

# The power of connected minds

**BASF**  
We create chemistry

## System Engineer

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We connect and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us, without regard to gender, age, origin, sexual orientation, disability or belief. At BASF, careers develop from opportunities.

BASF plc, BASF Group's main operating company in the United Kingdom, supplies performance chemicals in addition to raw materials to most industries. We market a wide range of products, including chemicals, construction chemicals, crop protection products, dispersions and pigments, pest control solutions, plastics, polyurethanes systems, leading edge coating products, mining and water treatment chemicals.

### What you can expect

- o You carry out the role of local expert for engineering and maintenance SAP Systems.
- o You maintain SAP user scripts and provide training to ensure that end users are competent.
- o You carry out the role of local expert for engineering and maintenance data management including the maintenance of access control to document management systems.
- o You carry out the role of local contact for engineering and maintenance IT software ensuring that the appropriate software is available and local experts are nominated for each system.
- o You manage access control where applicable to systems such as the Integrity Management System.
- o You provide support to the engineering and maintenance departments ensuring effective systems are in place for managing resident contractor costs, engineering records and demonstrating compliance with legislative and Responsible Care requirements.
- o You support the Technical Stores team to ensure that material is tracked correctly, and the warehouse management systems are functioning efficiently.
- o You work with local finance to create and maintain project data including the creation, tracking and closure of projects.
- o You provide management reporting including agreed KPIs and development of specialist reports where required as well as regular transparent and accurate management reporting on all engineering and maintenance systems activities.
- o In Addition, you provide expertise and support to finance for SAP projects and fixed asset management.

### What we expect

- o You are qualified to a HNC in Business, IT or Engineering.
