

The power of connected minds

Production Operator (Shifts)

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We connect and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us, without regard to gender, age, origin, sexual orientation, disability or belief. At BASF, careers develop from opportunities.

BASF plc, BASF Group's main operating company in the United Kingdom, supplies performance chemicals in addition to raw materials to most industries. We market a wide range of products, including chemicals, construction chemicals, crop protection products, dispersions and pigments, pest control solutions, plastics, polyurethanes systems, leading edge coating products, mining and water treatment chemicals.

What you can expect

Following internal movements within Production, an opportunity has arisen to recruit an Operator 2, and an Operator 1.

- o As part of an effective shift team, you will work collaboratively to operate and support production (plant / warehouse and process). You will contribute directly to departmental performance improvements.
- o You will record and interpret key data for Operational Excellence (use of paper logs, databases, computerised metrics displays etc.) to safely and reliably manufacture excellent quality products for your customers.
- o As part of a team, you will control and monitor plant equipment on plant via the computer control system.
- o You will investigate alarms that occur and carry out basic troubleshooting to determine the root cause of events. (operator 2 only)
- o Following plant procedures, you will carry out activities on the plant to support manufacture such as process checks and measurements, dispensing and charging chemicals, sampling and final product packing.
- o You will work within EHS requirements to ensure safe working systems and practices are followed, taking responsibility for personal actions and the safety of others.
- o Effective 2-way communication with members of your team, shift managers and others is essential including handover to colleagues.
- o With your supervisor(s), you will identify your learning and development needs, and build an agreed learning and development plan.

What we expect

- o Beyond a minimum of 1 year of experience within a manufacturing or engineering environment, you will have a good standard secondary education (English, Maths
