Martha,

I would like to formally request an endorsement from your organization Grassroots Northshore. I believe my values as candidate align with what GRNS' represents. We both believe in equal opportunity for education, housing, transportation, health care, and employment. The 11th Assembly district is my home and full of fighters - like my parents, like the immigrant families who work every day to make our community stronger, like the young people in search of a great education, like the blue collar workers who keep this state running, and so many others. They deserve someone in the State Capitol who will fight just as hard to keep their voices and concerns front and center.

I am running to improve economic opportunities, reform our state criminal justice system, and ensure quality education for all students. It is no coincidence that Wisconsin leads the country in African American unemployment and incarceration, while also being home to the widest achievement gap for African American students. We deserve better.
