

The power of connected minds

Electrical & Instrumentation (E&I) Technician

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We connect and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us, without regard to gender, age, origin, sexual orientation, disability or belief. At BASF, careers develop from opportunities.

BASF plc, BASF Group's main operating company in the United Kingdom, supplies raw materials to most industries. We market a wide range of products, including chemicals, construction chemicals, crop protection products, dispersions and pigments, pest control solutions, plastics, polyurethane systems, leading edge coating products, mining and water treatment chemicals. We manufacture performance chemicals, polyurethane systems and pest control solutions.

What you can expect

As an Electrical & Instrumentation Technician, you will be responsible for executing E&I maintenance safely within schedule, budget and to standards.

- o You will execute planned and preventative maintenance on a range of instrumentation during plant turnarounds, including isolations, removal and reinstatement, calibration and repair.
- o In addition, you will execute maintenance on a range of industrial process electrical equipment including isolation, disconnection, removal and reinstatement of items such as large motors, variable speed drives and motor starters.
- o You will be responsible for annual proof testing of Safety Instrumented Systems (SIS) on plants across the site and for carrying out maintenance where identified in line with BASF SIS procedures.
- o Furthermore, you will respond to and carry out reactive maintenance on Electrical and Instrumentation equipment in the event of a breakdown during days.
- o Finally, you will attend training, meetings and will also maintain your individual competency record.

What we expect

- o You have completed an apprenticeship with 3+ years experience in executing industrial E&I maintenance and demonstration of respective skills.
- o You have a comprehensive knowledge of E&I standards and procedures, especially around Safety Instrumented Systems and ATEX.
- o As well as this knowledge, you have a good knowledge of specifics of a chemical production site.
