

GREEN MUSIC AUSTRALIA TOP TIPS

FOR GREENER FESTIVAL CAMPING

1. Join the reuse revolution by bringing your own water bottle, cups, plates, cutlery and other camp kitchen gear.
2. Avoid buying single-use plastics like bottled water, cutlery and definitely no straws, they suck!
3. Buy in bulk, nude your food, and bring it along in reusable containers.
4. Pack only quality gear like a decent tent and marquee so you can use them for many more festivals to come. That way that way you can take your memories with you too.
5. If you don't have your own equipment, consider hiring or borrowing from a friend.
6. Look after your site like it's your own backyard.
7. Set up your campsite with care, pegging down tents and marquees to prevent wind damage.
8. Leave no trace. Only bring what you need so you avoid creating waste in the first place. If you do end up with rubbish, take it to the nearest bin and recycle/compost whatever you can.
9. Catch public transport to the festival and let someone else do the driving – it's better for the environment.
10. If you're driving, carpool with friends or family where possible.
