in children, adolescents and adults with a spectrum of movement disorders using comprehensive state of the art three-dimensional motion analysis techniques.
Mission – CMA (con’t)

• Clinical activities are integrated with and supported by comprehensive related research in pathological gait

• Resultant knowledge base is disseminated through
  – educational activities
  – peer review publications
  – new clinical programs
Current Practice

Comprehensive motion measurement is a integral part of the Standard of Care for orthopaedic surgical decision-making and evaluation for over 34 years.
Connecticut Children’s Mission

“… improving the physical and emotional health…”

“… research, education and advocacy.”

“… excellence in all that we do.”

We contribute to the pillars of the Connecticut Children’s Mission!
3. Impact of Clinical Gait Analysis

A picture means 1,000 words!

A video means 1,000,000 words!

- Insurance companies are changing their coverage policies related to motion analysis
- Aetna – first company in 2002 (approximately)
- Others following trend…

Considers gait analysis experimental and investigational | **NO**  
Considers gait analysis experimental and investigational |
Impact?

• Connecticut Children’s employees and their children are not covered for motion analysis services
Impact?

• Reduced orthopaedic surgical intervention in patients with CP
  – Between 1987 - 1999 an annual average of 53 ambulatory patients with CP with SEMLS (multilevel orthopaedic surgery)
  – Past 12 months there were 12 ambulatory patients

• Financial implications
5. Strategies for Improving Reimbursement

• Carve-outs
• Negotiations
  – individual insurance companies
  – state
• Bundling
• Cost analysis of procedures offered
• Office of the Healthcare Advocate
• Philanthropy
Other Ideas

• **Build Relationships Internally**
  – Become indispensable to many hospital departments
  – Increase the number of internal advocates

• **Build Relationships Externally**
  – The more people aware of the clinical utility of gait analysis, the more people who will refer their patients
  – Increased potential for financial support for gait analysis

• **Build Additional Applications for Gait Analysis**
  – Increase clinical applications/need for clinical gait analysis
Successes from Other Clinical Gait Analysis Laboratories
Examples – Carve outs

• Mary Free Bed, Grand Rapids, MI
  – successfully negotiated a carve out with a local payer
  – negotiated by the Revenue Cycle Manager and the CFO
  – collect 30% - 40% of what is billed
Examples (con’t) – Carve outs

• Children’s Hospital LA, Los Angeles, CA
  – contracting department, invited local Blue Cross representative for tour the motion lab
  – Lab provided education on role of motion analysis with case examples and current literature
  – successfully negotiated a carve out for motion analysis
Examples (con’t) – Carve outs

• Children’s Hospital LA, Los Angeles, CA
  – Motion Lab Medical Director educated people on the local and state level for many years
  – successful in getting reasonable reimbursement rates for the Motion Analysis CPT codes from state payors
  – Results were lab specific – not transferrable
Examples (con’t) - negotiations

• Gillette Children’s Specialty Healthcare, ST. Paul, MN
  – James R. Gage Center for Motion Analysis
    Medical Director and GCSHC CFO successfully negotiated with state for payment for gait analysis services for all children with physical disabilities using current CPT codes
Examples (con’t) - Negotiations

- Shriners’, Greenville, SC
  - Gait lab staff educated hospital CEO about role of gait analysis
  - Hospital CEO negotiated with MediCaid to pay 50% of the billed amount
  - CEO is now working with Blue Cross emphasizing the cost savings that can occur if gait analysis testing is used in decision-making.
Examples (con’t) - Bundling

• Nemours Alfred I DuPont Hospital for Children, Wilmington, DE
  – Financial department and gait lab medical director organized bundling the motion analysis testing with the Orthopaedic Surgery
  – If the surgery is on the books, then the gait analysis test can be included as part of the bundled cost of the surgery
  – All patients who are getting orthopaedic surgery will have gait analysis
Examples (con’t) - Philanthropy

- Nemours Alfred I DuPont Hospital for Children, Wilmington, DE
  - Medical Director of motion lab organized philanthropic support.
  - Obtained a community grant that covers the post-op motion analysis if insurance does not cover
Examples (con’t) – Peer-to-Peer

• Denver Children’s Hospital, Denver, CO
  – Medical director of the gait lab reported success in “peer to peer” appeals by referring physician have been successful in getting services approved especially for rotational problems and SEMLS
  – The emphasis needs to be on cost savings
Examples (con’t) - Advocacy

- Parents
- Parent Organizations – “Reach for the Stars”
- Office of the Healthcare Advocate
- Professional Organizations - AACPDM
Discussion

• Plan for Connecticut Children’s?
Action Items

• Who and what actions are next?
• Time frame?
Our Previous Efforts

• Medical Director Meeting with Aetna – 2004
• WellPoint Policy Initiative
• Office of the Healthcare Advocate - CT
• Letter Writing – Aetna
• GCMAS symposium – 2005 and 2015
• Peer to Peer
• Appeal letters
Thank You

• On behalf of the patients we serve!
