

Send the new report 'After the Logging' to your local MP!

Step 1: Find your local state and federal MPs here

Step 2: Draft your email

Subject: New report shows logging is NOT sustainable - end logging now

To <your local state or federal MP>

A new report was just released which shows 1 in 3 areas that are logged by the Victorian government's logging agency, VicForests, are failing to regenerate. Our beautiful, diverse forests are being flattened and turned into weed infested wastelands.

[You need to read the report and see the devastation for yourself.](#)

The report shows the devastating impact logging is having on forests, which might never recover! As someone who cares deeply about Victoria's forests, I expect you to support the recommendations in the report and to bring forward the 2030 transition out of native forest logging and abolish VicForests.
